EU Cohesion Policy Implementation - Evaluation Challenges and Opportunities Carla Henriques,Clara

Viseu,2022-11-29 This open access book is the result of the 1st International Conference on Evaluating Challenges in the Implementation of EU Cohesion Policy (EvEUCoP 2022). It presents the recent findings, sparks discussion, and reveals new research paths addressing the use of novel methodologies and approaches to tackle the challenges and opportunities that are unveiled with the implementation of the EU cohesion policy. The authors cover a wide range of topics including the monitoring of data; the clearness of indicators in measuring the impact of interventions; novel evaluation methods, addressing the mid-term and terminal assessment; as well as case studies and applications on evaluations of the thematic objectives under the scrutiny of the cohesion policy, namely:• Research, technological development, and innovation; • Information and communication technologies;• Shift toward a low-carbon economy. During the 2014-2020 programmatic period, member states were required to undertake assessments to evaluate the efficacy, efficiency, and impact of each operational program. Such evaluations are generally concerned with the compliance of projects and activities with programmatic priorities, as well as with funds' absorption capacity and refer to ex-ante and ex-post assessments. Hence, this book proposes the use of novel methodologies addressing the mid-term and terminal assessments that enable performing the efficiency appraisal of the operational programs and that can support decision-makers in the selection of projects that should be awarded for funding.

Usable Privacy and Security in Online Public Services Esther Ruiz Ben,Margit Scholl,2023-12-05

This practice-oriented book is a unique guide to the implementation of usable, privacy-compliant and secure online services in the area of e-government. Beginning with a clarification of basic concepts of usability, data privacy, and cybersecurity, the book provides lucid explanations of different methods (quantitative, qualitative, and mixed methods) that can be applied in the practice of designing, developing, and evaluating online public services in light of both usability criteria and data privacy and IT security compliance. A number of examples and exercises are included as well as awareness-raising measures that can serve as orientation both for practitioners and for teaching purposes. There is also a concise glossary of terms along with recommendations for further reading. This book provides comprehensive coverage of usability, data privacy and information security topics. At the time of going to press, it is also up to date with respect to the implementation of the EU Single Digital Gateway regulation. It is therefore aimed at anyone interested in understanding the principles of usable privacy and information security and in ways of contributing to the design, development, and evaluation of online public services that satisfy the needs of the public. The book's audience thus includes not only students in the areas of e-government or public administration but also professionals developing online services or e-government applications.

International and EU Aviation Law Elmar Maria Giemulla,Ludwig Weber,2011-01-01

This book offers an extraordinary wealth of information, from the ground up, of the law governing and regulating air transport today, with a strong emphasis on international aviation. A team of distinguished authors in the field of aviation law provide a cogent synthesis from which sound legal opinions and strategies of legal action may be confidently built. Among the many topics here in depth are the following: definition and classification of airspace; distinction between civil and state aircraft; air navigation and air traffic control services; airport charges and overflight charges; structure of ICAO; standard-setting functions and audit

functions of ICAO; functions of the International Air Transport Association (IATA); policy and effects of deregulation and liberalization of air transport policy; the International Registry for Aircraft Equipment; air carrier liability regimes and claims procedure; measures to combat aviation terrorism, air piracy and sabotage; and the Open Skies Agreements. This publication cites significant legislation and court rulings, including from the United States and the European Union, where far-reaching measures on market access, competition and passenger rights have set trends for other regions of the world. The special case of Latin America has a chapter to itself. At a time when commercial aircraft have been used as lethal weapons for the first time, aviation law finds itself in the front line of responsibility for maintaining global aviation security.

EU Aviation and Flight Safety Regulations Handbook Volume 1 System, Procedures and Important Regulations IBP, Inc., 2016-11-17 2011 Updated Reprint. Updated Annually. European Aviation Safety Agency (EASA) Handbook

Introduction to Aviation Management Andreas Wald, Christoph Fay, Ronald Gleich, 2010 This volume provides an introduction to aviation management covering all major actors and processes, the fundamental structures, and the economic and regulatory background of the industry. It comprises contributions from experienced practitioners of the aviation industry and from scholars in that field.

