Dictionary of Steroids R.A. Hill,H.L.J. Makin,D.N. Kirk,G.M. Murphy,1991-05-23 This dictionary, the first extensive compilation since Fieser's Steroids in 1959, is one of a uniform series derived from the Chapman and Hall Chemical Database. For the first time bibliographic, structural and chemical data on over 10,000 of the most important steroids has been brought together to provide an invaluable reference work for chemists working in this field. The dictionary documents all known naturally occurring steroids (sterols, bile acids, sapogenins, cardanolides, bufanolides, steroidal alkaloids) and an extensive selection of the most important synthetic and semisynthetic steroids. The presentation of data is uniform with the established Dictionary of organic compounds, fifth edition, with accurately drawn diagrams showing stereochemistry and comprehensive, labelled bibliographies giving rapid access to primary literature sources. A small proportion of entries are based on entries in the Dictionary of organic compounds which have been substantially expanded and brought up to date with references to the recent literature (coverage up to August 1990). The majority are wholly new with particularly strong natural product coverage. Access to this information is provided by name, molecular formula, CAS registry number, type of compound, and species indexes--which comprise Volume 2. The Mountaineer Site Brian N. Andrews,David J. Meltzer,Mark Stiger,2021-06-07 The Mountaineer Site presents over a decade's worth of archaeological research conducted at Mountaineer, a Paleoindian campsite in Colorado's Upper Gunnison Basin. Mountaineer is one of the very few extensively excavated, long-term Folsom occupations with evidence of built structures. The site provides a rich record of stone tool manufacture and use, as well as architectural features, and offers insight into Folsom period adaptive strategies from a time when the region was still in the grip of a waning Ice Age. Contributors examine data concerning the structures, the duration and repetition of occupations, and the nature of the site's artifact assemblages to offer a valuable new perspective on human activity in the Rocky Mountains in the Late Pleistocene. Chapters survey the history of fieldwork at the site and compare and explain the various excavation procedures used; discuss the

geology, taphonomic history, and geochronology of the site; analyze artifacts and other recovered materials; examine architectural elements; and compare the present and past environments of the Upper Gunnison Basin to gain insight into the setting in which Folsom groups were operating and the resources that were available to them. The Folsom archaeological record indicates far greater variability in adaptive behavior than previously recognized in traditional models. The Mountaineer Site shows how accounting for reduced mobility, more generalized subsistence patterns, and variability in tool manufacture and use allows for a richer and more accurate understanding of Folsom lifeways. It will be of great interest to graduate students and archaeologists focusing on Paleoindian archaeology, hunter-gatherer mobility, lithic technological organization, and prehistoric households, as well as prehistorians, anthropologists, and social scientists.
