Viral Loads Lenore Manderson, Nancy J. Burke, Ayo Wahlberg, 2021-09-20 Drawing upon the empirical scholarship and research expertise of contributors from all settled continents and from diverse life settings and economies, *Viral Loads* illustrates how the COVID-19 pandemic, and responses to it, lay bare and load onto people's lived realities in countries around the world. A crosscutting theme pertains to how social unevenness and gross economic disparities are shaping global and local responses to the pandemic, and illustrate the effects of both the virus and efforts to contain it in ways that amplify these inequalities. At the same time, the contributions highlight the nature of contemporary social life, including virtual communication, the nature of communities, neoliberalism and contemporary political economies, and the shifting nature of nation states and the role of government. Over half of the world's population has been affected by restrictions of movement, with physical distancing requirements and self-isolation recommendations impacting profoundly on everyday life but also on the economy, resulting also, in turn, with dramatic shifts in the economy and in mass unemployment. By reflecting on how the pandemic has interrupted daily lives, state infrastructures and healthcare systems, the contributing authors in this volume mobilise anthropological theories and concepts to locate the pandemic in a highly connected and exceedingly unequal world. The book is ambitious in its scope - spanning the entire globe - and daring in its insistence that medical

anthropology must be a part of the growing calls to build a new world.

Mobile Messaging and Resourcefulness Caroline Tagg, Agnieszka Lyons, 2022-03-23 This book advocates a new post-digital linguistic ethnography approach to unpacking mobile communication and enabling a more informed understanding of individuals' communicative practices in cities today. Drawing on data from a group of ordinary working people, multilingual individuals from superdiverse cities across the United Kingdom, the volume brings observations from this data together to form a new concept of 'resourcefulness' as a means of explaining the emergent sense of agency individuals develop towards remediating existing forms of technology in their everyday lives. The book in turn establishes the notion of the 'networked individual' by way of demonstrating the ways in which communicative practices cross spaces and platforms. Further chapters detail examples to highlight resourcefulness at work in enabling more efficient business communication, routes to self-expression and the creation and development of social support systems, while a concluding chapter looks at both the limitations and possibilities of resourcefulness and directions for future research. This innovative volume will be of particular interest to students and researchers in applied linguistics, sociolinguistics, linguistic ethnography, and media and communication studies.

JESUS AND CHRIS Frank Koumantaris, 2023-05-30 Jesus Christ sends a text to the cellphone of Christopher Immanuel, a thirty-eight-year-old gay architect living in New York City. After some back and forth, Christopher realizes it's really from Jesus, and they embark on many cellphone calls discussing the state of America today, Facebook,

the Kardashians, coronavirus, wars, music, Hollywood, the Gospels, pain, death, modern psychoanalysis, ancient Greece, the Jews, the Old Testament, narcissism, abortion in America, the news media, materialism, the White House, addiction today, and the order of life in general. Jesus explains in detail what happened to him two thousand years ago and why he has decided, steadfastly, to never return to Earth. He invites Christopher to take his place as the next Messiah. Christopher balks at first, but Jesus explains how God and the Virgin Mary have also agreed that Christopher should succeed Jesus as the living Messiah in the year 2022. They have been following Christopher (who was raised Greek Orthodox) ever since he was a little boy, and he is the only person they trust with the gifts and abilities of a real living Messiah. Christopher finally accepts the position, and Jesus continues to groom him in several long calls for his role (and career change) from architect to the Son of Man.

from platforms such as Instagram, Facebook, YouTube and Twitter. Innovative yet accessible, it is catnip for all 'hoomans' interested in how language is used online.

Not with a Bug, But with a Sticker Ram Shankar Siva Kumar, Hyrum Anderson, 2023-03-31 A robust and engaging account of the single greatest threat faced by AI and ML systems In Not With A Bug, But With A Sticker: Attacks on Machine Learning Systems and What To Do About Them, a team of distinguished adversarial machine learning researchers deliver a riveting account of the most significant risk to currently deployed artificial intelligence systems: cybersecurity threats. The authors take you on a sweeping tour - from inside secretive government organizations to academic workshops at ski chalets to Google's cafeteria - recounting how major AI systems remain vulnerable to the exploits of bad actors of all stripes. Based on hundreds of interviews of academic researchers, policy makers, business leaders and national security experts, the authors compile the complex science of attacking AI systems with color and flourish and provide a front row seat to those who championed this change. Grounded in real world examples of previous attacks, you will learn how adversaries can upend the reliability of otherwise robust AI systems with straightforward exploits. The steeplechase to solve this problem has already begun: Nations and organizations are aware that securing AI systems brings forth an indomitable advantage: the prize is not just to keep AI systems safe but also the ability to disrupt the competition's AI systems. An essential and eye-opening resource for machine learning and software engineers, policy makers and business leaders involved with artificial intelligence, and academics studying topics including cybersecurity and computer science, Not With A Bug, But With A Sticker is a warning-albeit an entertaining and

engaging one—we should all heed. How we secure our AI systems will define the next decade. The stakes have never been higher, and public attention and debate on the issue has never been scarcer. The authors are donating the proceeds from this book to two charities: Black in AI and Bountiful Children's Foundation.