Intelligence Security in the European Union Artur Gruszczak, 2016-08-05 This book investigates the emergence of an EU strategic intelligence community as a complex multi-dimensional networked construction. It examines the constitution, structure and performance of EU intelligence arrangements as part of security policies of the European Union. Intelligence security has become a remarkable feature of the European integration processes. This study assesses the ability of EU Member States, as well as relevant institutions and agencies, to develop effective, legitimate and accountable institutions and mechanisms for collection, transmission, processing and exchange of intelligence. In this regard, synergy is a key indicator that validates the ability to create the European strategic intelligence community in the EU's legal and institutional framework. This groundbreaking project constructs a comprehensive model of the intelligence community as a distorted epistemic community tailored to singularities of EU security policies and systemic arrangements provided by EU institutions and agencies.

The Dictionary of Civil Aviation Umut Ataman, 2023-11-02 In the realm of civil aviation, the sky is hardly the limit. It's the starting line. Each day, countless professionals and enthusiasts alike engage with this dynamic sector, propelling humanity literally into new horizons. However, as we soar into these vast expanses, the necessity for a robust understanding and a shared language becomes not just beneficial, but vital. It's here that *The Dictionary of Civil Aviation* finds its wings, offering a solid ground of knowledge amidst the boundless skies of aviation exploration. With a reservoir of 4,681 meticulously curated entries, this dictionary stands as a testament to the colossal body of knowledge that civil aviation encompasses. It's an endeavor to foster a shared understanding, to bridge the knowledge gaps that might exist between a seasoned aviator and an aviation student, between air traffic controllers and airport managers, or between aviation policymakers and enthusiasts. *The Dictionary of Civil Aviation* is more than just a glossary; it's a journey. A journey through the technicalities that ensure safety in the skies, the regulations that govern our airways, the acronyms that punctuate aviation communication, and the innovations that continue to drive this sector forward. Each term encapsulated in this dictionary is a node in the vast network that is civil aviation, offering readers a structured pathway through the complex, yet exhilarating world of flight. The objective is clear: to foster a culture of continuous learning and shared understanding within the civil aviation community. By doing so, we not only enhance the safety and efficiency of civil aviation but also

honor the spirit of exploration and innovation that has always been its hallmark. As you flip through the pages of The Dictionary of Civil Aviation, you are not just encountering definitions; you are engaging with the living, evolving entity that is civil aviation. Each term is a window into a broader narrative, a narrative that you, as a reader and as a member of the civil aviation community, contribute to. We invite you to embark on this educational expedition, to delve into the nuances of civil aviation, and to emerge with a richer understanding and appreciation of the sector that makes global connectivity possible. Through this dictionary, may your curiosity take flight, and may your understanding of civil aviation soar to new heights.

Air Crash Investigations: Hard Landing Kills 9, the Crash of Turkish Airlines Flight TK 1951 on Amsterdam Schiphol Airport Igor Korovin, 2010-06-28 On 25 February 2009 a Boeing 737-800, flight TK1951, operated by Turkish Airlines was flying from Istanbul in Turkey to Amsterdam Schiphol Airport. There were 135 people on board. During the approach to the runway at Schiphol airport, the aircraft crashed about 1.5 kilometres from the threshold of the runway. This accident cost the lives of four crew members, and five passengers, 120 people sustained injuries. The crash was caused by a malfunctioning radio altimeter and a failure to implement the stall recovery procedure correctly.

