Windows Server is a multi-purpose server designed to increase reliability and flexibility of a network infrastructure. Windows Server is the paramount tool used by enterprises in their datacenter and desktop strategy. The most recent versions of Windows Server also provide both server and client virtualization. Its ubiquity in the enterprise results in the need for networking professionals who know how to plan, design, implement, operate, and troubleshoot networks relying on Windows Server. Microsoft Learning is preparing the next round of its Windows Server Certification program with exams covering the new version of the software, Windows Server 2012. The exams and certification path change significantly from the previous version of Windows Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand-new software and brand-new certifications.

*F-105 Thunderchief MiG Killers of the Vietnam War* Peter E. Davies,2014-10-20 Despite its 'F-for-fighter' designation, the F-105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed, long range and below-the-radar altitudes. However, when the Vietnam War began it also emerged as USAF's best available tactical bomber for a 'limited conventional' war as well. Extensively targeted by MiG-17s and MiG-21s the F-105 pilots developed innovative tactics that allowed them to compete in air-to-air duels with their smaller, more manoeuvrable enemies. Illustrated throughout with extensive photographs detailing weapon loads, internal features and action shots of actual engagements, this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack, escort fighter and radar monitoring elements within strike formations.
