Primary Prevention Works George W. Albee, Thomas P. Gullotta, 1996-12-11 I commend this book to you and urge you not only to read about the excellent programs contained herein but also to work to bring these and other high quality prevention programs into your community. Share this information with your elected officials, business leaders, parent groups, and anyone who holds a stake in your community's well-being. With so many pressing problems confronting children and families in America, we must act now to begin to reduce the tragedy of needlessly wasted lives. --from the Preface by Rosalynn Carter Although mental disorders cost our nation \$72.7 billion each year in treatment, related support, and lost productivity, the funding for prevention of mental disorders has been inconsistent, due in some part to a lack of confidence regarding the effectiveness of specific prevention programs. This book highlights some of the most effective prevention programs in the United States and offers readers a common set of principles to reduce maladaptive behavior in ourselves, our children, and society. Divided into five parts, the book begins with an overview of prevention history in this country and next shows ways to operationalize George W. Albee's incidence formula. Part 2 focuses on successful programs that increase parent-child interaction and parenting ability. Part 3 explores preschool programs, some of which use parents as teachers, others of which describe quality child care programming and programs that develop problem-solving abilities in early childhood. Part

4 examines school-age programs ranging from interventions in school settings to developing social competency and job readiness. And, Part 5 focuses on prevention interventions in adulthood, specifically unemployment and depression. With contributions from the leading researchers in the prevention field, this book provides readers with the best information available about effective prevention programs and the knowledge to develop these preventive services at both state and local community levels. Primary Prevention Works will be of interest to policymakers and to researchers and practitioners in developmental psychology, clinical psychology, family studies, social work, counseling, human services, nursing, and public health.

The Renaissance Nude Thomas Kren, Jill Burke, Stephen J. Campbell, 2018-11-20
A gloriously illustrated examination of the origins and development of the nude as an artistic subject in Renaissance Europe Reflecting an era when Europe looked to both the classical past and a global future, this volume explores the emergence and acceptance of the nude as an artistic subject. It engages with the numerous and complex connotations of the human body in more than 250 artworks by the greatest masters of the Renaissance. Paintings, sculptures, prints, drawings, illuminated manuscripts, and book illustrations reveal private, sometimes shocking, preoccupations as well as surprising public beliefs—the Age of Humanism from an entirely new perspective. This book presents works by Albrecht Dürer, Lucas Cranach, and Martin Schongauer in the north and Donatello, Raphael, and Giorgione in the south; it also

introduces names that deserve to be known better. A publication this rich in scholarship could only be produced by a variety of expert scholars; the sixteen contributors are preeminent in their fields and wide-ranging in their knowledge and curiosity. The structure of the volume—essays alternating with shorter texts on individual artworks—permits studies both broad and granular. From the religious to the magical and the poetic to the erotic, encompassing male and female, infancy, youth, and old age, *The Renaissance Nude* examines in a profound way what it is to be human.

Nanomedicine for Drug Delivery and Therapeutics Ajay Kumar

Mishra, 2013-02-01 This book describes a broad area of nanomedicine which involves mainly applications, diseases, and diagnostics. The comprehensive coverage provides researchers, academics, and health specialists with a great tool, that includes techniques applicable to various uses.

Fascist Spectacle Simonetta Falasca-Zamponi, 2000-08-31 An excellent and timely book. The idea of studying Italian fascism as a 'society of the spectacle' that used symbols, rituals, and a cult of the leader to create itself as it unfolded is a brilliant stroke.—Walter L. Adamson, author of *Avant-Garde Florence: From Modernism to Fascism*

Cities of God Augustine Thompson, 2010-11-01 When religion is considered, the subjects are usually saints, heretics, theologians, and religious leaders, thereby ignoring the vast majority of those who lived in the communes. Drawing on many ecclesiastical and secular sources, this book aims

to give a voice to the majority - orthodox lay people and those who ministered to them.

The Phantom Image Patrick R. Crowley, 2019-12-10 Drawing from a rich corpus of art works, including sarcophagi, tomb paintings, and floor mosaics, Patrick R. Crowley investigates how something as insubstantial as a ghost could be made visible through the material grit of stone and paint. In this fresh and wide-ranging study, he uses the figure of the ghost to offer a new understanding of the status of the image in Roman art and visual culture. Tracing the shifting practices and debates in antiquity about the nature of vision and representation, Crowley shows how images of ghosts make visible structures of beholding and strategies of depiction. Yet the figure of the ghost simultaneously contributes to a broader conceptual history that accounts for how modalities of belief emerged and developed in antiquity. Neither illustrations of ancient beliefs in ghosts nor depictions of afterlife, these images show us something about the visual event of seeing itself. *The Phantom Image* offers essential insight into ancient art, visual culture, and the history of the image.

