Japan in War and Peace John W. Dower,1996 This collection of essays highlights the resemblances between wartime, postwar and contemporary Japan. The essays are particularly concerned with the nature of Japanese capitalism and the country's nationalistic doctrines of racial superiority.

Looking Before and After Clay Maccauley,2015-07-12 Excerpt from Looking Before and After: Some War-Time Essays
Five years ago, I was one in a large number of observers of current events and students of the historic development of mankind, who believed that they had much to justify their hope in a near realization of their cherished ideal of Peace on Earth and Good Will among Men. Prompted by seemingly clear signs of the times, I had published, three years previously, - 1911 - a booklet under the title, Thought and Fact for To-day. In the introduction to the book I declared that, War is not a necessary, and therefore is not to be a perpetual, accompaniment of social, or national development. It has become a relic, or a survival of the life of savage and barbaric man, unworthy of toleration under the enlightenment fast spreading among the mankind of to-day. And even though, for the purpose of self-defense against the lust of gain and power of some nations, it may be necessary for the best of peoples to continue to bear arms, it is still one of the highest of national and international duties to advance continually the plea for a World-Peace, and to use all ways that open towards it. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Looking Before and After Clay MacCauley, 1919

Clausewitz in His Time Peter Paret, 2014-12 Far from being a detached theorist, Carl von Clausewitz was as intensely aware of the cultural and intellectual currents of his time as he was engaged in its political and military conflicts. The society in which he lived and the people with whom he served affected the analytic method he developed in his writing and the conclusions he reached. The essays in this volume examine Clausewitz in comparison with teachers, friends, and opponents, a perspective enriched by significant documents which have been previously ignored. They deepen our knowledge of Clausewitz's life and how he enlarged his understanding of warfare from its mechanisms and the interaction of its elements to its apparently permanent place in the relation between states.

War Time Sten Rynning, Olivier Schmitt, Amelie Theussen, 2021-03-02 Perceptions of time contributed to recent Western military failings The “decline of the West” is once again a frequent topic of speculation. Often cited as one element of the alleged decline is the succession of prolonged and unsuccessful wars—most notably those waged in recent decades by the United States. This book by three Danish military experts examines not only the validity of the speculation but also asks why the West, particularly its military effectiveness, might be perceived as in decline. Temporality is the central concept linking a series of structural fractures that leave the West seemingly muscle-bound: overwhelmingly powerful in technology and military might but strategically fragile. This temporality, the authors say, is composed of three interrelated dimensions: trajectories, perceptions, and pace. First, Western societies tend to view time as a linear trajectory, focusing mostly on recent and current events and leading to the framing of history as a story of rise and decline. The authors examine whether the inevitable fall already has happened, is underway, or is still in the future. Perceptions of time also vary across cultures and periods, shaping socio-political activities, including warfare. The enemy, for example, can be perceived as belong to another time (being “backward” or “barbarian”). And war can be seen either as cyclical or exceptional, helping frame the public’s willingness to accept its violent and tragic consequences. The pace of war is another factor shaping policies and actions. Western societies emphasize speed: the shorter the war the better, even if the long-term result is unsuccessful. Ironically, one of the Western world’s least successful wars also has been America’s longest, in Afghanistan. This unique book is thus a critical assessment of the evolution and future of Western military power. It contributes much-needed insight into the potential for the West’s political and institutional renewal.

Nationality & Government Alfred Eckhard Zimmern, 2015-02-24 This is a curated and comprehensive collection of the most important works covering matters related to national security, diplomacy, defense, war, strategy, and tactics. The collection spans centuries of thought and experience, and includes the latest analysis of international threats, both conventional and asymmetric. It also includes riveting first person accounts of historic battles and wars. Some of the books in this Series are reproductions of historical works preserved by some of the leading libraries in the world. As with any reproduction of a historical artifact, some of these books contain missing or blurred pages, poor pictures, errant marks, etc. We believe these books are essential to this collection and the study of war, and have therefore brought them back into print, despite these imperfections. We hope you enjoy the unmatched breadth and depth of this collection, from the historical to the just-published works.

The Philosophy of Conflict Havelock Ellis, 2015-07-11 Excerpt from The Philosophy of Conflict: And Other Essays

in War-Time When we glance at a map of the world, the eye catches its large firm outlines and passes over as negligible that broken corner of a great continental mass which we call Europe. Yet let us look more closely. Then we may realise that what at first had seemed the jagged and half-melted edge of a continent is really a delicately and artfully carved piece of work such as we find nowhere else on the whole design outspread before us. We realise that the artist who made the world, elsewhere content, on the whole, to mould huge masses or great blank spaces, has here used his finest graver and brooded with his most loving smile over the minute configuration of land and water, so as to achieve the maximum of harmonious diversity with the elimination of all extremes in a temperate region sheltered from the withering blasts of the South and the icy devastation of the North, bathed by the warm and yet stimulating currents of air and ocean. We search in vain for any similar achievement of art among the blank oceans of the world, its vast barren plains, its oppressive mountain masses.
