These days everyone wants to write a book. They want to share their experiences with others. Teachers want to share their knowledge with their students by writing books. Writing a book is easily said than done. It needs lots of patience, time, planning, command of language etc. This book has been authored with all those budding authors in mind. It candidly reveals the tools needed to author a book. Lists out various online resources that can be made use of while authoring a book. Special emphasis on the use of open source soft ware tools is the feature of this book. The author even covers a topic on e book cover creation using Power point. Common traps and pit falls the author should guard against has been clearly stated. Special emphasis is on self publishing the author's work. In this Internet age the aspiring author need not go knocking at the doors of publishers, but can publish on their own sitting within the comfort zones of their homes using their laptops and Internet connection. One chapter has been devoted to publishing e book for kindle. Use of soft ware to convert e book from one format to the other is also explained in a detailed manner. Various e book formats that can be used for publishing are also enumerated in detail. This book is so easy that even a novice can jump into writing books after reading through the chapters. Search for publisher to publish the authored book is an arduous and daunting task. Currently a large number of authors prefer to self publish their work. Publishing

aspects of the authored book are also covered in this book with special emphasis on self publishing. Self publishing in traditional terms means that the author has published his work himself without the involvement of established publishing house. With the advent of online publishing portal i.e Amazon this difference between self publishing and publisher taking up the task of publishing is getting rather blurred. This book really helps a novice to get started with authoring an e book and complete it also.