Transmission Electron Microscopy C. Barry Carter, David B. Williams, 2016-08-24 This text is a companion volume to *Transmission Electron Microscopy: A Textbook for Materials Science* by Williams and Carter. The aim is to extend the discussion of certain topics that are either rapidly changing at this time or that would benefit from more detailed discussion

than space allowed in the primary text. World-renowned researchers have contributed chapters in their area of expertise, and the editors have carefully prepared these chapters to provide a uniform tone and treatment for this exciting material. The book features an unparalleled collection of color figures showcasing the quality and variety of chemical data that can be obtained from today's instruments, as well as key pitfalls to avoid. As with the previous TEM text, each chapter contains two sets of questions, one for self assessment and a second more suitable for homework assignments. Throughout the book, the style follows that of Williams & Carter even when the subject matter becomes challenging—the aim is always to make the topic understandable by first-year graduate students and others who are working in the field of Materials Science. Topics covered include sources, in-situ experiments, electron diffraction, Digital Micrograph, waves and holography, focal-series reconstruction and direct methods, STEM and tomography, energy-filtered TEM (EFTEM) imaging, and spectrum imaging. The range and depth of material makes this companion volume essential reading for the budding microscopist and a key reference for practicing researchers using these and related techniques.

Combined Liver-kidney Transplantation Martin Erlichman,1995

Oxford Textbook of Transplant Anaesthesia and Critical Care Ernesto A. Pretto, Gianni Biancofiore, Andre DeWolf, Claus Niemann, John R. Klinck, Peter D. Slinger, 2015 Saving lives through organ transplantation has become increasingly possible thanks to advances in research and care. Today, the complex field of transplantation continues to develop rapidly, fuelled by demographic change and further evolutions in scientific understanding. The Oxford Textbook of Transplant Anaesthesia and Critical Care has been written and edited by pioneers in the field of organ transplantation with an international team of authors, in order to equip anaesthetists and intensivists with the knowledge and training necessary to provide high quality and evidence-based care. The text addresses fundamental aspects of scientific knowledge, care of the donor patient, transplant ethics and special considerations. Dedicated sections address each of the major organs; kidney, pancreas, liver, heart and lung, intestinal and multivisceral. Within each organ-based section, expert authors explore underlying disease, planning for transplantation, specialized procedures, perioperative and critical care management as well as post-transplant considerations. Focus points for future developments in transplant immunology are also set out, inspiring current practitioners to engage with current clinical research and help participate in the further advancement of the science of transplantation. The print edition of the Oxford Textbook of Transplant Anaesthesia and Critical Care

comes with a year's access to the online version on Oxford Medicine Online. By activating your unique access code, you can read and annotate the full text online, follow links from the references to primary research materials, and view, enlarge and download all the figures and tables.

Sepsis Management in Resource-limited Settings Arjen M. Dondorp, Martin W. Dünser, Marcus J. Schultz, 2019-02-08 This book is open access under a CC BY 4.0 license. It constitutes a unique source of knowledge and guidance for all healthcare workers who care for patients with sepsis and septic shock in resource-limited settings. More than eighty percent of the worldwide deaths related to sepsis occur in resource-limited settings in low and middle-income countries. Current international sepsis guidelines cannot be implemented without adaptations towards these settings, mainly because of the difference in local resources and a different spectrum of infectious diseases causing sepsis. This prompted members of the Global Intensive Care working group of the European Society of Intensive Care Medicine (ESICM) and the Mahidol-Oxford Tropical Medicine Research Unit (MORU, Bangkok, Thailand) - among which the Editors – to develop with an international group of experts a comprehensive set of recommendations for the management of sepsis in resource-limited settings. Recommendations are based on both current scientific evidence and clinical experience of clinicians working in resource-limited settings. The book includes an overview chapter outlining the current challenges and future directions of sepsis management as well as

general recommendations on the structure and organization of intensive care services in resource-limited settings. Specific recommendations on the recognition and management of patients with sepsis and septic shock in these settings are grouped into seven chapters. The book provides evidence-based practical guidance for doctors in low and middle income countries treating patients with sepsis, and highlights areas for further research and discussion.