Airline Transport Pilot: Complete Note Collection Carsten Borgen, 2020-04-02 In its 6th edition, The Airline Transport Pilot: Complete Note Collection book is a culmination of more than 10 years of research and writing. What started out as a personal note collection for my ATPL studies later became a compilation of information benefiting pilots around the world. If you have acquired this book it means you are interested in being the best pilot, you can possibly be. Being the best pilot, requires a continuously never-ending dedication to learning and revising, from the time you first step into the classroom till the day you retire from aviation. "As we aspire to become better and safer, we must never forget the knowledge and skills we have already acquired" - Carsten Borgen You will be familiar with most of the information in this book, but over time that information will slowly fade away. As a professional pilot it is crucial to keep this knowledge sharp but going through all the ATPL subject publications again and again, would be an endless task. This book is written as a quick reference guide to pilots and aviation enthusiasts, in an effort to simplify the process of staying current and revising the theory you have already learned while adding to that knowledge. Using this book you can within a couple of hours revise a complete subject matter. Whether you have acquired this book to remain current or simply to prepare for exams or interviews, this book will stay with you for the rest of your career.

Obsolete Pesticides: A ticking time bomb and why we have to act now, 2009 Pesticides become obsolete when they can no longer be used for their intended purpose because they have been banned on account of their prolonged impact on the environment and/or because they cannot be used due to age, deterioration or a change of specification of currently applied pesticides. This problem has been addressed by the Stockholm Convention on Persistent Organic Pollutants (POPs), which was ratified by most EU member states and many but not all non-EU countries from Central and Eastern Europe and the former Soviet Union. It entered into force in 2004. The Convention and the subsequent National Implementation Plans (NIPs) drawn up by signatories have addressed the problems to some extent, notably within the EU. Within the EU, producers have been legally obliged to manage obsolete pesticides (OPs), including organising their collection and destruction according to EU laws applicable to hazardous waste management. With EU enlargement, EU law has consequently become applicable to the new member states as well. The process has been accelerated by EU programmes such as PHARE or national programmes established by some member states. However, implementation of the provisions of the Stockholm Convention on their own is

hardly sufficient to effectively deal with the risks associated with OPs. The Convention only deals with nine specific OPs (hereafter called Persistent Organic Pollutant or POP pesticides), which represent a small proportion of the total number that are obsolete. In addition, and in close geographical proximity to the EU, problems remain, especially in South-East Europe and the countries of the former Soviet Union.

The Lisbon Treaty Jean-Claude Piris,2010-06-17 An in-depth, impartial and informed description of the Lisbon Treaty's legal features, in their historical and political context.

Air Crash Investigations: Lost Over the Atlantic, the Mysterious Disappearance of Air France Flight 447 George Cramoisi,2010-05-24 On 31 May 2009, flight AF447, an Airbus A330-200, took off from Rio de Janeiro bound for Paris. At 2 h 10, a position message and some maintenance messages were transmitted by the ACARS automatic system. After this nothing was heard of from the aircraft. Six days later bodies and airplane parts were found by the French and Brazilian navies. All 228 passengers and crew members on board are presumed to have perished in the accident. A massive search by air and sea craft for the plane's black boxes failed so far.

Flight time limitations Great Britain: Parliament: House of Commons: Transport Committee,2012-05-30 This report examines draft proposals from the European Aviation Safety Agency (EASA) to change the rules that govern how many hours a pilot can fly. The Transport Committee warns that working hours and conditions for pilots and cabin crew must be improved or safety could be at risk. Currently, the UK implements stricter flight time regulations than some other European countries, but under the new rules proposed by the European Aviation Safety Agency, the UK would not be able to have its own regime and the UK's current standards would be lowered. Fatigue is already an issue in aviation: 43% of pilots have reported falling asleep involuntarily at some point whilst on duty under the UK's current regulatory framework. The Committee recognises that flight time limitations are complex regulations, but the report highlights several issues where there is clear scope for improvement. The proposed 11 hour duty period at night for pilots flies in the face of scientific evidence and should be reduced to a 10 hour maximum. There is added concern that a pilot could land a plane after 22 hours awake. The Civil Aviation Authority must do more to monitor pilot hours so that long duty periods are the exception not the rule, and must address a culture of under-reporting of pilot fatigue. MPs accept that common European flight time limitations could improve aviation safety for UK passengers travelling on non-UK airlines. However, for these benefits to be realised the European standards must be uniformly high.

