Student-Centered Coaching Diane Sweeney,2010-11-19 This practical resource is grounded in a simple but powerful premise: that school-based coaching programs can be designed in a way that more directly impacts student achievement. In a student-centered coaching relationship, the focus is on using data and student work to drive conversations between coaches and teachers to make informed decisions about instruction. In other words, coaches and teachers work collaboratively to support students. The book also underscores the critical role of the principal in developing systems and structures to support teacher learning and fostering a culture of learning. The book is suitable for use with both new and experienced coaches and the principals who support them.

Developing and Implementing Promising Practices and Programs for First-Generation College Students Charmaine Troy,Karen Jackson,Ben Pearce,Diana

Rowe,2022-09-26 As first-generation students gain greater access to higher education, faculty, and staff at colleges and universities must provide intentional engagement that supports their persistence and graduation. This book serves as a guidebook for higher education practitioners seeking to implement or enhance first-generation programming at their institutions. The chapters provide detailed descriptions of the development, implementation, and assessment of programs and practices intended to support the success of first-generation college students. Authors share insights on building allies, identifying and working through challenges, and applicable takeaways for implementing similar practices and programs at the reader's own institutions. Programming discussed in the book ranges in funding levels and includes activities such as faculty dinners, study abroad, bridge programs, living learning communities, peer mentoring, intrusive advising, and holistic well-being. This valuable resource helps higher education practitioners better support and position first-generation students for success.

New Realities in the Management of Student Affairs Ashley Tull,Linda Kuk,2023-07-03 Student affairs organizations are at a crossroads. They face expanding enrollments; a concomitant increase need for often more complex services; changing demographics; a growing cohort of non-traditional and first-generation students; shifting and more demanding responsibilities; and increased expectations from the greater campus community, parents, and external constituents. These challenges are intensified by the accelerating speed of advancements in technology, globalization, innovation, and student consumerism; and by the long-term reality of shrinking resources, and limitations on the ability to increase tuition and fees. This book shares alternative ideas about organizational

design, and about ways to restructure roles and responsibilities to enable student affairs organizations to respond to these challenges and demands more effectively at a time of reduced resources. It also addresses the many emerging roles that student affairs organizations are increasingly being expected to address – such as IT, fund raising and development, external communications, human resources management and professional development, as well as research and assessment – and describes approaches developed by a variety of institutions. The contributors also pay attention to the solutions appropriate for smaller institutions, and for community colleges. They explore the various dimensions of change and offer frameworks to help student affairs leaders and practitioners to more effectively understand and manage the changes they are confronting; and describe ideas and solutions adopted by others within the profession.

Off the Clock Fred Bramante, Rose Colby, 2012-03-14 This text provides a comprehensive approach to implementing a large-scale competency-based reform initiative that bases student achievement on mastery rather than “seat time.”

Academic Activism in Higher Education Nuraan Davids, Yusef Waghid, 2021-03-24 This book argues for renewed understandings of academic activism, understandings that conceive of the ideas, arguments and scholarship of the academe as embedded within the practices of what the academy does. It examines why and how a renewed notion of academic activism informs a philosophy of higher education specifically in relation to teaching and learning. The book focuses on the theories and practices of teaching and

learning, in particular how such pedagogical actions are guided by social, political and cultural influences outside of the university as a higher education institution. The authors advocate for a living philosophy of higher education that is commensurate with real actions and imaginary fictions of what constitutes higher education and what remains in becoming for the discourse. With a focus on South African social justice education, the book imagines pathways for academic activism to manifest in revolutionised pedagogical actions or actions that bring into contestation what already exists with the possibility for the cultivation of renewal.

Introduction to the Foundations of American Education James Allen Johnson, 1988

Grading Goal Four Antonia Wulff, 2020-04-14 For the third time in three decades world leaders reaffirmed their promise of Education For All when adopting Sustainable

Development Goal 4 in 2015. It is the most far-reaching commitment to quality and equity in education so far, yet, there is no consensus on what the agenda means in practice. With a decade left until the 2030 deadline, Grading Goal Four calls upon the education community to engage more thoughtfully and critically with SDG 4 and related efforts. As an ever-growing number of actors and initiatives claim to contribute to its achievement, it is becoming clear that the ambitious but broad priorities within the goal are vulnerable to cherry-picking and misrepresentation, placing it at the heart of tensions between instrumentalist and rights-based approaches to education. This text, a critical analysis of SDG 4, provides a framework for examining trends and developments in education globally. As the first volume that examines early implementation efforts under SDG 4, Grading Goal Four formulates a critique along with strategies for moving forward. By scrutinising the challenges, tensions and power dynamics shaping SDG 4, it advances rights-based perspectives and strategies for effective implementation and builds capacity for strengthened monitoring and analysis of the goal.
