Advertising as Multilingual Communication H. Kelly-Holmes, 2016-01-11 Advertising has traditionally communicated messages to consumers with strong local and national identities. However, increasingly, products, producers, advertising agencies and media are becoming internationalized. In the development of strategies that appeal to a large multinational consumer base, advertising language takes on new 'multilingual' features. The author explores the role of advertising language in this new globalized environment, from a communicative theory point of view, as well as from a close linguistic analysis of some major advertising campaigns within a multicultural and multilingual marketplace.

Relationship Marketing in Sports Andre Buhler, Gerd Nufer, 2012-07-26 Relationship marketing is an important issue in every business. Knowing the customers and establishing, maintaining and enhancing long-term customer relationships is a key component of long-term business success. Relationship Marketing in Sports aims to fill this void by discussing and reformulating the principles of relationship marketing and by demonstrating how relationship marketing can be successfully applied in practice within a sports context. Written by a unique author team of academic and practitioner experience, the book provides the reader with: the first book to apply the principles of relationship marketing specifically to a sports context case studies from around the world to provide a uniquely global approach applicable worldwide strong pedagogical features including learning outcomes, overviews, discussion questions, glossary, guided reading and web links practical advice for professional, semi-professional and non-professional sporting organisations a companion website providing web links, case studies and PowerPoint slides for lecturers. Deep Pockets Brendan Cooper, 2023-04-06 'A brilliant book . . . brilliantly written. You really do need to read it' Adrian Chiles 'Mixing the sacred and the profane, high culture and low culture, the sublime and the ridiculous, Deep Pockets is the book this game of unfathomable difficulty and infinite mystery well deserves' Critic The game of snooker has a remarkable history. From humble origins, it blossomed spectacularly in the 1980s into the nation's most popular sport. Top players became celebrities. The papers were stuffed with snooker scandals. It even conquered the pop charts. In the twenty-first century, the game is still big news. Along with millions of British fans, a vast audience continues to grow across every corner of the world, from Europe to the Middle East to China. The global thirst for snooker has never been greater. But - strangely perhaps - snooker's deeper meanings have rarely been explored. It is a game that celebrates subtlety and mystery; a slow undertaking in a fast-paced world. Elegant and profound, snooker invites serious contemplation. Deep Pockets is a study of this uncharted territory - a love letter to snooker, and an impassioned journey into its soul. Because snooker, in fact, is more than a game. It is a belief set; a way of seeing; an entire philosophical system. In chapters that cover everything from time, truth, loss, luck and more, Deep Pockets explores how snooker can help us to trace the meaning of life itself.

The Routledge Companion to Transmedia Studies Matthew Freeman, Renira Rampazzo Gambarato, 2018-10-09 Around the globe, people now engage with media content across multiple platforms, following stories, characters, worlds, brands and other information across a spectrum of media channels. This transmedia phenomenon has led to the burgeoning of transmedia studies in

media, cultural studies and communication departments across the academy. The Routledge Companion to Transmedia Studies is the definitive volume for scholars and students interested in comprehending all the various aspects of transmediality. This collection, which gathers together original articles by a global roster of contributors from a variety of disciplines, sets out to contextualize, problematize and scrutinize the current status and future directions of transmediality, exploring the industries, arts, practices, cultures, and methodologies of studying convergent media across multiple platforms.

Narrative Revisited Christian R. Hoffmann, 2010-11-25 The volume examines the role of narratives in old and new media. Its ten contributions firstly center on the various forms and functions narratives assume in computer-mediated environments, e.g. websites, weblogs, message boards, etc. In this light, past and present approaches to the description of narratives are presented and reevaluated based on their ability to capture the conceptual and methodological exigencies of new media. Secondly, the volume sheds new light upon the multimodal composition of new media narratives which typically feature multiple co-occurring semiotic modes such as speech, sound, text, static or moving images. In this vein, each paper explores a wide array of authentic examples from text genres as diverse as political speeches, real-time narratives and contemporary feature films. Its wide scope should not only appeal to linguists interested in the discursive and pragmatic dimension of narratives but also to scholars and students in other scientific disciplines.

The European Football Championship Albrecht Sonntag, Alexandra Schwell, Basak Alpan, 2015-11-08 The UEFA European football championship was the first European mega-event to take place in post-socialist Europe. Taking this as a departure point, this volume focuses on football as a realm of constructing and negotiating identities using rich ethnographic fieldwork and in-depth media analysis.

