**Is The "World's Oldest Bible" A Fake?** David W. Daniels, 2018-01-09 Modern research techniques have revealed a hidden scheme aimed at God's Holy Words... Modern Bibles have changed many verses because of the discovery of an ancient manuscript in a monastery on the Sinai Peninsula. The manuscript, called Sinaiticus, is claimed to be the earliest complete copy of the New Testament. Its discoverer, who was a world leading Bible scholar in his time, told the world Sinaiticus was from the 4th century and that it was the oldest and best Bible available. Publishers rushed to make new Bibles with many changes to match it. But not everyone agreed. When this famed 19th century Bible scholar, Constantine Von Tischendorf, claimed the ancient date, a well-known Greek calligrapher said, No! I made that document! But why did no one believe him? Maybe it's because pages of the manuscript were stored where no one could view them, archived in exclusive collections across several continents. Now, an international group has carefully

photographed each page of Sinaiticus and is displaying it on the internet as high-quality digital images. For the first time, Bible scholars and students can see the entire manuscript together, as was never possible before. And what they are seeing with their own eyes is shocking. Some of the pages are white and look quite new, while others have been darkened to make them look very old. If they are all from the same old Bible, how can this be? Researcher David W. Daniels proves with easy-to-understand evidence that the Sinaiticus is not the oldest manuscript and certainly not the best, either. He is also convincing in showing it's not old after all and that the Greek calligrapher did make it, in the 19th century. The textual (and doctrinal) changes in modern Bibles are based upon a fake —a shadowy scheme worthy of Satan's hatred for the preserved words of God.

**Data Science for Fake News** Deepak P,Tanmoy Chakraborty,Cheng Long,Santhosh Kumar G,2021-04-29 This book provides an overview of fake news detection, both through a variety of tutorial-style survey articles that capture advancements in the field from various facets and in a somewhat unique direction through expert perspectives from various disciplines. The approach is based on the idea that advancing the frontier on data science approaches for fake news is an interdisciplinary effort, and that perspectives from domain experts are crucial to shape the next generation of methods and tools. The fake news challenge cuts across a number of data science subfields such as graph analytics, mining of spatio-temporal data, information retrieval, natural language processing, computer vision and image processing, to name a few. This book will present a number of tutorial-style surveys that summarize a range of recent work in the field. In a unique feature, this book includes perspective notes from experts in disciplines such as

linguistics, anthropology, medicine and politics that will help to shape the next generation of data science research in fake news. The main target groups of this book are academic and industrial researchers working in the area of data science, and with interests in devising and applying data science technologies for fake news detection. For young researchers such as PhD students, a review of data science work on fake news is provided, equipping them with enough know-how to start engaging in research within the area. For experienced researchers, the detailed descriptions of approaches will enable them to take seasoned choices in identifying promising directions for future research.

**The Rhetoric of the Roman Fake** Irene Peirano, 2012-08-16 Previous scholarship on classical pseudepigrapha has generally aimed at proving issues of attribution and dating of individual works, with little or no attention paid to the texts as literary artefacts. Instead, this book looks at Latin fakes as sophisticated products of a literary culture in which collaborative practices of supplementation, recasting and role-play were the absolute cornerstones of rhetorical education and literary practice. Texts such as the *Catalepton*, the *Consolatio ad Liviam* and the *Panegyricus Messallae* thus illuminate the strategies whereby Imperial audiences received and interrogated canonical texts and are here explored as key moments in the Imperial reception of Augustan authors such as Virgil, Ovid and Tibullus. The study of the rhetoric of these creative supplements irreverently mingling truth and fiction reveals much not only about the neighbouring concepts of fiction, authenticity and reality, but also about the tacit assumptions by which the latter are employed in literary criticism.

**Misinformation and Fake News in Education** Panayiota Kendeou,Daniel H.

Robinson, Matthew T. McCrudden, 2019-09-01 Today, like no other time in our history, the threat of misinformation and disinformation is at an all-time high. This is also true in the field of Education. Misinformation refers to false information shared by a source who intends to inform, but is unaware that the information is false, such as when an educator who recommends the use of a learning strategy that is not actually beneficial.

