Rapid Damage-Free Robotic Harvesting of Tomatoes Jizhan Liu,Zhiguo Li,Pingping Li,2021-06-23 This book shares the latest findings on this topic, systematically introduces readers to advances made in robotic harvesting around the globe, and explores the relations between the development of robotic harvesting and the respective social/economic conditions and agricultural business patterns in various countries/regions. Due to the unstructured setting it is used in, and to the significant differences between individual fruit and vegetable targets, robotic harvesting is currently considered to be one of the most challenging robotics technologies. Accordingly, research into this area involves the integration of various aspects, including biomechanics, optimization design, advanced perception and intelligent control. In addition to rapid and damage-free robotic harvesting, which reflects the multidisciplinary nature of the topic, further aspects addressed include gripping collisions with viscoelastic objects, using lasers to cut plant material, plant-fruit response to vacuum sucking and pulling, and performance probability distribution. Highlighting outstanding innovations and reflecting the latest advances in intelligent agricultural equipment in China, the book offers a unique and valuable resource.

Hanging Falls Margaret Mizushima,2020-09-08 Winner: WILLA Literary Award for Fiction, Contemporary Fiction Silver Award: IBPA Benjamin Franklin Awards, Mystery Finalist: Colorado Authors League, Mystery Reunite with Officer Mattie Cobb and her canine companion, Robo in the sixth gripping installment of the Timber Creek K-9 mysteries—"guaranteed to delight every dog lover" (Booklist) Murder stalks the rugged Colorado high country—and sends Mattie Cobb on a quest to uncover the darkest secrets from her past. A deluge has flooded the high ground near Hanging Falls—but heavy rains aren't the only menace descending on Timber Creek. While on a scouting mission to pinpoint trail damage, officer Mattie Cobb and her K-9 partner Robo stumble upon a body floating at the edge of a lake. Robo catches human scent, which leads to an enigmatic forest-dweller who quickly becomes suspect number one. With help from veterinarian Cole Walker, Mattie identifies the victim, and discovers an odd religious cult whose dress and manners harken back to the 19th century. As the list of suspects grows, an unexpected visit from members of Mattie's long-lost family sheds new light on her childhood as they help Mattie piece together details of the fateful night when she was abducted at age two. The tangled threads of the investigation and family dynamics begin to intertwine—but darkness threatens to claim a new victim before Mattie and Robo can track down the killers.

Modelling and Control of Mechatronic and Robotic Systems Alessandro Gasparetto,Stefano Seriani,2021-09-02 Currently, the modelling and control of mechatronic and robotic systems is an open and challenging field of investigation in both industry and academia. The book encompasses the kinematic and dynamic modelling, analysis, design, and control of mechatronic and robotic systems, with the scope of improving their performance, as well as simulating and testing novel devices and control architectures. A broad range of disciplines and topics are included, such as robotic manipulation, mobile systems, cable-driven robots, wearable and rehabilitation devices, variable stiffness safety-oriented mechanisms, optimization of robot performance, and energy-saving systems.

Robotic Welding, Intelligence and Automation Tzyh-Jong Tarn,Shan-Ben Chen,Changjiu Zhou,2004-03-10 This research report brings together present trends in advanced welding robots, robotic welding, artificial intelligent and automatic welding. It includes important technical subjects on welding robots such as intelligent technologies and systems, and design and analysis. Modeling, identification and control of the welding process are presented, as well as knowledge-based systems for welding and tele-robotic welding. Other topics covered are sensing and data fusion, computer vision and virtual-reality applications of the welding process. An overview of intelligent and flexible manufacturing systems is given in addition to artificial intelligent technologies for industrial processes.

Robo-Advisory Peter Scholz,2020-12-28 Robo-Advisory is a field that has gained momentum over recent years, propelled by the increasing

digitalization and automation of global financial markets. More and more money has been flowing into automated advisory, raising essential questions regarding the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field.

Free City! Marcy Rein, Mickey Ellinger, Vicki Legion, 2021-06-29 Free City! The Fight for San Francisco's City College and Education for All tells the story of the five years of organizing that turned a seemingly hopeless defensive fight into a victory for the most progressive free college measure in the US. In 2012, the accreditor sanctioned City College of San Francisco, one of the biggest and best community colleges in the country, and a year later proposed terminating its accreditation, leading to a state takeover. Free City! follows the multipronged strategies of the campaign and the diverse characters that carried them out. Teachers, students, labor unions, community groups, public officials, and concerned individuals saved a treasured public institution as San Francisco's working-class communities of color battled the gentrification that was forcing them out of the city. And they pushed back against the national "reform" agenda of corporate workforce training that drives students towards debt and sidelines lifelong learning and community service programs. Combining analysis with narrative, Free City! offers a case study in the power of positive vision and solution-oriented organizing and a reflection on what education can and should be.

