The Farmers' Market Cookbook Nina Planck,2013-09-03 From the founder of London's first farmer's market, a guide to fresh produce—with recipes included—to make the most of your delicious fruits and veggies! Nina Planck grew up in Virginia, picking tomatoes, corn, beans, melons, and more on the family farm, and selling the fresh produce at farmers' markets. As an adult, she found herself living in London and—homesick for local food—she started London's first farmers' market in 1999. In *The Farmers' Market Cookbook*, Nina explains what the farmer knows about every vegetable from asparagus to zucchini—and what the cook needs to know. In more than thirty chapters, each dedicated to cooking with the freshest fruits and vegetables, Nina offers simple and delicious recipes for beef, pork, chicken, and fish, as well as a passel of ideas for perfect side dishes, soups, and desserts—all with produce in the lead role. Try roasted pork chops with apple and horseradish stuffing, blueberry almond crisp, and risotto with oyster mushrooms. Nina also offers tips only farmers would know, kitchen strategies, options for a surplus, advice on what to buy at the market and when, what to look for in an eggplant or a blueberry, and how to keep it all fresh. *The Farmers' Market Cookbook* is perfect for any cook who has stared helplessly at fresh produce, praying for inspiration. Includes a foreword by Nigel Slater Note: Some recipe information in this book appears in metric versions

Farmers Markets, Low Income Communities and Government Assistance Programs Alysha Brady, 2012 Since the passage in 1976 of the Farmer-to-Consumer Direct Marketing Act, there has been a sharp rise in number of farmers markets in this country, from approximately 600 in the 1970s to over 7,000 today. With this increase, farmers markets began to attract attention not only from farmers and consumers, but also from public policy experts. Some research has suggested that farmers markets may be a way to alleviate the poor access to healthy foods in low-income communities, in areas known as food deserts. The WIC Farmers Market Nutrition Program (FMNP) and the Seniors Farmers Market Nutrition Program (SFMNP) are both efforts to connect low-income individuals with farmers market produce. However, there is little data to suggest that farmers markets are located in food deserts often enough to have an impact. Additionally, previous research has shown that the average farmers market customer is an older, highly educated, middle-to-upper income female suggesting that low-income communities have not embraced farmers markets. This research seeks to shed more light on these issues. By combining data from a database of farmers markets maintained by the USDA's Agricultural Marketing Service, the food desert locator created by the USDA's Economic Research Service and demographic data collected by the 2006-2010 American Community Survey, this study provides a clearer vision of the community that farmers markets serve. The research reveals that farmers markets in a census tract are correlated with percentage of Hispanic population, percentage identifying as Some Other Race, percentage of households living in poverty and the percentage of households receiving SNAP/food stamps. However, there was no correlation between farmers markets and food deserts.
