Fake News and Elections in Southeast Asia James Gomez,Robin Ramcharan,2022-12-30 This book offers a regional analysis of the impact of fake news – misinformation, malinformation and disinformation – on electoral democracy and freedom of expression in Southeast Asia, which has taken place in the middle of a global health pandemic. The book maps the impact of social media and the internet on democracy in the members of the Association of Southeast Asian Nations that have already been in the throes of democratic regression for some time. Including an analysis of countries that do not have national elections, the chapters provide detailed information on the extent of internet and social media penetration in each country, the laws that are deployed to reel in its political potential for critics and demonstrate the impact on democracy or the prospects for democracy. Collectively, contributors note that disinformation is a serious problem in the region that negatively impacts elections and how governments' attempts to deal with the phenomenon inevitably lead to the targeting of dissenting voices and opposition as anti-state fake news. The deleterious impact on democracy and freedom of expression, facilitated by a citizenry that is prone to manipulation of facts, appears to be the standard modus operandi in the regional authoritarian complex. This book is the first to undertake a regional analysis of disinformation in Southeast Asia and is a significant contribution to the literature on democracy, elections and disinformation. It will be of interest to researchers in the fields of Political Science and Asian Politics, in particular Southeast Asian Politics.

Fake News 101 Danny Murphy, 2017-05-10 Although we appear to have entered a Golden Age of Fake News, fake stories have been passed off as news for a long time in the United States and throughout the world. On December 28, 1917, the New York Evening Mail presented readers with one of the greatest fake news stories up to that time. A Neglected Anniversary by H.L. Mencken was a totally fake history of the bathtub. It may be hard for people to believe that an article about bathtub history could go viral, but it did. Flashing forward to 1980, Janet Cooke wrote an article for the Washington Post about an 8-year-old heroin addict named Jimmy. The story, which was titled Jimmy’s World, was heart-breaking. After Cooke won a Pulitzer Prize, people wanted to locate Jimmy so they could help the lad. Unfortunately, there was no Jimmy. Janet had cooked the whole story up. In 2003, The New York Times disclosed that award-winning reporter Jayson Blair had been a plagiarist and a frequent fabricator. In his articles, he had a bad habit of inserting quotes from interviews that never took place. According to The Times, there were problems in at least 36 of the 73 articles Mr. Blair wrote since he started getting national reporting assignments. Stephen Glass was another journalist who found his way to fortune, fame, and infamy by making things up. He wrote mostly for The New Republic where he became an associate editor by the age of twenty-five. Forbes.com outed him in May of 1998. The article was titled Lies, Damn Lies and Fiction by Adam L. Penenberg. These are but a few examples of fake news in which journalists intentionally misled consumers of the news. Sometimes the media also report fake stories unwittingly. In October of 2009, the Balloon Boy captivated audiences as he reportedly floated through the sky in a balloon. Reporters and TV viewers alike ate the story up. It turned out that Falcon

Heene had never even left the ground. He had been safe at home the whole time. It turned out that his parents had pulled off one of the greatest hoaxes in modern history. Since the turn of the millennium, fake news has been evolving at an accelerated pace. Not so long ago, tabloids including The Weekly World News, which specialized in fake news, could be readily found in many grocery stores. Fake news in print is not as common as it once was, although we still see it occasionally in newspapers and magazines. Now most of the fake news is on the internet. The Onion is the most well-known publisher of fake news, but there are dozens of other online magazines cranking it out. With some websites, like The Onion, it's clear that the stories presented are satirical. Nevertheless, there are people who believe the articles. Other websites do a very good job of looking legitimate, and for many readers it is easy to believe the articles. For many readers, it has become difficult to distinguish what's real and what's not. Fake News 101 will help readers to recognize various types of fake news. It also presents information on how fake news operates, with examples. Aside from disconnecting and finding a wireless cave to live in, there's probably no way to avoid fake news completely. However, it is possible to avoid being fooled by fake news. The objective of Fake News 101 is to help people to do exactly that.

Cross-Media Authentication and Verification: Emerging Research and Opportunities Katsaounidou, Anastasia, Dimoulas, Charalampos, Veglis, Andreas, 2018-07-13 As media becomes more readily available in the digital age, it also becomes more vulnerable to tampering and manipulation, making techniques for verifying reliable news and media sources essential. Cross-Media Authentication and Verification: Emerging Research and Opportunities is a collection of innovative research on the methods and applications of verifying the newsgathering and publishing process. While highlighting topics including human authentication, information evaluation, and tampered content, this book is ideally designed for researchers, students, publishers, and academicians seeking current research on media authenticity and misinformation.

Fake News Hans Oberleithner, 2019-05-12 It's the year 2033. A team of four scientists discovers a substance in the blood of newts that obviously generates empathy. Its name is Empathol. The antidote is salt, which, consumed in large quantities, turns people into egoists. The discovery makes its way into the public arena and becomes a fashion drug among the powerful who abuse Empathol for manipulating people. The four researchers eventually fall victim to their own discovery. But one day, this nightmare ends - almost natural.

Networked Refugees Nadya Hajj, 2021-10-19 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Almost 68.5 million refugees in the world today live in a protection gap, the chasm between protections stipulated in the Geneva Convention and the abrogation of those responsibilities by states and aid agencies. With dwindling humanitarian aid, how do refugee communities solve collective dilemmas, like raising funds for funeral services, or securing other critical goods and services? In Networked Refugees, Nadya Hajj finds that Palestinian refugees utilize Information Communication Technology platforms to motivate reciprocity—a cooperative action marked by the mutual exchange of favors and services—and informally seek aid and connection with their transnational diaspora community. Using surveys conducted with Palestinians throughout the diaspora, interviews with those inside the Nahr al Bared Refugee camp in Lebanon, and data pulled from online community spaces, these findings push back against the cynical idea that online organizing is fruitless, emphasizing instead the productivity of these digital networks.