Popular Science, 1997-12 Popular Science gives our readers the information and tools to improve their technology and their world. Neurological Rehabilitation - E-Book Darcy Ann Umphred, Rolando T. Lazaro, Margaret Roller, Gordon Burton, 2013-08-07 Using a problem-solving approach based on clinical evidence, Neurological Rehabilitation, 6th Edition covers the therapeutic management of people with functional movement limitations and quality of life issues following a neurological event. It reviews basic theory and covers the latest screening and diagnostic tests, new treatments, and interventions commonly used in today's clinical practice. This edition includes the latest advances in neuroscience, adding new chapters on neuroimaging and clinical tools such as virtual reality, robotics, and gaming. Written by respected clinician and physical therapy expert Darcy Umphred, this classic neurology text provides problem-solving strategies that are key to individualized, effective care. UNIQUE! Emerging topics are covered in detail, including chapters such as Movement Development Across the Lifespan, Health and Wellness: The Beginning of the Paradigm, Documentation, and Cardiopulmonary Interactions. UNIQUE! A section on neurological problems accompanying specific system problems includes hot topics such as poor vision, pelvic floor dysfunction, and pain. A problem-solving approach helps you apply your knowledge to examinations, evaluations, prognoses, and intervention strategies. Evidence-based research sets up best practices, covering topics such as the theory of neurologic rehabilitation, screening and diagnostic tests, treatments and interventions, and the patient's psychosocial concerns. Information. Case studies use real-world examples to promote problem-solving skills. Non-traditional approaches to neurological interventions in the Alternative and Complementary Therapies chapter include the movement approach, energy approach, and physical body system approaches therapies. Terminology adheres to the

best practices of the APTA as well as other leading physical therapy organizations, following The Guide to Physical Therapy Practice, the Nagi model, and the ICF World Health Model of patient empowerment. Updated illustrations provide current visual references. NEW chapters on imaging and robotics have been added. Updated chapters incorporate the latest advances and the newest information in neuroscience and intervention strategies. Student resources on an Evolve companion website include references with links to MEDLINE and more.

Spacewear Barbara Brownie, 2019-01-10 Today, we are living in the New Space Age, where mass commercial space travel is almost within our grasp. This otherworldly possibility has opened up new cultural images of space, both real and fictional, and has caused fashion design and spacesuit engineering to intersect in new, exciting ways. Spacewear traverses this uncharted territory by exploring the changing imagination of space in fashion- and fashion in space-from the first Space Age to the 21st century. Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment, Spacewear connects the catwalk and the space station. This book draws together speculative fantasies in sci-fi films such as Star Trek and 2001: A Space Odyssey, with the engineered spacesuits Biosuit, and the NASA Z-2 and with catwalk interpretations by the likes of Alexander McQueen, Hussein Chalayan, André Courrèges, and Iris van Herpen. While the development of commercial space agencies has led to new concerns for style in garments for outer space that re-think fundamental design principles such as drape, high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet-style headwear. Brownie takes the reader on a fascinating journey from fantasy to function and to form, deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space.

Great Falls, MT Reggie Watts, 2023-10-17 Comedian and musician Reggie Watts shares his story of growing up in Montana as a biracial oddball struggling to navigate life, girls, drugs, and his own identity in America's heartland—and having a blast doing it. Reggie Watts is weird. But you knew that. Anyone who's seen his multifaceted, entirely improvised comedy and music shows knows that. Reggie Watts is also from the town of Great Falls, MT. These two facts are not unrelated. Watts grew up in Montana in the '80s, half French, half American, half white, half Black, speaking a bunch of different languages and slipping between the orchestra geeks and the football jocks until he finally found a squad of fellow misfits with an affinity for trouble. It was a wide-open time and place that invited freedom and exploration—as well as car theft and the not infrequent use of recreational cough syrup. And it helped him become the uniquely strange creative voice he is today. In Great Falls, MT, Watts takes us through his story, hitting on the culture shock he experienced after moving from Europe to the heart of America, where he was called racial slurs by neighbors but wasn't Black enough for his father's extended family. Where he fought with his authoritarian dad, built a new family of antiestablishment, post-punk oddballs—and ultimately knew he had to leave. But after Watts's career exploded in Seattle and New York, ultimately scoring him a nightly place next to James Corden on The Late Late Show, he found himself drawn back to his hometown after the deaths of his parents. This is his love letter to the town that made him. But like love itself, it's messy and complicated and dirty and beautiful—and as weird and wonderful as Watts himself.

The Orphan of Awkward Falls Keith Graves, 2011-10-19 Josephine Cravitz, the new girl in Awkward Falls, and her neighbor Thaddeus Hibble, a reclusive and orphaned boy inventor, become the targets of a mad cannibal from the local asylum for the criminally insane.