Abandoned Children of the Italian Renaissance Nicholas Terpstra, 2020-04-07
In the early development of the modern Italian state, individual orphanages were a reflection of the intertwining of politics and charity. Nearly half of the children who lived in the cities of the late Italian Renaissance were under fifteen years of age. Grinding poverty, unstable families, and the death of a parent could make caring for these young children a burden. Many were abandoned, others orphaned. At a time when political rulers fashioned themselves as the fathers of society, these cast-off children presented a very immediate challenge and opportunity. In Bologna and Florence, government and private institutions pioneered orphanages to care for the growing number of homeless children. Nicholas Terpstra discusses the founding and management of these institutions, the procedures for placing children into them, the children's daily routine and education, and finally their departure from these homes. He explores the role of the city-state and considers why Bologna and Florence took different paths in operating the orphanages. Terpstra finds

that Bologna's orphanages were better run, looked after the children more effectively, and were more successful in returning their wards to society as productive members of the city's economy. Florence's orphanages were larger and harsher, and made little attempt to reintegrate children into society. Based on extensive archival research and individual stories, *Abandoned Children of the Italian Renaissance* demonstrates how gender and class shaped individual orphanages in each city's network and how politics, charity, and economics intertwined in the development of the early modern state.

Synchrotron Radiation in Materials Science Chunhai Fan, Zhentang Zhao, 2018-05-29 Meeting the long-felt need for in-depth information on one of

the most advanced material characterization methods, a top team of editors and authors from highly prestigious facilities and institutions covers a range of synchrotron techniques that have proven useful for materials research. Following an introduction to synchrotron radiation and its sources, the second part goes on to describe the various techniques that benefit from this especially bright light, including X-ray absorption, diffraction, scattering, imaging, and lithography. The third and final part provides an overview of the applications of synchrotron radiation in materials science. bridging the gap between specialists in synchrotron research and material scientists, this is a unique and indispensable resource for academic and industrial researchers alike.

Making Italian Jews Carlotta Ferrara degli Uberti, 2016-11-10 This book depicts the cultural imagination of the Italian-Jewish minority from the unification of the country to the end of the First World War. The creation of an Italian nation-state introduced new problems and new opportunities for its citizens. What did it mean for the Jewish minority? How could members of the minority combine and redefine Jewishness and Italianness in a radically new political and legal framework? Key concepts such as family, religion, nation, assimilation and – later – Zionism are observed as they shift and change over time. The interaction between the public and private spheres plays a pivotal role in the analysis, and the self-fashioning of Italian Jewish élites is

read alongside the evolution of the cultural stereotypes typical of the time. Reinterpreting the Italian national patriotic narrative through the eyes of the Jews, Carlotta Ferrara degli Uberti is able to unveil its less known layers and articulations, while at the same time offering a new perspective from which to read the modern Jewish experience in the Western World.

Science and Conservation for Museum Collection Bruno Fabbri, 2017-06-06 The idea of the book "Science and Conservation for Museum Collections" was born as a result of the experience made by CNR-ISTEC (Faenza) in the implementation of a course for Syrian restorers at the National Museum in Damascus. The book takes into consideration archaeological artefacts made out of the most common materials, like stones (both natural and artificial), mosaics, ceramics, glass, metals, wood and textiles, together with less diffuse artefacts and materials, like clay tablets, goldsmith artefacts, icons, leather and skin objects, bones and ivory, coral and mother of pearl. Each type of material is treated from four different points of view: composition and processing technology; alteration and degradation causes and mechanisms; procedures for conservative intervention; case studies and/or examples of conservation and restoration. Due to the high number of materials and to the great difference between their conservation problems, all the subjects are treated in a schematic, but precise and complete way. The book is mainly addressed to students, young restorers, conservators and conservation scientists all around the world. But the book can be usefully

read by expert professionals too, because nobody can know everything and the experts often need to learn something of the materials not included in their specific knowledge. Twenty- two experts in very different fields of activity contributed with their experience for obtaining a good product. All they are Italian experts, or working in Italy, so that the book can be seen as an exemplification on how the conservation problem of Cultural Heritage is received and tackled in Italy. —————

Dosso's Fate Dosso Dossi, 1998 Dosso Dossi has long been considered one of Renaissance Italy's most intriguing artists. Although a wealth of documents chronicles his life, he remains, in many ways, an enigma, and his art continues to be as elusive as it is compelling. In *Dosso's Fate*, leading scholars from a wide range of disciplines examine the social, intellectual, and historical contexts of his art, focusing on the development of new genres of painting, questions of style and chronology, the influence of courtly culture, and the work of his collaborators, as well as his visual and literary sources and his painting technique. The result is an important and original contribution not only to literature on Dosso Dossi but also to the study of cultural history in early modern Italy.

The Oxford Handbook of Roman Epigraphy Christer Bruun, J. C. Edmondson, 2015
Inscriptions are for anyone interested in the Roman world and Roman culture, whether they regard themselves as literary scholars, historians, archaeologists, anthropologists, religious scholars or work in a field that touches on the Roman world from c. 500 BCE to 500 CE and beyond. The goal of

The Oxford Handbook of Roman Epigraphy is to show why inscriptions matter and to demonstrate to classicists and ancient historians, their graduate students, and advanced undergraduates, how to work with epigraphic sources--
