Reading Clocks, Alla Turca Avner Wishnitzer, 2015-07-07 Up until the end of the eighteenth century, the way Ottomans used their clocks conformed to the inner logic of their own temporal culture. However, this began to change rather dramatically during the nineteenth century, as the Ottoman Empire was increasingly assimilated into the European-dominated global economy and the project of modern state building began to gather momentum. In *Reading Clocks*, Alla Turca, Avner Wishnitzer unravels the complexity of Ottoman temporal culture and for the first time tells the story of its transformation. He explains that in their attempt to attain better surveillance capabilities and higher levels of regularity and efficiency, various organs of the reforming Ottoman state developed elaborate temporal constructs in which clocks played an increasingly important role. As the reform movement spread beyond the government apparatus, emerging groups of officers, bureaucrats, and urban professionals incorporated novel time-related ideas, values, and behaviors into their self-consciously "modern" outlook and lifestyle. Acculturated in the highly regimented environment of schools and barracks, they came to identify efficiency and temporal regularity with progress and the former temporal patterns with the old political order. Drawing on a wealth of archival and literary sources, Wishnitzer's original and highly important work presents the shifting culture of time as an arena in which Ottoman social groups competed for legitimacy and a medium through which the very

concept of modernity was defined. Reading Clocks, Alla Turca breaks new ground in the study of the Middle East and presents us with a new understanding of the relationship between time and modernity.

A Terrible Thing to Waste Harriet A. Washington,2019-07-23 A powerful and indispensable look at the devastating consequences of environmental racism (Gerald Markowitz) -- and what we can do to remedy its toxic effects on marginalized communities. Did you know... Middle-class African American households with incomes between \$50,000 and \$60,000 live in neighborhoods that are more polluted than those of very poor white households with incomes below \$10,000. When swallowed, a lead-paint chip no larger than a fingernail can send a toddler into a coma -- one-tenth of that amount will lower his IQ. Nearly two of every five African American homes in Baltimore are plagued by lead-based paint. Almost all of the 37,500 Baltimore children who suffered lead poisoning between 2003 and 2015 were African American. From injuries caused by lead poisoning to the devastating effects of atmospheric pollution, infectious disease, and industrial waste, Americans of color are harmed by environmental hazards in staggeringly disproportionate numbers. This systemic onslaught of toxic exposure and institutional negligence causes irreparable physical harm to millions of people across the country-cutting lives tragically short and needlessly burdening our health care system. But these

deadly environments create another insidious and often overlooked consequence: robbing communities of color, and America as a whole, of intellectual power. The 1994 publication of *The Bell Curve* and its controversial thesis catapulted the topic of genetic racial differences in IQ to the forefront of a renewed and heated debate. Now, in *A Terrible Thing to Waste*, award-winning science writer Harriet A. Washington adds her incisive analysis to the fray, arguing that IQ is a biased and flawed metric, but that it is useful for tracking cognitive damage. She takes apart the spurious notion of intelligence as an inherited trait, using copious data that instead point to a different cause of the reported African American-white IQ gap: environmental racism - a confluence of racism and other institutional factors that relegate marginalized communities to living and working near sites of toxic waste, pollution, and insufficient sanitation services. She investigates heavy metals, neurotoxins, deficient prenatal care, bad nutrition, and even pathogens as chief agents influencing intelligence to explain why communities of color are disproportionately affected -- and what can be done to remedy this devastating problem. Featuring extensive scientific research and Washington's sharp, lively reporting, *A Terrible Thing to Waste* is sure to outrage, transform the conversation, and inspire debate.

Essentials of The Islamic Faith M. Fethullah Gülen, 2006-04-01 *Essentials of the Islamic Faith* is a selection from some of the speeches M. Fethullah Glen

has given to large audiences over a life-time of dedicated service. In these speeches, he explains the principal elements of Islamic belief - belief in the existence and Unity of God; in Resurrection and the Day of Judgment; in Divine Scriptures and other familiar themes of Islamic discourse. What is special and unique about the presentation of them in this book is that the author is constantly aware of the encroachment (and the seductive appeal) of cultural attitudes which are hostile not to Islam only but to any religious and contemplative way of life.

Training Guide for Islamic Workers Hisham Altalib, 2001-01-01 Now more than ever before, Muslim young men and women need to improve not only their personal skills but also their group performance. This Guide presents easy-to-follow instructions which can be used by those who desire to acquire these skills. This Guide focuses on the training needs of Muslim young men and women by providing the experience acquired by Muslim leaders over the last several decades. Thus, the new generation of leaders will be able to start from where their leaders left off, rather than having to duplicate their predecessors' successes and/or failures. Using a simple Do's and Don't's format, this Guide enables the user to optimize his/her understanding of the art and science of da'wah and how it can be applied in today's world. Like genius, leadership entails harder work for the one who was born without this skill. It is to such people that this Guide is addressed. We are confident that, with the help of Allah, the user will be able to make a quantum leap

forward in the areas of growth and improvement through the proper use of the methods outlined in this Guide. Over time, there will be noticeable improvements in the areas of concepts, management, administration, and communication as well as the skills needed for conducting camps, conferences, and meetings. This Guide is supplemented by suggested workbooks which will lead to an even deeper understanding of the skills needed for successful leaders.