The Body Liberation Project Chrissy King, 2023-03-14 From author and wellness personality Chrissy King, an exciting, genre-redefining narrative mix of memoir, inspiration, and activities and prompts, with timely messages about social and racial justice and how the world needs to move beyond body positivity to something even more exciting and revolutionary: body liberation. When Chrissy King first joined a gym, she had one goal in mind: to "get skinny." In pursuit of this goal, she fell into the all-too-common cycle of "not enough-ness"; no matter what she achieved, there was always something she felt she needed to change about her body, her appearance, herself. This made her realize the most liberating truth of all: She was not the problem. Diet and fitness industries rooted in white supremacy were the problem; Eurocentric and carefully manufactured beauty standards were the problem; discourses telling her that her happiness was directly tied to her physical appearance were the problem. So she created an actionable method to redefine the relationship we have with our bodies, thereby achieving a sense of self-worth that is completely separate from how we look. The Body Liberation Project is about finding actual freedom in our bodies by discovering strength and aspects of fitness, movement, and eating that work for YOU. It's about realizing that the goal is not to look at our bodies and love everything we see; it's to understand that at our essence we are so much more than our bodies. But it's also about recognizing the harsh realities that prohibit people in marginalized bodies from being able to do so. Society constantly bombards those who fall outside Eurocentric standards of beauty (think Black, fat, trans, etc.) with the message that they are less attractive, and part of the journey toward body liberation is examining your own privilege, acknowledging the harm you may be causing others, and mourning your old ideas about what a body "should" look like. Recognizing that none of us are free until all of us are, Chrissy King shares the wisdom, the tools, and the inspiration to motivate readers to find body liberation and, even more important, to pass it on.

Everyone to Skis! William D. Frank, 2013-10-31 Nowhere in the world was the sport of biathlon, a combination of cross-country skiing and rifle marksmanship, taken more seriously than in the Soviet Union, and no other nation garnered greater success at international venues. From the introduction of modern biathlon in 1958 to the USSR's demise in 1991, athletes representing the Soviet Union won almost half of all possible medals awarded in world championship and Olympic competition. Yet more than sheer technical skill created Soviet superiority in biathlon. The sport embodied the Soviet Union's culture, educational system and historical experience and provided the perfect ideological platform to promote the state's socialist viewpoint and military might, imbuing the sport with a Cold War sensibility that transcended the government's primary quest for post-war success at the Olympics. William D.

Frank's book is the first comprehensive analysis of how the Soviet government interpreted the sport of skiing as a cultural, ideological, political and social tool throughout the course of seven decades. In the beginning, the Soviet Union owned biathlon, and so the stories of both the state and the event are inseparable. Through the author's unique perspective on biathlon as a former nationally-ranked competitor and current professor of Soviet history, *Everyone to Skis!* will appeal to students and scholars of Russian and Soviet history as well as to general readers with an interest in skiing and the development of twentieth-century sport.

Innovation, Sustainability and Management in Motorsports Hans Erik Næss, Anne Tjørndal, 2021-05-18 "There's probably no better sport than Formula E to present and study the science and practice of innovation within (motor)sport, and this book is a must read for those active within this fascinating area". - Dr. Kristof de Mey, Sports Technology, Innovation & Business Developer at Ghent University, Belgium This open access book provides novel insights on management innovation and sustainability in motorsport. Utilizing the all-electric racing championship called Formula E as case, it draws upon data from multiple sources such as sustainability reports of Formula and its stakeholders, media data, podcasts and newspaper articles, partner publications, and social media outputs. It aims to generate a theoretical model that describes and explains the optimal conditions for innovation when it comes to enhancing a sport organisation's commercial product. Apart from its general transferability to sports research, this model enables further study of a motorsport phenomenon that has been hailed by media as the championship, which affirms money in sustainability. It has also been emphasized by sport researchers as a highly relevant case to study management innovation. This book will be interesting to academics working in sports management, knowledge management, innovation and sustainability. Hans Erik Næss (b. 1978) is an Associate Professor in Sport Management at Kristiania University College, Norway. He holds a PhD in sociology from the University of Oslo and is the author of several peer-reviewed articles and books on motorsports, including *A History of Organizational Change: The case of Fédération Internationale de l'Automobile (FIA) 1945-2020*. Anne Tjørndal (b. 1988) is an Associate Professor in Sociology of Sport at Nord University, Norway. She holds a PhD in sociology from Nord University and has published articles in high-quality international journals on topics like social innovation, gender and inclusion/exclusion in sport. Tjørndal is the Celia Brackenridge International Research Award winner for 2019.

