Developmental and Crosslinguistic Perspectives in Learner Corpus Research
Yukio Tono, Yuji Kawaguchi, Makoto Minegishi, 2012-03-28 This volume provides a state-of-the-art overview of current research and developments on the use of learner corpora perceived from developmental and crosslinguistic perspectives. The book is divided into two parts. The eleven contributions of Part I investigate the development of English language skills of young learners across seven countries/regions on the basis of a new corpus resource called the International Corpus of Crosslinguistic Interlanguage (ICCI). Part II contains seven papers devoted to other varieties of learner corpora, especially spoken learner corpora and learner corpora of languages other than English. Presenting original research in corpus linguistics, this book will be of interest to researchers and postgraduates in the fields of learner corpus research and second language acquisition and those who wish to apply corpus methodology in teaching and learning.
