The EU, the US and China _ Towards a New International Order? Jing Men, Wei Shen, 2014-02-28 The interaction between the EU, the US and China is of particular importance to the formation of the international order in the 21st century. This book focuses on the latest developments and examines how critical the interactions between these three powers are.

The Commercialisation of Space Sarah Lieberman, Harald Köpping Athanasopoulos, Thomas Hoerber, 2023-03-29 This interdisciplinary book examines the impact of the commercialisation of space and the changing outlook of the space sector. Using a framework based around theories of international political economy (IPE), the chapters take on issues relating to the politics, the economics and the ethics of commercialising space. The book aims to build a bridge between the research carried out on European Space Policy and the issues that are currently pertinent in the global discussion of future space policy. Overall, the volume aims to: inform the reader about historical and contemporary developments in the neoliberal commercialisation of space assess the impact of the commercialisation of space on European space institutions, European space policy and European space culture raise ethical questions about the environmental and practical sustainability of the commercialisation of space examine the compatibility of the commercialisation of space with international, EU and national law. This book will be of much interest to students of space policy, global governance, European politics and International Relations.

The EU in a Globalized World Thomas Hoerber, Alexandre Bohas, Stefano Valdemarin, 2023-12-11 This book fosters critical reflection on Europe's place in a fast-changing global environment, covering the soft and hard facets of EU power along the spectrum of low politics–high politics. Taking an innovative case-study approach, it provides a wide understanding of European Studies and International Relations beyond classical power considerations and addresses the crossroads of the two disciplines. Fundamentally, it addresses the specificity of the EU as an actor in International Relations and shows that the EU holds power and influence – creating opportunities for peace-making and peace-building – in a way classical IR theory would suggest it should not. This book will be of key interest to scholars and students of European Studies, foreign policy analysis, International Relations, Security Studies, Political Science, History, and Economics.

Climate and Energy Protection in the EU and China Peter Hefele, Michael Palocz-Andresen, Maximilian Rech, Jan-Henrik Kohler, 2018-11-04 This edited volume gives an insight into climate and energy protection in China and the European Union (EU). By taking a closer look at the EU and China separately, the book presents the current situation in terms of environmental policy and energy use/ consumption in EU as well as in China. The book broaches the collaboration of the EU and China regarding climate and energy protection. The target audience primarily comprises research experts in the field of climate research as well as public decision makers.

The Routledge Handbook of European Integrations Thomas Hoerber, Gabriel Weber, Ignazio Cabras, 2022-02-27 The Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in

European integration collections. Whilst still examining the largest and most influential institutions, bodies and highly-funded policy areas as acknowledged dominant topics in European studies, it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU. Organised around three main sections – culture, technology and ‘tangibles’ – the book: offers an authoritative ‘encyclopaedia’ to ‘alternative’ areas in European integration, from media, football, Erasmus and tourism, to transport, space, AI and energy; retains coverage of the dominant topics in European studies, such as the Eurozone, the Common Internal Market, or European law, but in balance with other areas of interest; and provides an essential companion to existing scholarship in European studies. The Routledge Handbook of European Integrations is essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in, and actively concerned about, research in the study of European integration/studies. The Open Access version of Chapter 14 in this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Making the European Green Deal Work Helene Dyrhaug, Kristina Kurze, 2023-08-25 This book critically analyses different dimensions in the sustainable transitions outlined by the European Green Deal, focusing on both internal actions and external relations and highlighting the EU’s diverging powers and capabilities in achieving the core objectives. As with the Green Deal itself, the chapters cover different policies including financial instruments, energy policies, climate policies and external policies and apply the ideal-type logics of appropriateness and consequences to analyse sustainable transformations. The variety of the cases contribute to a broad understanding of how different actors interpret and implement the aims of the European Green Deal, including especially those lagging behind, who, for various reasons, are struggling with the sustainable transition. From examining their policies, the book illuminates the challenges and opportunities they are facing. Overall, the contributions address key questions surrounding the EU’s powers and limits in inducing transformative change and implementing the European Green Deal. This book will be of key interest to scholars, students and practitioners of EU sustainability policies, sustainability transitions and green economy, environmental studies, energy policy, energy governance and climate change, public policy, comparative politics and international relations.

Cross-cultural Challenges in International Management Bruno Amann, Jacques Jaussaud, 2020-09-28 The development of international business and of globalization in every field of activity requires the interaction of individuals and groups with diverse cultural, religious, ethnic and social characteristics in different institutional contexts. Cross-cultural Challenges in International Management addresses the various difficulties that may impede smooth communication and cooperation of those involved in such interactions. It examines what types of resources are mobilized to overcome such difficulties. The cultural and societal challenges of international management must be considered at different levels, the one of strategy, which the first part of the book is devoted to, but also that of management and business practices, addressed in the third part of the book. Both strategic decisions and daily

business practices, however, in the particularly fluctuating and incompletely defined international context, gain from being framed by ethical and corporate social responsibility, which the second part of this book is devoted to. Cross-cultural Challenges in International Management provides an analysis of specific situations revealing such cultural or societal challenges. Thus, the reader will benefit not only from advanced theoretical knowledge in the field, but also from practical applications in various professional context and various countries. Practitioners, students in various fields of social sciences, particularly in management, communication, international relations, and researchers will widely benefit from this book.

