Learning Statistics and Excel in Tandem Saroja Selvanathan,E. Antony Selvanathan,2014 Learning Statistics and EXCEL in Tandem shows how to solve most statistical business problems taught in an introductory statistics subject using the Microsoft EXCEL spreadsheet software. The major difference between this book and other EXCEL books is that, before using EXCEL for an application, in this book, we discuss the selection of the appropriate statistical technique required to solve the problem. In other words, the aim of the book is to teach in tandem the appropriate statistical techniques as well as the use of EXCEL to execute them. In this sense, this book may be used as a stand-alone book by managers and analysts who have knowledge in statistics. However, those with no statistics knowledge should use this as a supplement to a statistics textbook. Learning Statistics and EXCEL in Tandem is primarily designed to cater for undergraduate students enrolled in a statistics subject. The book is also useful for postgraduate students as well as managers and analysts in analysing their day-to-day basic statistical problems using EXCEL. This customised eBook has been created with the content you need for your studies. Due to the process used to produce this customised eBook, it doesn't offer the same functionality available in other Cengage eBooks, including read aloud and copy text.
