### Windows 10 May 2019 Update: The Missing Manual

David Pogue, 2019-05-10 The Windows 10 May 2019 Update adds a host of new and improved features to Microsoft's flagship operating system—and this jargon-free guide helps you get the most out of every component. This in-depth Missing Manual covers the entire system and introduces you to the latest features in the Windows Professional, Enterprise, Education, and Home editions. You'll learn how to take advantage of improvements to the Game Bar, Edge browser, Windows Online, smartphone features, and a lot more. Written by David Pogue—tech critic for Yahoo Finance and former columnist for The New York Times—this updated edition illuminates its subject with technical insight, plenty of wit, and hardnosed objectivity.

The Aisles Have Eyes Joseph Turow, 2017-01-17 The author of Media Today offers “a trenchant, timely, and troubling account of [retailers'] data-mining, in-store tracking, and predictive analytics” (The Philadelphia Inquirer). By one expert's prediction, within twenty years half of Americans will have body implants that tell retailers how they feel about specific products as they browse their local stores. The notion may be outlandish, but it reflects executives' drive to understand shoppers in the aisles with the same obsessive detail that they track us online. In fact, a hidden surveillance revolution is already taking place inside brick-and-mortar stores, where Americans still do most of their buying. Drawing on his interviews with retail executives, analysis of trade publications, and experiences at insider

industry meetings, advertising and digital studies expert Joseph Turow pulls back the curtain on these trends, showing how a new hyper-competitive generation of merchants—including Macy's, Target, and Walmart—is already using data mining, in-store tracking, and predictive analytics to change the way we buy, undermine our privacy, and define our reputations. Eye-opening and timely, Turow's book is essential reading to understand the future of shopping. "Turow shows shopping today to be an exercise in unwitting self-revelation—and not only online."—The Wall Street Journal "Thoroughly researched and clearly presented with detailed evidence and fascinating peeks inside the retail industry. Much of this information is startling and even chilling, particularly when Turow shows how retail data-tracking can enable discrimination and societal stratification."—Publishers Weekly "Revealing . . . Valuable reading for shoppers and retailers alike."—Kirkus Reviews

*The Clarity* Keith Thomas, 2019-03-26 For fans of *Black Mirror* and *True Detective*, a visceral, high-concept thriller about a psychologist who must protect the life of an eleven-year-old girl whose ability to remember past lives makes them both targets of a ruthless assassin. Dr. Matilda Deacon is a psychologist researching how memories are made and stored when she meets a strange eleven-year-old girl named Ashanique. The girl claims to harbor the memories of the last soldier killed in World War I and Matilda is skeptical. But when Ashanique starts talking about being chased by the Night Doctors—a term also used by an unstable patient who was later found dead—Matilda can't deny that the girl might be telling the truth. Matilda soon learns that Ashanique and her mother have been on the run their whole lives from a monstrous assassin named Rade. Rade is seeking a certain component ingrained solely in memories, and has left a bloody trail throughout the world. Matilda realizes that Ashanique is in unimaginable danger and that her unique ability comes with a deadly price. "A taut, riveting thriller, a perfect balance of scientific speculation and storytelling" (James Rollins, New York Times bestselling author), *The Clarity* is a compelling take on the possibilities of reincarnation and life after death.

### The Fall of the Scientists Marty

Anderson,2014-03-25 In the future, mankind has moved on. Earth has been used up and abandoned. Colony ships were sent out to the far reaches of space. The human race encountered new worlds and new beings. Inevitably they also brought war with them. In this time, mankind developed at different technological rates on many different worlds. Some worlds kept to the old ways and others strove to get back to the technological age. All the wars that ensued destroyed just as much technology as it created. Just as knowledge was lost as much as it was gained. A group of scientists saw the human race heading for destruction and acted to do something about it. They came to the conclusion that the human race was still only a child, and a child needs to be told what to do. The wars had built many armies. So the scientists offered their services to one of the larger armies and with their new technology, the army won out over all others. However, as with children, once they have tasted candy they always want more. The scientists were raised to positions of high power within the new military and before long they had taken control. But they only had control over the military and not the whole human race but they would stop at nothing to get it. Brad and his rag tag team are the only ones who can stop them.
