Generals of the Army James H. Willbanks,2013-05-01 "A concise account of the extraordinary careers of the five men who had perhaps the greatest impact on the US military of the late twentieth century." –Andrew Wiest, author of *The Boys of '67: Charlie Company's War in Vietnam* Formally titled "General of the Army," the five-star general is the highest possible rank awarded in the U.S. Army in modern times and has been awarded to only five men in the nation's history: George C. Marshall, Douglas MacArthur, Dwight D. Eisenhower, Henry H. Arnold, and Omar N. Bradley. In addition to their rank, these distinguished soldiers all shared the experience of serving or studying at Fort Leavenworth, Kansas, where they gained the knowledge that would prepare them for command during World War II and the Korean War. In *Generals of the Army*, James H. Willbanks assembles top military historians to examine the connection between the institution and the success of these exceptional men. Historically known as the "intellectual center of the Army," Fort Leavenworth is the oldest active Army post west of Washington, D.C., and one of the most important military installations in the United States. Though there are many biographies of the five-star generals, this innovative study offers a fresh perspective by illuminating the ways in which these legendary figures influenced and were influenced by Leavenworth. This concise volume offers an intriguing look at the lives of these remarkable men and the contributions they made to the defense of the nation. "An excellent review of the lives and challenges, on and off the battlefield, during trying times for our country." –Ike Skelton, Former Chairman, House Armed Services Committee, US Congress

Bee People and the Bugs They Love Frank Mortimer, 2021-03-30 "A successful and funny book that is sure to swell the ranks of the world's beekeepers." —New York Times A fascinating foray into the obsessions, friendships, scientific curiosity, misfortunes and rewards of suburban beekeeping—through the eyes of a Master Beekeeper . . . Who wants to keep bees? And why? For the answers, Master Beekeeper Frank Mortimer invites readers on an eye-opening journey into the secret world of bees, and the singular world of his fellow bee-keepers. There's the Badger, who introduces Frank to the world of bees; Rusty, a one-eyed septuagenarian bee sting therapist certain that honey will be the currency of the future after the governments fail; Scooby the "dude" who gets a meditative high off the awesome vibes of his psychedelia-painted hives; and the Berserker, a honeybee hitman who teaches Frank a rafter-raising lesson in staving off the harmful influences of an evil queen: "Squash her, mash her, kill, kill, kill!" Frank also crosses paths with those he calls the Surgeons (precise and protected), the Cowboys (improvisational and unguarded) and the Poseurs, ex-corporate cogs, YouTube-informed and ill-prepared for the stinging reality of their new lives. In connecting with this club of disparate but kindred spirits, Frank discovers the centuries-old history of the trade; the practicality of maintaining it; what bees see, think, and feel (emotionless but sometimes a little defensive); how they talk to each other and socialize; and what can be done to combat their biggest threats, both human (anti-apiarist extremists) and mite (the Varroa Destructor). With a swarm of offbeat characters and fascinating facts (did that bee just waggle or festoon?), Frank the Bee Man delivers an informative, funny, and galvanizing book about the symbiotic relationship between flower and bee, and bee and the beekeepers who are determined to protect the existence of one of the most beguiling and invaluable creatures on earth. "A very entertaining book." —American Bee Journal "A playful storyteller... A compelling memoir." —Foreword Reviews "A useful how-to guide as well as an affectionate ode to nature's pollinators and honey makers." —Publishers Weekly "This book includes great humor and a use of allegory that reveals tremendous background knowledge." —San Francisco Book Review "Frank's personal stories of his beekeeping journey are entertaining, well written, and will quickly have you happily lost in the world of bees." —Paleo Magazine *Bee People and the Bugs They Love* is the bee's knees and getting a ton of

buzz. Bee smart, people, and read this un-BEE-lievably interesting look at the quirky world of beekeeping. –Harlan Coben, #1 New York Times bestselling author “A delightful portrayal for non-beekeepers of what life is like for those of us who are always thinking about bees.” –Tom Seeley, author of *The Lives of Bees* “A fun and exciting tale of the wonder-filled world of beginner beekeeping.” –Noah Wilson-Rich, author of *Bee: A Natural History*, and CEO and partner The Best Bees Company

WAR NEWS: Blue and Gray in Black and White Brayton Harris, 2010-06-21 WAR NEWS (originally published in 1999 as *Blue & Gray in Black & White*) is an exploration of the individual and collective efforts of newspaper journalists during the Civil War. As eyewitnesses to one of the most memorable conflicts in history, they left a record that is sometimes brilliant but, at other times, marred by shoddy journalism, sensationalism, and self-serving reporting. They were, however, the American public's primary source of information about the battles that were tearing the nation apart. This book focuses on the personalities, politics, and rivalries of editors; the efforts of newspapers to influence military appointments, strategy, and tactics; advances in printing technology; formal and informal censorship, the suppression of dissident newspapers, and, most of all, the war correspondents themselves.

