Exploring Materiality and Connectivity in Anthropology and Beyond Philipp Schorch, Martin Saxer, Marlen Elders, 2020-03-30

Exploring Materiality and Connectivity in Anthropology and Beyond provides a new look at the old anthropological concern with materiality and connectivity. It understands materiality not as defined property of some-thing, nor does it take connectivity as merely a relation between discrete entities. Somewhat akin to Heisenberg's uncertainty principle, it sees materiality and connectivity as two interrelated modes in which an entity is, or more precisely – is becoming, in the world. The question, thus, is how these two modes of becoming relate and fold into each other. Throughout the four-year research process that led to this book, the authors approached this question not just from a theoretical perspective; taking the suggestion of 'thinking through things' literally and methodologically seriously, the first two workshops were dedicated to practical, hands-on exercises working with things. From these workshops a series of installations emerged, straddling the boundaries of art and academia. These installations served as artistic-academic interventions during the final symposium and are featured alongside the other academic contributions to this volume. Throughout this process, two main themes emerged and structure Part II, Movement and Growth, and Part III, Dissolution and Traces, of the present volume, respectively. Part I, Conceptual Grounds, consists of two chapters offering conceptual takes on things and ties – one from anthropology and one from archaeology. As interrelated modes of becoming, materiality and connectivity make it necessary to coalesce things and ties into thing~ties – an insight toward which the chapters and interventions came from different sides, and one in which the initial proposition of the editors still shines through. Throughout the pages of this volume, we invite the reader to travel beyond imaginaries of a universe of separate planets united by connections, and to venture with us instead into the thicket of

thing~ties in which we live.

Queer Beyond London Matt Cook,Alison Oram,2024-11-05

Looking beyond the London-centric narratives of British LGBTQ life, this exciting book explores the queer dimensions of four English cities - Manchester, Leeds, Plymouth and Brighton.

**Queer beyond London** Matt Cook,Alison Oram,2022-06-28

When it comes to queer British history, London has stolen the limelight. But what about the millions of queer lives lived elsewhere? In *Queer beyond London*, two leading LGBTQ+ historians take you on a journey through four English cities from the sixties to the noughties, exploring the northern post-industrial heartlands and taking in the salty air of the seaside cities of the South. Covering the bohemian, artsy world of Brighton, the semi-hidden queer life of military Plymouth, the lesbian activism of Leeds, and the cutting edge dance and drag scenes of Manchester, they show how local people, places and politics shaped LGBTQ+ life in each city, forging vibrant and distinctive queer cultures of their own. Using pioneering community histories from each place, and including the voices of queer people who have made their lives there, the book tells local stories at the heart of our national history.

**Explore Everything** Bradley Garrett, 2014-09-09 It is assumed that every inch of the world has been explored and charted; that there is nowhere new to go. But perhaps it is the everyday places around us—the cities we live in—that need to be rediscovered. What does it feel like to find the city's edge, to explore its forgotten tunnels and scale unfinished skyscrapers high above the metropolis? Explore Everything reclaims the city, recasting it as a place for endless adventure. Plotting expeditions from London, Paris, Berlin, Detroit, Chicago, Las Vegas and Los Angeles, Bradley L. Garrett has evaded urban security in order to experience the city in ways beyond the boundaries of conventional life. He calls it 'place hacking': the recoding of closed, secret, hidden and forgotten urban space to make them realms of opportunity. Explore Everything is an account of the author's escapades with the London Consolidation Crew, an urban exploration collective. The book is also a manifesto, combining

philosophy, politics and adventure, on our rights to the city and how to understand the twenty-first century metropolis.

Exploring Civil Society Marlies Glasius, David Lewis, Hakan Seckinelgin, 2004-08-02 This volume explores how the idea of civil society has been translated in different cultural contexts and examines its impact on politics worldwide. Comparing and contrasting civil society in Latin America and Eastern Europe, Western Europe and the United States, Africa and South Asia, and the Middle East, the contributors show that there are multiple interpretations of the concept that depend more on the particular political configuration in different parts of the world than on cultural predilections. They also demonstrate that the power of civil society depends less on abstract definitions, and more on the extent to which it is grounded in the context of actual experiences from around the world. This book includes some of the biggest names in the area such as Mary Kaldor, Ronnie Lipschutz and Helmut Anheier.

illustrated with drawings of all Woolf's homes, and walking route maps.

*Oil Exploration, Diplomacy, and Security in the Early Cold War* Roberto Cantoni,2017-03-27 The importance of oil for national military-industrial complexes appeared more clearly than ever in the Cold War. This volume argues that the confidential acquisition of geoscientific knowledge was paramount for states, not only to provide for their own energy needs, but also to buttress national economic and geostrategic interests and protect energy security. By investigating the postwar rebuilding and expansion of French and Italian oil industries from the second half of the 1940s to the early 1960s, this book shows how successive administrations in those countries devised strategies of oil exploration and transport, aiming at achieving a higher degree of energy autonomy and setting up powerful oil agencies that could implement those strategies. However, both within and outside their national territories, these two European countries had to confront the new Cold War balances and the interests of the two superpowers.
