Gated Communities and the Digital Polis Kon Kim, Heewon Chung, 2023-03-04 This edited collection provides an alternative discourse on cities evolving with physically and virtually networked communities—the ‘digital polis’—and offers a variety of perspectives from the humanities, media studies, geography, architecture, and urban studies. As an emergent concept that encompasses research and practice, the digital polis is oriented toward a counter-mapping of the digital cityscape beyond policing and gatekeeping in physical and virtual gated communities. Considering the digital polis as offering potential for active support of socially just and politically inclusive urban circumstances in ways that mirror the Greek polis, our attention is drawn towards the interweaving of the development of digital technology, urban space, and social dynamics. The four parts of this book address the formation of technosocial subjectivity, real-and-virtual combined urbanity, the spatial dimensions of digital exclusion and inclusion, and the prospect of emancipatory and empowering digital citizens. Individual chapters cover varied topics on digital feminism, data activism, networked individualism, digital commons, real-virtual communalism, the post-family imagination, digital fortress cities, rights to the smart city, online foodscapes, and open-source urbanism across the globe. Contributors explore the following questions: what developments can be found over recent decades in both physical and virtual communities such as cyberspace, and what will our urban future be like? What is the ‘digital polis’ and what kinds of new subjectivity does it produce? How does digital technology, as well as its virtuality, reshape the city and our spatial awareness of it? What kinds of exclusion and cooperation are at work in communities and spaces in the digital age? Each chapter responds to these questions in its own way, navigating readers through routes toward the digital polis. Chapter Introduction – The digital polis and its practices: Beyond gated communities is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Dynamics of Water Surface Flows and Waves Yasunori Watanabe, 2022-11-11 Dynamics of Water Surface Flows and Waves provides theoretical descriptions of the whole life of water surface waves through their birth, propagation, evolution and finally breaking. While initial capillary waves are created via instability at air-water interfaces, potential wave theories adequately describe interactions of waves with current, bathymetry and structure. In the final breaking stage, potential fluid motions in the waves rapidly evolve into vortical turbulent flows that disturb the surfaces, resulting in entrainment of air-bubbles and ejection of sea spray in bursting bubbles floating on the surface. All theories and analytical methods required to understand the series of wave processes, over diverse areas of subjects, including turbulence, diffusion, vortex and capillary dynamics, shallow water approach, and stability analysis, as well as the conventional potential wave theory, are comprehensively covered in this book. All of the mathematical formulas are consistently developed from theorems and linked with physics, which provides theoretical understanding and further interest in wave dynamics. This is an ideal graduate-level textbook or reference for engineers and researchers in the fields of fluid and wave mechanics, coastal and ocean engineering.

Renewable Energy, Technology and the Environment A. A. M. Sayigh, 2012-12-02 Renewable Energy: Technology and the Environment comprises 106 chapters, with the first focusing on integrated resource planning. The following chapters delve into such topics as electricity from geothermal energy; wave energy prospects and prototypes; renewable energy policies for the nineties and beyond; and renewable energy technologies in developing countries. These topics are followed by discussions on harnessing the tax system to benefit alternative energy; energy-meteorology; development energy and environment; solar energy education; solar hydrogen; sky brightness during twilight; and solar instrumentation used in meteorology. Other chapters cover self-acting system tracking for pyrheliometers; directly coupled turbine-induction generator systems for low-cost micro-hydro power; and the utilization of genetic algorithm for the optimal design of a pneumatic hydro-power device. The remaining chapters present field experiments of a wave power converter with caisson breakwater; technical potentials of renewable energies; and air pollution modification due to energy supply diversification. This book will be of interest to practitioners in the fields of meteorology and environmental studies.

Amor amicitiae: On the Love that is Friendship Maarten G. Kossmann, 1997 Ce livre contient une description synchronique du berbère de Figuig (Maroc oriental). Le berbère de Figuig fait partie du groupe de dialectes appelle les parlers des kcour du Sud-Oranais. Il s'agit de dialectes parles par la population sedentaire des regions arides et semi-arides de l'Algerie occidentale et de la region la plus orientale du Maroc. Figuig est une grande oasis au bord du desert. Elle compte approximativement 17.000 habitants. Elle consiste en sept villages (kcour) ou plusieurs dialectes berberes sont parles. Le livre est la premiere grammaire d'un dialecte des parlers des kcour du Sud-Oranais publiee. La description ne suit pas une theorie linguistique specifique, mais s'insert dans la tradition structuraliste. Le livre comporte les parties suivantes: phonologie, morphologie, syntaxe, syntaxe de la phrase, syntaxe de l'enonce. La partie grammaticale est suivie de deux appendices. Le premier contient trois textes expliques sur l'irrigation. Le deuxieme appendice consiste en un vocabulaire berbère-français. Le livre est base sur des materiaux recueillis a Figuig par l'auteur pendant son travail de terrain.

The Mango Opera Tom Corcoran, 2014-01-07 Although he prefers magazine work, freelance photographer Alex Rutledge won't turn down an occasional crime scene shoot for the City of Key West Police Department. But when a string of murders takes his viewfinder into strangely familiar territory, Alex's mellow island lifestyle shatters. One after another, someone is killing women who have intimately crossed Alex Rutledge's path. Maybe it's a coincidence. Maybe it's a conspiracy. Or maybe he's crazy. But the connection marks Alex as the prime suspect in a case so hot it's drawn in the county sheriff, the FBI, and the Bureau of Alcohol, Tobacco, and Firearms. In a desperate race to save his name and his life, Alex dives into a one-man search for the dark, sweltering truth beneath a case that's pounding toward meltdown, in *The Mango Opera* by Tom Corcoran.