The Indian Paleogene Sunil Bajpai, Satish C. Tripathi, Vandana Prasad, 2018-04-24 This unique book provides a concise account of Indian Paleogene and presents a unified view of the Paleogene sequences of India. The Paleogene, comprising the early part of the Cenozoic Era, was the most dynamic period in the Earth's history with profound changes in the biosphere and geosphere. The period spans ~42 million years, beginning from post-K/T mass extinction event at ~65 Ma and ending at ~23 Ma, when the first Antarctic ice sheet appeared in the Southern Hemisphere. The early Paleogene (Paleocene–Eocene) has been considered a globally warm period, superimposed on which were several transient hyperthermal events of extreme warmth. Of these, the Palaeocene Eocene Thermal Maxima (PETM) boundary interval is the most prominent extreme warming episode, lasting 200 Ka. PETM is characterized by 2–6‰ global negative carbon isotope excursion. The event coincided with

the Benthic Extinction Event (BEE) in deep sea and Larger Foraminifera Turnover (LFT) in shallow seas. Rapid ~60–80 warming of high latitudinal regions led to major faunal and floral turnovers in continental, shallow-marine and deep-marine areas. The emergence and dispersal of mammals with modern characteristics, including Artiodactyls, Perissodactyls and Primates (APP), and the evolution and expansion of tropical vegetation are some of the significant features of the Paleogene warm world. In the Indian subcontinent, the beginning and end of the Paleogene was marked by various events that shaped the various physiographic features of the Indian subcontinent. The subcontinent lay within the equatorial zone during the earliest part of the Paleogene. Carbonaceous shale, coal and lignite deposits of early Eocene age (~55.5–52 Ma) on the western and north-eastern margins of the Indian subcontinent are rich in fossils and provide information on climate as well as the evolution and paleobiogeography of tropical biota. Indian Paleogene deposits in the India–Asia collision zone also provide information pertaining to the paleogeography and timing of collision. Indian Paleogene rocks are exposed in the Himalayan and Arakan mountains; Assam and the shelf basins of Kutch–Saurashtra, Western Rajasthan; Tiruchirappalli–Pondicherry and Andaman and, though aerially limited, these rocks bear geological evidence of immense importance.

Judgment At Istanbul Vahakn N. Dadrian, Taner Akçam, 2011-12-30 Turkey's bid to join the European Union has lent new urgency to the issue of the Armenian Genocide as differing interpretations of the genocide are proving to be a major reason for the delay of the its accession. This book provides vital background information and is a prime source of legal evidence and authentic Turkish eyewitness testimony of the intent and the crime of genocide against

the Armenians. After a long and painstaking effort, the authors, one an Armenian, the other a Turk, generally recognized as the foremost experts on the Armenian Genocide, have prepared a new, authoritative translation and detailed analysis of the Takvim-i Vekâyi, the official Ottoman Government record of the Turkish Military Tribunals concerning the crimes committed against the Armenians during World War I. The authors have compiled the documentation of the trial proceedings for the first time in English and situated them within their historical and legal context. These documents show that Wartime Cabinet ministers, Young Turk party leaders, and a number of others inculpated in these crimes were court-martialed by the Turkish Military Tribunals in the years immediately following World War I. Most were found guilty and received sentences ranging from prison with hard labor to death. In remarkable contrast to Nuremberg, the Turkish Military Tribunals were conducted solely on the basis of existing Ottoman domestic penal codes. This substitution of a national for an international criminal court stands in history as a unique initiative of national self-condemnation. This compilation is significantly enhanced by an extensive analysis of the historical background, political nature and legal implications of the criminal prosecution of the twentieth century's first state-sponsored crime of genocide.
