**DK Eyewitness Travel Guide: Rome** Adele Evans, 2011-01-03 This book divides central Rome into 16 areas and has further sections for sights on the outskirts of the city; including some day trips as well as some suggested walks. Each of the main areas has its own chapter and contains a selection of sights that convey some of its history and distinctive character. The bird's-eye view photographs, 3-D aerial views of Rome's most interesting districts, the floor plans of all the major sights and the huge selection of hotels, restaurants, shops and entertainment venues separate this guide from all of the rest. The Eyewitness Travel Guide helps you to get the most from your stay in Rome. Annually revised and updated with beautiful new full-color photos, illustrations, this guide includes information on local customs, currency, medical services, and transportation. Consistently chosen over the competition in national consumer market research. The best keeps getting better!

Famous Landmarks of Ancient Rome Charles River Charles River Editors, 2017-11-08 \*Includes pictures \*Includes accounts of the landmarks written by ancient Romans \*Includes bibliographies for further reading \*Includes a table of contents The Roman Empire is the most famous in history, and the center of the far-reaching empire's activities was located in the Forum, a low area between the Capitoline and Palatine hills in Rome. The topography held a great deal of significance for Romans, and consequently so many layers of myth were laid on top of the landscape and buildings that it is difficult to separate legend from actual historical fact. As a low-lying area near the Tiber river, the Forum was subject to much flooding, and even into the 20th century, the Forum area could flood upwards of over 40 feet above sea level. This would factor significantly in the imagination of Romans, who later ascribed the flooding with saving the city's founders, Romulus and Remus, from execution. However, in the 8th and 7th centuries B.C., this did not make for a good area for construction. Previous generations of excavators have concluded that in the beginning, there were wattle and daub huts in the Forum, as indicated by remains of organic food material, fragments of daub, and evidence of post holes dug in the ground for these structures. However, a recent environmental study has shown that such structures could not survive the flooding that was endemic to the Forum, suggesting that it took a few hundred years (during the period of the Roman kings) for the Romans to move up to 20,000 square meters of earth in order to reclaim land in the Forum, and a gravel pavement was placed on top of the landfill. If true, this project shows a high degree of organization and central planning. When the Colosseum was built in the late 1st century A.D., the Romans, a people known for their architectural acumen, managed to amaze themselves. Martial, a Roman poet writing during the inauguration of the Colosseum, clearly believed the Colosseum was so grand a monument that it was even greater than the other Wonders of the Ancient World, which had been written about and visited endlessly by the Romans and Greeks in antiquity. Indeed, although the Wonders were wondrous to behold, the Colosseum was a spectacular achievement in architecture, something new and innovative, and therefore an amazing Wonder in its own way. The Colosseum was designed to be both a symbol and show of strength by the famous Flavian emperors, most notably Vespasian and his sons Titus and Domitian. Vespasian had started the construction of the Colosseum shortly after becoming emperor in 69 A.D., but he died before he could present any spectacles in his giant amphitheatre. That honor went to his son Titus, who celebrated the inaugural opening in 80 A.D. with 100 days of games, despite the fact that the Colosseum was not completely finished. When his brother Domitian came to power in 81 A.D., he finished the amphitheatre, but not without making some changes to the overall design. By the time it was truly finished, the Colosseum stood about 150 feet tall, with the oval in the center stretching nearly two football fields long and over 500 feet across. The Colosseum is a

large stadium even by today's standards, and its great size conveys the power of the empire as it dominates the landscape and towers over nearby buildings. The modern world has the ancient Romans to thank for the origins of many modern technologies, conveniences, and ideas such as running water, baths, and republican style government, but roads are another influence the Romans have had on the modern world that are often taken for granted. Although Roman roads may not have attained the glamorous status of other inventions, their influence is just as profound; roads provide essential communication and transport lines for any country - they are the veins and arteries that move the life-blood of trade and peoples that make a country thrive.

Time Out Rome Editors of Time Out,2011-08-03 Written by local experts, Time Out Rome provides extensive coverage of the major sights — and then goes much further. Featuring everything from born-again trattorie to the burgeoning apertif trend, it offers visitors the chance to experience the Eternal City as the Romans do. History in Rome is not confined to museums, basilicas and galleries — it tumbles out everywhere. And though the city is reassuringly compact, this does not stop the cultural onslaught from being utterly bewildering and exhausting. While some travelers may have to face the fact that they probably won't see everything, it is also important not to shut oneself up inside all day looking at collections and sites or you will miss all that the outdoor scene has to offer. Time Out Rome helps travelers navigate through the cobblestone streets, so that they can eat, drink and shop like the natives. Suggested side trips out of town are also explored.
