A New York Times bestseller! JOSEF is a Jewish boy living in 1930s Nazi Germany. With the threat of concentration camps looming, he and his family board a ship bound for the other side of the world... ISABEL is a Cuban girl in 1994. With riots and unrest plaguing her country, she and her family set out on a raft, hoping to find safety in America... MAHMOUD is a Syrian boy in 2015. With his homeland torn apart by violence and destruction, he and his family begin a long trek toward Europe... All three kids go on harrowing journeys in search of refuge. If Social Services hears of their situation, they will be separated in the foster-care system--or worse, sent back to Cuba. Together, the boys carry on alone, dodging bills and anyone who asks too many questions. But then someone wonders how a twelve-year-old boy could possibly throw with as much power as Michael Arroyo throws. With no way to prove his age, no birth certificate, and no parent to fight for his cause, Michael's secret world is blown wide open, and he discovers that family can come from the most unexpected sources. Perfect for any Little Leaguer with dreams of making it big--as well as for fans of Mike Lupica's other New York Times bestsellers Travel Team, The Big Field, The Underdogs, Million-Dollar Throw, and The Game Changers series, this cheer-worthy baseball story shows that when the game knocks you down, champions stand tall.

If He Had Been with Me Laura Nowlin,2013-04-02 If he had been with me everything would have been different... I

wasn't with Finn on that August night. But I should've been. It was raining, of course. And he and Sylvie were arguing as he drove down the slick road. No one ever says what they were arguing about. Other people think it's not important. They do not know there is another story. The story that lurks between the facts. What they do not know—the cause of the argument—is crucial. So let me tell you...

Lone Survivor Marcus Luttrell, 2007-06-12 Follow along a Navy SEAL's firsthand account of American heroism during a secret military operation in Afghanistan in this true story of survival and difficult choices. On a clear night in late June 2005, four U.S. Navy SEALs left their base in northern Afghanistan for the mountainous Pakistani border. Their mission was to capture or kill a notorious al Qaeda leader known to be ensconced in a Taliban stronghold surrounded by a small but heavily armed force. Less than twenty-four hours later, only one of those Navy SEALs remained alive. This is the story of fire team leader Marcus Luttrell, the sole survivor of Operation Redwing, and the desperate battle in the mountains that led, ultimately, to the largest loss of life in Navy SEAL history. But it is also, more than anything, the story of his teammates, who fought ferociously beside him until he was the last one left—blasted unconscious by a rocket grenade, blown over a cliff, but still armed and still breathing. Over the next four days, badly injured and presumed dead, Luttrell fought off six al Qaeda assassins who were sent to finish him, then crawled for seven miles through the mountains before he was taken in by a Pashtun tribe, who risked everything to protect him from the encircling Taliban killers. A six-foot-five-inch Texan, Leading Petty Officer Luttrell takes us, blow by blow, through the brutal training of America's warrior elite and the relentless rites of passage required by the Navy SEALs. He transports us to a monstrous battle fought in the desolate peaks of Afghanistan, where the beleaguered American team plummeted headlong a thousand feet down a mountain as they fought back through flying shale and rocks. In this rich, moving chronicle of courage, honor, and patriotism, Marcus Luttrell delivers one of the most powerful narratives ever written about modern warfare -- and a tribute to his teammates, who made the ultimate sacrifice for their country.

Restricted Data Alex Wellerstein, 2021-04-09 Nuclear weapons, since their conception, have been the subject of secrecy. In the months after the dropping of the atomic bombs on Hiroshima and Nagasaki, the American scientific establishment, the American government, and the American public all wrestled with what was called the problem of secrecy, wondering not only whether secrecy was appropriate and effective as a means of controlling this new technology but also whether it was compatible with the country's core values. Out of a messy context of propaganda, confusion, spy scares, and the grave counsel of competing groups of scientists, what historian Alex Wellerstein calls a new regime of secrecy was put into place. It was unlike any other previous or since. Nuclear secrets were given their own unique legal designation in American law (restricted data), one that operates differently than all other forms of national security classification and exists to this day. Drawing on massive amounts of declassified files, including records released by the government for the first time at the author's request, *Restricted Data* is a narrative account of nuclear secrecy and the tensions and uncertainty that built as the Cold War continued. In the US, both science and democracy are pitted against nuclear secrecy, and this makes

its history uniquely compelling and timely--
