The Car Show Nicolae Sfetcu,2014-04-27 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “motor” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual

edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent hot topics include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

Lorries of Arabia: The ERF NGC Robert Hackford, 2015-03-25

This book is a tribute to ERF's world-class long-hauler, especially the Middle East examples, and to those who drove them. What did the ERF NGCs look like? How well did they perform? Where did they venture? What were they like to drive and to live in? And where did they stand in ERF's contribution to Britain's place in the history of the TIR-trail? Left-hand drive ERFs were, perhaps, one of the more beguiling elements in the exotic pageantry of 1970s Middle-East trucking - and this particular model earned a reputation for excellent performance in the mountains, a theme that runs throughout this book. The vision of these magnificent machines hauling articulated road-trains over the Saudi mountains in Trans-Arabia livery is a treat.