European Regulation of Aerodrome Safety Management Systems in the EASA System Henning Pfisterer,2017-12-18 The implementation of Safety Management Systems at international airports was one of the most considerable changes in the regulatory framework for the operation and licensing of aerodromes in recent years. However, even more than five years after its inception it appears that the high expectations ICAO has placed on what has been designed as paradigm shift in the way of doing business in the airport industry were not materializing and Safety Management Systems appear at best to only marginally impact the safety performance of airports. Based on the lessons learned from the implementation of SMS in Germany an ideal organizational set-up for a most effective aerodrome SMS shall be designed. This proposal of an ideal organizational set-up shall be validated through a model implementation at a representative airport and subsequent long term observation in live operation. This model implementation serves as a basis from which recommendations for a future European regulation of Aerodrome Safety Management Systems under the EASA system shall be derived.

The European Union and Central and Eastern Europe Dimitris Papadimitriou,Dorina Baltag,Neculai-Cristian Surubaru,2018-12-07 The role of the European Union (EU) in Central and Eastern European

countries (CEECs) and its 'near abroad' has attracted much scholarly attention over the past few years. Notwithstanding the successes of the EU's eastwards enlargement, the 'transformative power' of the EU in the region has often been called into question, both in terms of its depth and longevity. This book addresses a number of key questions: What determines EU performance in post-communist Europe? What are the conditions that influence it? How does the projection of EU power differ between its enlargement policy and the European Neighbourhood policy? To answer these questions this volume brings together a wide range of case studies, based on different approaches and methods, but with a single analytical focus on 'performance'. The book's coverage and focus will be of interest to academics, practitioners and students interested in the EU, CEECs, pre- and post-enlargement studies and more widely to those interested in the international relations and the governance of wider Eastern Europe. The chapters of this book were originally published as a special issue of *East European Politics*.

Trapping Safety into Rules Mathilde Bourrier, 2017-05-15 Rules and procedures are key features for a modern organization to function. It is no surprise to see them to be paramount in safety management. As some sociologists argue, routine and rule following is not always socially resented. It can bring people comfort and reduce anxieties of newness and uncertainty. Facing constant unexpected events entails fatigue and exhaustion. There is also no doubt that proceduralization and documented activities have brought progress, avoided recurrent mistakes and allowed for 'best practices' to be adopted. However, it seems that the exclusive and intensive use of procedures today is in fact a threat to new progress in safety. There is an urgent need to consider this issue because there is doubt that the path chosen by many hazardous industries and activities is the most effective, safety wise, considering the safety level achieved today. As soon as safety is involved, there seems to be an irresistible push towards a wider scope of norms, procedures and processes, whatever the context implied. This book is not a plea against proceduralization, but it does take the view that it is time to reassess how far it can still go and to what benefit. Underlying these questions, there is a growing suspicion that the path taken might in fact lead to a dead end, unless the concept of procedure and the conditions under which these procedures are developed are revisited.

Operation EUFOR TCHAD/RCA and the European Union's Common Security and Defense Policy Bjoern H. Seibert, 2010 Addressing security challenges posed by weak and failed states will require increasingly demanding military interventions, often over a great distance and prolonged periods of time. As a result of several engagements over the last decade, the U.S. military has gained valuable experience in undertaking stability operations. However, the United States should not be expected to fulfill such operations alone; we must look to our partners and allies to share some of the global responsibility. In this, Europe is unquestionably the most capable and natural U.S. ally. While most U.S. policymakers are familiar with the North Atlantic Treaty Organization, developments in the field of security and defense within the European Union (EU) have thus far received little attention in the United States, despite the EU's increasing importance. One such operation in Africa, Operation EUFOR TCHAD/RCA, provides a look inside the workings of an EU military operation, highlights successes and failures, and draws lessons learned. --