The Fallen Ronin: Series Finale (The Galactic Crusade Trilogy Book 3) Pablo Andrés Wunderlich Padilla, We survived the destruction of our brothers in Canis Mayor, where both the Alpha and X Legions were laid to waste by Ahmurai. After my rescue by the special forces agent Captain Setzune and her android Rin, we have found a way to return to the Milky Way. I hope we make it back in time. Ahmurai has threatened to destroy humanity as a whole, and we must get there as soon as possible. My fear is we will not make it in time—perhaps never make it at all. If we make it to the Milky Way, I

will step into the gates of hell. This is my final battle, I know it. I will go all in. This is when the fate of the universe is decided.

Development of an End-effector for Robotic Drilling with On-line Sensing and Diagnosis Shi-Yuan Horng,1983

Robotic Exploration of the Solar System Paolo Ulivi,David M. Harland,2007-12-08 This fascinating book is a must-have text for space enthusiasts with an engineering bent. It is a detailed history of unmanned missions that have explored our solar system. The subject is treated wherever possible from an engineering and scientific standpoint and includes technical descriptions of the spacecraft, their mission designs and their instrumentations. Scientific results are discussed in depth, together with details of mission management. The book is fantastically comprehensive, covering missions and results from the 1950s right up to the present day. Some of the latest missions and their results appear in a popular science book for the first time.

Advances in Digital Human Modeling Sofia Scataglini,Gregor Harih,Wim Saeys,Steven Truijen,2023-07-18 This book reports on advances in human modeling techniques, covering cutting-edge algorithms and their practical implementation in health and medicine, automotive, clothing, virtual reality simulations, robotics, and assistive technologies. Gathering the proceedings of the 8th International Digital Human Modeling Symposium, held on September 4-6, 2023, in Antwerp, Belgium, it offers a timely snapshot on interdisciplinary, applied research, at the interface between computer science, ergonomics, engineering, design, health and technologies.

Falls and Cognition in Older Persons Manuel Montero-Odasso,Richard Camicioli,2019-10-04 Despite of the enormous efforts of researchers and clinicians to understand the pathophysiology of falls in older adults and establish preventive treatments, there is still a significant gap in our understanding and treating of this challenging syndrome, particularly when we focus in cognitively impaired older adults. Falls in older adults are a very common yet complex medical event, being the fifth leading cause of death and a main cause of insidious disability and nursing home placement in our world aging population. Importantly, falls in the cognitively impaired double the prevalence of the cognitively normal, affecting up of 60% of older adults with low cognition and increasing the risk of injuries. The past decade has witnessed an explosion of new knowledge in the role of cognitive processes into the falls mechanisms. This was also accompanied with clinical trials assessing the effect of improving cognition via pharmacological and non-pharmacologic approaches to prevent falls and related injuries. Unfortunately, this revolution in emerging interventions left a gap between clinician-scientists and researchers at academic centers where the new data had been generated and the practitioners who care for cognitively impaired patients with falls. Most advances are published in specialty journals of geriatric medicine, neurology, and rehabilitation. The aim of this book is to reduce this gap and to provide practical tools for fall prevention in cognitively impaired populations. The proposed book is designed to present a comprehensive and state-of-the-art update that covers the pathophysiology, epidemiology, and clinical presentation of falls in cognitively impaired older adults. We additionally aim to reduce the knowledge gap in the association between cognitive processes and falls for practitioners from a translational perspective: from research evidence to clinical approach. We will address gaps and areas of uncertainty but also we will provide practical evidence-based guidelines for the assessment, approach, and treatment of falls in the cognitively impaired populations. This book is a unique contribution to the field. Existing textbooks on fall prevention focus in global approaches and only tangentially address the cognitive component of falls and not purposely address special populations and/or settings as residential care and nursing homes. Due to the expected increase of proportion of older adults with cognitive and mobility impairments, this book is also valuable for the whole spectrum of the health care of the elderly. By including a

transdisciplinary perspective from geriatric medicine, rehabilitation and physiotherapy medicine, cognitive neurology, and public health, this book will provide a practical and useful resource with wide applicability in falls assessment and prevention.

Legacy of the Fallen Luke Chmilenko, 2018-01-08 Being a hero always has its price, but what happens if that price is too high to pay? Fresh off their victory over Graves and his followers, Marcus and his friends have managed to enjoy a few weeks of relative calm and peace as they continue to build Aldford, preparing the town for a new wave of settlers coming from Eberia. But as the days wear on with no new arrivals in sight, they begin to fear the worse, eventually setting out to search for their promised reinforcements and soon realizing that they weren't as alone on the frontier as they thought they were. Just managing to rescue a caravan of settlers in the nick of time from a horde of bandits, Marcus and the rest of Virtus barely have a chance to catch their breath before they find themselves thrust into the middle of Eberian politics, revealing a plot that threatens to not only take away their hard-won independence. But to destroy Aldford completely.

Borderlands: The Fallen John Shirley, 2011-11-22 Roland, a former mercenary, becomes a guide and bodyguard to Zac Finn and his family on a dangerous planet in the Borderlands, and must protect them from aliens and bandits while Zac searches for alien treasure.