Disinformation is false information shared by a source who has the intent to deceive and is aware that the information is false, such as when a politician claim that high-stakes testing will fix K-12 education when in fact there is no evidence to support this practice. This book provides recent examples of how misinformation and disinformation manifest in the field of education and remedies. Section One, Susceptibility to Misinformation, focuses on factors that influence the endorsement and persistence of misinformation. This section will include chapters on: the appeal and persistence of “zombie concepts” in education; learner and message factors that underlie the adoption of misinformation in the context of the newly proposed Likelihood of Adoption Model; cognitive and motivational factors that contribute to misinformation revision failure; cognitive biases and bias transfer in criminal justice training; the influence of conspiratorial and political ideation on the use of misinformation; and, how educational culture and policy has historically given rise to quackery in education. Section Two, Practices in the Service of Reducing Misinformation in Education, focuses on practices aimed at reducing the impact of misinformation, and includes chapters on: misinformation in the education of children with ASD and its influence on educational and intervention practices; the promise of using dynamical systems and computational linguistics to model the spread of misinformation; systematic

attempts to reduce misinformation in psychology and education both in and out of the classroom; and the potential perils of constructivism in the classroom, as well as the teaching of critical thinking. Each section has a discussion chapter that explicates emerging themes and lessons learned and fruitful avenues for future research.

**Fake News Is Bad News** Ján Višňovský, Jana Radošinská, 2021-09-08 We live in the era of the digital revolution characterized by easy access to obtaining, processing and disseminating information on a global scale. The emergence of these global digital spaces has transformed the world of communication. This shift in our understanding of what we should be informed about, when and how, manifests itself not only within mature liberal democracies, which grant their citizens and the media constitutionally guaranteed freedom of speech and rights associated with obtaining information, but also within developing countries with different types of political establishments. Moreover, many media producers, especially journalists and persons claiming to be journalists, abuse their crucial mission and, instead, foster a set of serious communication phenomena that threaten basic human rights and freedoms, weaken them or decelerate their development. The publication is focused on the ways fake news, disinformation, misinformation and hateful statements are spread across society, predominantly within the online environment. Its main ambition is to offer an interdisciplinary body of scholarly knowledge on fake news, disinformation and propaganda in relation to today's journalism, social development, political situation and cultural affairs happening all around the world.

In this book, leading civic education scholars unpack why fake news is effective and show K-12 educators how they can teach their students to be critical consumers of the political media they encounter.

**FAKE NEWS** Daniel David Elles, 2018-10-18 Is the press “enemy of the people”? Of course, not. However, Fake News is. This new book from Daniel David Elles – top selling author as seen on Google and Best New Author Finalist – explains, in incredible detail and with specific examples, how the mainstream media is affecting America by not living up to the Society of Professional Journalists Code of Ethics. And this poor reporting has been on display more than even in the Judge Kavanaugh confirmation hearings. **Fighting Fake News** Jeffrey D. Wilhelm, Michael W. Smith, Hugh Kesson, Deborah

Appleman,2023-02-21 Critical thinking and online reading need to go hand in hand—but they often don't. Students click, swipe, and believe because they don't know how to do otherwise. At times, so do we. And that's a problem. Fighting Fake News combats this challenge by helping you model how to read, myth-bust, truth-test, and respond in ways that lead to wisdom rather than reactivity. No matter what content you teach, the lessons showcased here provide engaging, collaborative reading and discussion experiences so students can: Notice how teacher and peers read digital content, to be mindful of how various reading pathways influence perception Identify the author background, the website sponsor, and other evidence that help set a piece in context Stress-test the facts by evaluating news sources, reading laterally, and other critical reading strategies Use Reader's Rules of Notice to learn to identify common rhetorical devices used to influence the reader Be aware of how for-profit social media platforms feed on our responses to narrow rather than widen our reading landscape We are still in the wild west era of the digital age, scrambling to impart a safer, ethical framework for evaluating information. Thankfully, it distills to one mission: teach students (and ourselves) how to think critically, and we will forever have the tools to fight fake news.

