You Twit Face: Your Complete Guide to Nomophobia Clay Sherrod,2016-11-11 Nomophobia - the fear of having our phones taken from us - is taking over our lives. The smart devices are in our homes, carried room-to-room as if glued to the hands of our family members. They meander into the bathroom, the laundry room, the shop, the garage, backyard and even into the bedroom where the adults once had their alone time. Our teenage children require them to

either be under their pillows, by their pillows or within arm's reach at a nightstand in order to even sleep at night. The cell phone must be visible for them to take tests at school without withdrawal anxiety. The phones travel where we do - school, the office, the gym, so that we are in constant contact with the virtual world - other people who also have no real lives outside of their phone. They are ringing in churches, movie theaters, restaurants, concerts, funerals. Nothing says goodbye to the recently departed like your ring tone from Metallica's Hardwired. Welcome to the world of smart phone addiction.

The Digital Factory Moritz Altenried,2022-01-05 The Digital Factory reveals the hidden human labor that supports today's digital capitalism. The workers of today's digital factory include those in Amazon warehouses, delivery drivers, Chinese gaming workers, Filipino content moderators, and rural American search engine optimizers. Repetitive yet stressful, boring yet often emotionally demanding, these jobs require little formal qualification, but can demand a large degree of skills and knowledge. This work is often hidden behind the supposed magic of algorithms and thought to be automated, but it is in fact highly dependent on human labor. The workers of today's digital factory are not as far removed from a typical auto assembly line as we might think. Moritz Altenried takes us inside today's digital factories, showing that they take very different forms, including gig economy platforms, video games, and Amazon warehouses. As Altenried shows, these digital factories often share surprising similarities with factories from the industrial age. As globalized capitalism and digital

technology continue to transform labor around the world, Altenried offers a timely and poignant exploration of how these changes are restructuring the social division of labor and its geographies as well as the stratifications and lines of struggle.
