Open IT-Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion Gonzalo León, Ana M. Bernardos, José R. Casar, Karlheinz Kautz, Janice DeGross, 2008-09-29 The 11 Working Conference of IFIP WG 8.6, Open-IT Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion, organized in Madrid in October 22–24, 2008, follows the series started in Oslo in 1995 and continues in the footprints of the past year's conference in Manchester. This year, although the Madrid Conference addresses the usual topics covered in previous WG8.6 conferences, the emphasis is on the issue of open innovation and its relationships with technology transfer and diffusion in the field of information technology. This issue is deeply modifying the way that knowledge is generated, shared, transferred, diffused, and used across the world as a side effect of globalization. It affects the organizational structure, partnerships, roles assumed by stakeholders, and technology transfer and diffusion models and instruments. Industry, academia, and governments are simultaneously concerned. Although the concept applies to all industrial sectors, IT companies were early innovators. The analysis of the contents of this book allows the identification of some trends in technology transfer and diffusion issues as a part of the innovation process. The same problem is addressed in very different ways and extrapolation is not straightforward. Even innovation terminology is not clearly shared by different subcultures in the field.

**Software Estimation** Steve McConnell, 2006-02-22 Often referred to as the “black art” because of its complexity and uncertainty, software estimation is not as difficult or puzzling as people think. In fact, generating accurate estimates is straightforward—once you understand the art of creating them. In his highly anticipated book, acclaimed author Steve McConnell unravels the mystery to successful software estimation—distilling academic information and real-world experience into a practical guide for working software professionals. Instead of arcane treatises and rigid modeling techniques, this guide highlights a proven set of procedures, understandable formulas, and heuristics that individuals and development teams can apply to their projects to help achieve estimation proficiency. Discover how to: Estimate schedule and cost—or estimate the functionality that can be delivered within a given time frame Avoid common software estimation mistakes Learn estimation techniques for you, your team, and your organization \* Estimate specific project activities—including development, management, and defect correction Apply estimation approaches to any type of project—small or large, agile or traditional Navigate the shark-infested political waters that surround project estimates When many corporate software projects are failing, McConnell shows you what works for successful software estimation.

**Spy** , 1991-04 Smart. Funny. Fearless. It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. *Playing to the Crowd* Nancy K. Baym,2018-07-10 Explains what happened to music—for both artists and fans—when music went online. Playing to the Crowd explores and explains how the rise of digital communication platforms has transformed artist-fan relationships into something closer to friendship or family. Through in-depth interviews with musicians such as Billy Bragg and Richie Hawtin, as well as members of the Cure, UB40, and Throwing Muses, Baym reveals how new media has facilitated these connections through the active, and often required, participation of the artists and their devoted, digital fan base. Before the rise of social sharing and user-generated content, fans were mostly seen as an undifferentiated and unidentifiable mass, often mediated through record labels and the press. However, in today's networked era, musicians and fans have built more active relationships through social media, fan sites, and artist sites, giving fans a new sense of intimacy and offering artists unparalleled information about their audiences. However, this comes at a price. For audiences, meeting their heroes can kill the mystique. And for artists, maintaining active relationships with so many people can be both personally and financially draining, as well as extremely labor intensive. Drawing on her own rich history as an active and deeply connected music fan, Baym offers an entirely new approach to media culture, arguing that the work musicians put in to create and maintain these intimate relationships reflect the demands of the gig economy, one which requires resources and strategies that we must all come to recognize and appreciate.

Flash MX Application And Interface Design Connor McDonald,Paul Prudence,Gerald YardFace,Peter Aylward,Fay Rhodes,Robbie Shepherd,Ken Jokol,2013-11-27 The days of Flash as a creative luxury are long gone. After months of downsizing, Flash creativity has been on a huge rationalization program. It is no longer enough to present animation in millions of colors and a hundred transparencies. It is no longer sufficient to provide interactivity and dynamism for their own sake. The purpose of this collection is to show how designers have taken Flash and made it work for its supper. What we discover is a series of creations that place Flash at the hub of cutting edge web content. The end result is a snapshot of Flash as the ideal medium. In these amazing examples, we see the software pushed to its limits to create unbeatable applications—a collapsible family tree, an

interactive video learning system, and a drawing tool, capable of running online! Beyond this, we dip into the back-end capabilities to look at how to improve Flash still further. Some staple XML and PHP routines are brought in to add a bit of spice, while Flash's mysterious sharedObject command is hunted down and tamed to create a hybrid Tamagotchi houseplant—perfectly suited to lure surfers back to your website!