The Trump Administration Toby S. James, 2022-04-28 The Trump presidency has been one of the most eventful and controversial in American history, with consequences for the governance and policy of the US and beyond. While Trump left office claiming a long list of 'Trump Administration Accomplishments', his time in office was also marked by a hailstorm of criticism. But beyond the sensationalist tweets and news stories, what policy effects did he bring? This volume provides an extensive and authoritative set of studies evaluating Donald Trump's impact on American society and beyond. It provides a new layered framework for assessing the policy impact of leaders, which can be used for understanding presidential and prime ministerial leadership more widely. Chapters explore his impact on American democracy, Congress, the Supreme Court, the economy, the COVID-19 pandemic, the environment, American soft power, the international system and more. The chapters in this book were originally published as a special issue of the journal Policy Studies.

The Sustainable Global Marketplace Mary Conway Dato-on, 2014-10-27 Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science. This volume includes the full proceedings from the 2011 Academy of Marketing Science (AMS) Annual Conference held in Coral Gables, Florida, entitled The Sustainable Global Marketplace.

The European Environmental Conscience in EU Politics Thomas Hoerber, Gabriel Weber, 2021-12-06 Based on empirical studies of European energy and environmental policies, this book suggests that, in combination, these two policy fields form a consensus in the EU which might also become the basis for a new European ideology, namely European 'sustainability'. It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time, and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy. In this connection between energy and the environmental we find one driver for European integration and indeed

European identity. If sustainability should become a European ideology, it will substantially influence the way future Europeans will live. This book will be of key interest to scholars and students of European Studies, International Relations, Political Science, History, Economics, Sustainability Studies, Environmental and Energy Policies in Europe.

Global Power Europe - Vol. 1 Astrid Boening, Jan-Frederik Kremer, Aukje van Loon, 2013-03-28 This two-volume project provides a multi-sectoral perspective over the EU's external projections from traditional as well as critical theoretical and institutional perspectives, and is supported by numerous case studies covering the whole extent of the EU's external relations. The aim is to strive to present new approaches as well as detailed background studies in analyzing the EU as a global actor. Volume 1: The first volume "Theoretical and Institutional Approaches to the EU's External Relations" addresses the EU's overall external post-Lisbon Treaty presence both globally and regionally (e.g. in its neighborhood), with a special emphasis on the EU's institutional framework. It also offers fresh and innovative theoretical approaches to understanding the EU's international position. - With a preface by Alvaro de Vasoncelos (former Director European Union Institute for Security Studies) Volume 2: The second volume "Policies, Actions and Influence of the EU's External Relations", examines in both quantitative and qualitative contributions the EU's international efficacy from a political, economic and social perspective based on a plethora of its engagements.

A Transnational Account of Turkish Foreign Policy Hazal Papuççular, Deniz Kuru, 2020-05-25 This book offers an analysis of Turkish foreign policy based on transnational(ist) perspectives. In order to counterbalance the state-centric accounts that dominate this area of study, the authors provide theoretical frameworks as well as historical and contemporary case studies that emphasize transnational dynamics. The content is divided into four

complementary sections that explain and exemplify transnational (f)actors in the context of Turkish foreign policy. The first addresses theoretical and ideational frameworks that illustrate the relevance of a transnational account, while the second demonstrates the possibility of developing transnationally oriented approaches even in historical cases, going beyond a presentist focus. In the third and fourth sections, the book focuses on two prominent non-state actors, namely diaspora communities and non-governmental organizations, which operate at the interstices of the domestic and the international. This allows the authors to highlight the significance of transnational dynamics in Turkey's foreign policy.

China and Europe in 21st Century Global Politics Frauke Austermann, Anastas Vangelis, Xiaoguang Wang, 2014-01-15
China and Europe both decisively shape twenty-first century global politics. Successful cooperation between Europe and China continues, notably in climate change mitigation, or finding a way out of the financial crisis. Relations are also increasingly institutionalised, such as through Summits or High-Level Dialogues. However, although in 2013 the EU and China have celebrated the 10-year-anniversary of their Strategic Partnership, struggles have re-emerged, in relation to human rights, intervention in crisis regions such as Syria, and trade subsidisation and protectionism in areas such as the solar energy industry. Given this simultaneous presence of partnership and competition, this edited volume investigates if Sino-European relations have become what Henry Kissinger has termed a "co-evolution": both China and Europe "pursue their domestic imperatives, cooperating where possible, and adjust their relations to minimize conflict". The volume sheds light on four key areas of Europe-China relations: first, high politics and security relations; second, the European sovereign debt crisis; third, energy and environmental issues; and fourth, soft power and public diplomacy. As the volume is authored by Chinese and European early-stage scholars in equal numbers, it adds a balance of perspectives and a future-oriented outlook to the still-low but increasing number of works on Europe/EU-China relations.