Electron Microprobe Analysis and Scanning Electron Microscopy in Geology S. J. B. Reed, 2005-08-25 Originally published in 2005, this book covers the closely related techniques of electron microprobe analysis (EMPA) and scanning electron microscopy (SEM) specifically from a geological viewpoint. Topics discussed include: principles of electron-target interactions, electron beam instrumentation, X-ray spectrometry, general principles of SEM image formation, production of X-ray 'maps' showing elemental distributions, procedures for qualitative and quantitative X-ray analysis (both energy-dispersive and wavelength-dispersive), the use of both 'true' electron microprobes and SEMs fitted with X-ray spectrometers, and practical matters such as sample preparation and treatment of results. Throughout, there is an emphasis on geological aspects not mentioned in similar books aimed at a more general readership. The book avoids unnecessary technical detail in order to be easily accessible, and forms a comprehensive text on EMPA and SEM for

geological postgraduate and postdoctoral researchers, as well as those working in industrial laboratories.

Translation of the Holy Quran in English Maulana Muhammad Ali, 2013-12-25
The Quran, literally meaning the recitation, also romanised (Koran) is the central religious text of Islam, which Muslims believe to be a revelation from God (Arabic: Allah). It is widely regarded as the finest piece of literature in the Arabic language. Muslims consider the Quran to be the only book that has been protected by God from distortion or corruption. Quranic chapters are called suras and verses are called ayahs. Muslims believe that the Quran was verbally revealed from God to Muhammad through the angel Gabriel (Jibril), gradually over a period of approximately 23 years, beginning on 22 December 609 CE, when Muhammad (Peace be upon Him) was 40, and concluding in 632 CE, the year of his death. Shortly after Muhammad's death, the Quran was collected by his companions using written Quranic materials and everything that had been memorized of the Quran. Muslims regard the Quran as the most important miracle of Muhammad, the proof of his prophethood and the culmination of a series of divine messages that started with the messages revealed to Adam and ended with Muhammad. The Quran assumes familiarity with major narratives recounted in the Jewish and Christian scriptures. It summarizes some, dwells at length on others and, in some cases, presents alternative accounts and interpretations of events. The Quran describes itself as a book of guidance. It sometimes offers detailed accounts

of specific historical events, and it often emphasizes the moral significance of an event over its narrative sequence. The Quran is used along with the hadith to interpret sharia law. During prayers, the Quran is recited only in Arabic. Someone who has memorized the entire Quran is called a hafiz. Some Muslims read Quranic ayahs (verses) with elocution, which is often called tajweed. During the month of Ramadan, Muslims typically complete the recitation of the whole Quran during tarawih prayers. Inimitability of the Quran (or I'jaz) is the belief that no human speech can match the Quran in its content and form. The Quran is considered an inimitable miracle by Muslims, effective until the Day of Resurrection-and, thereby, the central proof granted to Muhammad in authentication of his prophetic status. The concept of inimitability originates in the Quran where in five different verses challenges opponents to produce something like the Quran: If men and sprites banded together to produce the like of this Quran they would never produce its like not though they backed one another (17:88). So the suggestion is that if there are doubts concerning the divine authorship of the Quran come forward and create something like it. From the ninth century, numerous works appeared which studied the Quran and examined its style and content. Medieval Muslim scholars including al-Jurjani (d. 1078CE) and al-Baqillani (d. 1013CE) have written treatises on the subject, discussed its various aspects, and used linguistic approaches to study the Quran. Others argue that the Quran contains noble ideas, has inner meanings, maintained its

freshness through the ages and has caused great transformations in individual level and in the history. Some scholars state that the Quran contains scientific information that agrees with modern science. The doctrine of miraculousness of the Quran is further emphasized by Muhammad's illiteracy since the unlettered prophet could not have been suspected of composing the Quran.

Nation-Building in Modern Turkey Alexandros Lamprou, 2015-01-28 From 1924 to 1946 the Republic of Turkey was in effect ruled as an authoritarian single-party regime. During these years the state embarked upon an extensive reform programme of modernisation and nation-building. Alexandros Lamprou here offers an alternative understanding of social change and state-society relations in Turkey, shifting the focus from the state as the prime instigator of change to the population's participation in the process of reform. Through the study of the 'People's Houses', the community centres opened and operated by the Republican People's Party in most cities and towns of Turkey, and using previously unpublished archival material, Lamprou analyses how ordinary people experienced, negotiated and resisted the reforms in the 1930s and 1940s and how this process contributed to the shaping of social identities. This book will be essential reading for students and scholars of nation-building, socio-cultural change and state-society relations in modern Turkey.

Tanpınar's Five Cities Ahmed Hamdi Tanpınar, 2018-11-15 Ahmet Hamdi Tanpınar's 'Five Cities' was first published in Turkish as 'Beş Şehir' in 1946 and revised in 1960. It consists of five essays, each focused on a city significant in Anatolian history and in Tanpınar's emotional life. Part history, part autobiography, part poetic meditation on time and memory, 'Five Cities' is Proustian in style, with a tension between a backward-looking melancholy and a concern for the unpredictable future of the author's country. Comparable to Nobel Laureate Orhan Pamuk's 'Istanbul: Memories of a City', 'Five Cities' emphasizes personal attitudes and reactions but has a wider scope of geography, history and culture.