Western Broadcasting at the Dawn of the 21st Century Leen d' Haenens, Frieda Saeys, 2021-06-21 The main objectives of the series correspond to those of the journal Communications: The European Journal of Communication Research, also published by Mouton de Gruyter. The discipline of communication science is concerned with investigation of the structure and function of mass communication processes and their impact on society and social groups. How these processes have an impact on values, knowledge, opinions and behaviour of individuals similarly constitutes an important area of concern for the discipline. The Communications Monograph series emphasizes these concerns of the discipline through publication of books taking a European social science perspective. Inasmuch as mass communication cannot be studied distinct from other modes of communication, the purpose of the Series is to publish material covering other communication forms - intrapersonal, interpersonal, organizational - in addition to mass communication. In other words, the Communications Monograph series encompasses the entire field of communication science as its domain of interest. Special attention is addressed to the publication of titles that serve as main texts for academic courses and focus on such topics as communication theory and methodology, mass media and production of mediated messages, media use, reception processes, and media impact, political and marketing communication, advertising, public relations and propaganda, media policy, new media technologies and electronic networks, media history and media development.

Destination London Andrew Smith, Anne Graham, 2019-05-21 London is one of the world's most popular destinations and visitors contribute approximately £14.9 billion of expenditure to the city every year. Its tourism and events sectors are growing and over the last few years London has received more visitors than ever before. However, detailed accounts of the city's visitor economy are conspicuously absent. This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces. The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze with tourism spreading beyond established central zones into peripheral, suburban and residential areas - in part propelled by a big rise in peer to peer accommodation use. Simultaneously, London's airports and sports stadiums and their surrounds are becoming destinations in their own right. New vantage points have been created, allowing tourists to explore the city: from above, at night-time or through tours given by the homeless; via the opening up of the River Thames; or through the transformation of local parks into eventscares. The book explores these trends and shows how urban destinations expand. In doing so, it enhances our understanding of London and highlights the growing significance of tourism and events in global cities.

Sport in Islam and in Muslim Communities Alberto Testa, Mahfoud Amara, 2015-09-25 As Islam's visibility in global society increases, Muslim populations grow, and Muslim countries compete to take up positions at the heart of global sport, the interplay between sport and Islam becomes ever more illuminating. Sport in Islam and in Muslim Communities is the first book to analyse this relationship through a pluralist lens, exploring the questions it raises about contemporary Islam, globalisation, and the challenges faced by (in particular young) Muslims in negotiating their place in global society. With contributions from Muslim and non-Muslim authors, the book approaches an array of contemporary issues, from the role of sport in gender, youth and political identities in Islam and Muslim societies to sport policy in Muslim countries, sport's role among Muslim minorities and sport marketing's relationship to

Muslim cultures. Drawing on sociology, anthropology, political science, Islamic studies and sport studies, *Sport in Islam and in Muslim Communities* not only examines the significance of sport in Islam, but helps to draw wider conclusions on religious identity in sporting settings and the interplay between sport, gender, political ideology and consumer culture.

Racing with Rich Energy Elizabeth Blackstock, Alanis King, 2022-09-29 Formula One has long maintained a glitzy aura that masks dark and strange goings-on in the background. But with the 2019 season came a force louder than Formula One could dream of muffling: William Storey, the founder of British energy drink startup Rich Energy. Storey became a multimillion-dollar sponsor of the Haas Formula One team a year after records showed Rich Energy having a mere \$770 in the bank. He equated his doubters to moon-landing truthers and publicly mocked both the Haas team and the entities winning legal disputes against him. But where were actual cans of Rich Energy, and did the supposed sponsorship funds exist? In the six months between Storey's first race as a Formula One sponsor and his very public exit, he stole the spotlight with a loud mouth and an active Twitter account. Haas team boss Guenther Steiner once described the Rich Energy news cycle as: I'm getting sick of answering these stupid fucking questions on a race weekend. I've never seen any fucking thing like this. No one else had, either. This book uncovers the complete, bizarre story.