Sustainable Development and Governance in Europe Pamela M. Barnes, Thomas C. Hoerber, 2013-06-26
This book analyses the evolution of the sustainability discourse in the European Union, exploring the conditions necessary for sustainable development to move from a conceptual model into a model for action for strategic decision makers at all levels of governance. This book questions the extent to which the discourse on sustainability has become embedded into governance structures in Europe. It focuses on the importance of the nature of the language of the political discourse on sustainability and how ideas are communicated amongst the actors and stakeholders in the policy making process, as well as assessing the conceptual, political, institutional and operational barriers apparent across the European geographic region. Drawing case studies from numerous policy areas including climate change, EU emissions trading scheme, renewable energy, nuclear energy, the European integrated energy market, transport mobility, and environmental protection, expert contributors unveil a narrowing of the discourse on sustainability that has taken place in Europe. However, a considerable discontinuity remains between the economic and environmental objectives of sustainable development, and the authors argue that it is essential that conditions for a dynamic discourse, open to multiple participants, are developed. Sustainable Development and

Governance in Europe will be of strong interest to students and scholars of comparative politics, governance, sustainable development and environmental politics and studies.

The Euro, The Dollar and the Global Financial Crisis Miguel Otero-Iglesias, 2014-09-19 This book analyses how financial elites in key dollar-holding emerging markets perceive the contest between the euro and the dollar for global currency status. It also assesses how far the Eurozone has gone in challenging US hegemony in monetary affairs through the prism of these elites. Drawing on Chartalist and Constructivist theories of money, the author provides a systematic approach to studying global currency dynamics and presents extensive original empirical data on financial elites in China, Saudi Arabia, the UAE and Brazil. The author demonstrates, amongst other things, how the gradual ascendance of a structurally flawed currency like the euro has highlighted the weaknesses of the dollar and how the euro has demonstrated that sovereignty sharing in monetary affairs is possible and that the international monetary system can be a multicurrency and multilateral system. In this highly innovative and important book, Otero-Iglesias shows the importance of studying financial elites in Brazil, China and the GCC countries in order to understand the full impact, material and ideational, of the euro in the transformation of the IMS. It will be vital reading for students and scholars of International Political Economy, International Economics, International Finance, Economic History, Economic Sociology, International Relations, Comparative Political Economy and Comparative Politics.

Peterson's Short-term Study Abroad, 2005

The Political Economy of Rare Earth Elements Ryan David Kiggins, 2015-07-28 The contributors argue that rare earths are essential to the information technology revolution on which humans have come to depend for communication, commerce, and, increasingly, engage in conflict. They demonstrate that rare earths are a strategic commodity over which political actors will and do struggle for control.

A European Space Policy Thomas Hoerber, Sarah Lieberman, 2019-05-10 This book builds a bridge between current research in space policy and contemporary European political studies by addressing developments in European space policy and its significance for European integration. It answers questions central to European studies applying them to the burgeoning field of EU space policy and takes an interdisciplinary approach, examining space policy in the light of a range of policy areas including common foreign security policy, technology policy, transport policy and internal market. Using a theoretical framework based around notions of neo-institutionalism to evaluate the evolving nature of space policy in Europe, the book provides clear insights into the development of the sector and the resulting developments made to the European political landscape. This text will be of key interest to scholars and students of Space policy, EU studies/politics, European Studies/Politics, International Relations, Political Science, History Economics and Security Studies.

The European Union in the Asia-Pacific Weiqing Song, Jianwei Wang, 2019-02-20 Since the mid-1990s, the European Union has defined the Asia Pacific as one of its key strategic targets on its ambitious road towards a global power. Over the past decades, big changes have taken place on both sides and the wider world. It's high time to

evaluate the EU's performance in its Asian policy. In fact, the EU is at crossroads with its Asia Pacific policy. On several aspects, the EU is compelled to redefine its interests and roles, and rethink its strategies and policies towards the dynamic and ever important Asia Pacific region. This volume addresses this theme, by elaborating the general context, major issues and countries in the EU's Asia Pacific policy. It covers issue areas of traditional security, economy and trade, public diplomacy, and human security and focuses on the EU's relations with China, Japan, the ASEAN countries, and Australasia.

web aug 1 1980 the illustrated
world war ii encyclopedia covers it
all my only frustration with this

encyclopedia is that it is somewhat difficult to navigate other than the number each volume cover is identical the generic cover and the encyclopedia's semi chronological format make it difficult to simply choose a specific volume on sight