**Truth and Fake in the Post-Factual Digital Age** Peter Klimczak,Thomas Zoglauer,2023-05-24 The increase in fake news, the growing influence on elections, increasing false reports and targeted disinformation campaigns are not least a consequence of advancing digitalisation. Information technology is needed to put a stop to these undesirable developments. With intelligent algorithms and refined data analysis, fakes must be detected more quickly in the future and their spread prevented. However, in

order to meaningfully recognize and filter fakes by means of artificial intelligence, it must be possible to distinguish fakes from facts, facts from fictions, and fictions from fakes. This book therefore also asks questions about the distinctions of fake, factual and fictional. The underlying theories of truth are discussed, and practical-technical ways of differentiating truth from falsity are outlined. By considering the fictional as well as the assumption that information-technical further development can profit from humanities knowledge, the authors hope that content-related, technical and methodological challenges of the present and future can be overcome.

**"Fake News" Theology** Kenton L. Sparks, 2020-02-27 No matter what side you're on or how you look at it, we're living in a world that's filled with "fake news" and with lots of people who believe it. How do Christians fit into this world? In this book, Kenton Sparks argues that certain approaches to biblical authority, which assume that the Bible is a perfect book, make Christians especially susceptible to the deceptions of "fake news" and cause us to embrace false understandings of the Bible and, because of this, about natural science, social science, various academic disciplines, politics, morals, ethics, and loads of other things. The resulting damage to faith and Christian witness is significant. Is there a better way to understand and honor biblical authority? Yes. We must restore God as the final authority over our interpretations of Scripture. The path forward for this theological agenda was modeled by Jesus Christ in his interpretations of Scripture. Whereas his contemporaries often followed the "letter of the law" or something akin to it, Jesus taught that love for God and neighbor provided the proper foundation and destination for healthy readings and applications of the Bible. If love required more radical, internal commitments to the law, Jesus demanded this of his audience; where love required that we set aside the law's violent judgments, he pointed his audience in the opposite direction. In modeling this approach to Scripture, Jesus taught "as one with authority" and thus showed us that, when we interpret Scripture through the lens of divine love, we give ourselves the best opportunity to read Scripture under the authority of God.

*Fake* Dónal O’Sullivan, 2023-10-02 Throughout history, forgers have attempted to fabricate documents to manipulate the historical record. The book explores the most egregious cases--their intent, effectiveness, exposure and significance--from the Donation of Constantine to the Protocols of the Elders of Zion to the Hitler Diaries. Ironically, forgeries have helped advance the discipline of history. Case studies trace how scholars worked to reveal the truth behind bogus manuscripts while developing new tools and standards for accuracy and authenticity. In the age of fake news and digital editing software, the spectacular history of fraud in print has never been more relevant.

**Fake News** Gaurav Sood, 2023-11-30 The news is a public good and needs to be handled with care and integrity. Even though lies and misinformation campaigns have been around for years—maybe since the dawn of journalism—the rate at which fake news is being spread these days is both alarming and preposterous. Almost every institution—public or private—uses fake news to further its own agenda. Governments and corporate houses spread fake news either through their own agencies or by influencing the popular media. In the business sector, fake news manifests itself in the form of exaggerated company returns and false data. This book analyses the impact of fake news both on products and personalities. Foregrounded in rigorous research, it examines how fake news is used by companies, political parties, and leaders to create, amplify, and even tarnish a brand’s image and equity. It emphasizes how the customers' perception of a brand impacts and influences its reputation, and acts as a decisive force in them gaining or losing competitive advantages. Elucidating how brands can interact both directly and indirectly with fake news, it brings to the readers' notice how sometimes brands are the

victims of fake news and other times, the purveyors.

**Fake Identity?** Caroline Rosenthal, Stefanie Schäfer, 2014-05-15 Hochstapler geben vor, jemand zu sein, der sie nicht sind. Sie konstruieren eine Lebensgeschichte, die sich bestimmter kultureller Vorannahmen und Stereotype bedient, um für andere glaubhaft zu sein. Doch ist Identität nicht stets auch Produkt eines erzählerischen Selbstentwurfs? Am Beispiel von wahren und imaginierten Fällen von Betrügern in Nordamerika fragen die Beiträge des Bandes nach den Motiven von Hochstapelei, den Mechanismen der Täuschung – und warum diese funktionieren.
