Iraq's Insurgency and the Road to Civil Conflict Anthony H. Cordesman, Emma R. Davies, 2007-12-30

The war in Iraq has expanded from a struggle between Coalition forces and the remnants of former regime loyalists to a multi-faceted conflict involving numerous Sunni groups, Shi'ite militias, Kurdish nationals, and foreign jihadists. Iraq's Insurgency and the Road to Civil Conflict is Anthony Cordesman's latest assessment of the Iraqi conflict and documents its entire evolution, from the history of ethnic tensions through the current U.S. surge. He identifies each actor in the arena, analyzes their motivations, and presents a detailed record of their actions, tactics, and capabilities. Cordesman's exhaustive study, based on meticulous research, is the most thorough account of the war to date. Beginning with the consequences of imperial colonialism and touching upon the ethnic tensions throughout Saddam's regime, Cordesman examines and details the confluence of forces and events that have paved the way toward Iraq's current civil conflict. He analyzes major turning points, including elections, economic developments, and key incidents of violence that continue to shape the war. Finally, he outlines the lessons learned from this history and what can and cannot be done to stabilize the nation.

Research Methods for Public Administrators Gail Johnson, 2015-05-18 As in previous editions, this highly practical book is written with beginning MPA students and practitioners in mind. It focuses on the interpretation and use of research findings, not just number crunching. It covers the entire research process, from initial questions to final report, in clear, jargon-free language, and includes numerous easy-to-understand examples and exercises that provide opportunities for concrete applications of the concepts. It is solidly grounded in public administration and recognizes both the promise and limitations of research within a political environment. Key features of the book: --It is highly practical and written to accommodate a mix of readers: those who want to become analysts, managers who will oversee research contracts, and citizens who need to know whether to believe the facts and data they read in today's news; - -It minimizes the use of jargon and explains difficult concepts in clear language. Plentiful end-of-chapter exercises provide opportunities for concrete application of the concepts; --Key points are highlighted as takeaway lessons so readers are reminded about what really matters. The tough questions to ask are suggested in every chapter; --Examples and applications are used throughout the book to illustrate concepts and add topical interest; --It covers the entire research process, from initial questions to the final report. This book demystifies and makes practical the research every public administrator and policy analyst needs to do the job well. Online instructor's materials, including a Test Bank, PowerPoint slides, and a Survey and Documental Analysis (SDA) guide, are also available to adopters.

Christopher Hitchens Ben Burgis, 2021-12-31 While his post-9/11 turn to the right has defined Christopher Hitchens for the last two decades, we may now be in a position to rehabilitate his long pre-9/11 career as a left-wing polemicist. Burgis reminds readers about what was best in Hitchens's writings and helps us gain a better understanding of how someone whose whole political life was animated by the values of the socialist left could have ended up holding grotesque positions on Iraq and the War on Terror.

Burgis' book makes a case for the enduring importance of engaging with Hitchens' complicated legacy.

International Perspectives on Social Justice in Mathematics Education Bharath Sriraman, 2007-12-01

International Perspectives and Research on Social Justice in Mathematics Education is the highly acclaimed inaugural monograph of The Montana Mathematics Enthusiast now available through IAP. The book covers prescient social, political and ethical issues for the domain of education in general and mathematics education in particular from the perspectives of critical theory, feminist theory and social justice research. The major themes in the book are (1) relevant mathematics, teaching and learning practices for minority and marginalized students in Australia, Brazil, South Africa, Israel, Palestine, and the United States., (2) closing the achievement gap in the U.K, US and Iceland across classes, ethnicities and gender, and (3) the political dimensions of mathematics. The fourteen chapters are written by leading researchers in the international community interested and active in research issues of equity and social justice.

Iraq: Genocide by Sanctions (Penerbit USM) Christian P Scherrer, 2014-11-25 Genocide by Sanctions explores the criminal abuse of UN sanctions. Evidence of a planned and systematically created giant infanticide is uncovered. US bombing in 1991 destroyed Iraq's water purification, sewages, and electricity plants to run them. The ensuing mass death of Iraqi babies and children was measured by experts who are among the authors.

Interdisciplinary Educational Research In Mathematics and Its Connections to The Arts and Sciences

Bharath Sriraman, Claus Michelsen, Astrid Beckmann, Viktor Freiman, 2008-09-01 The book is based on the recently held Symposium on mathematics and its connections to the arts and sciences, namely the second Mathematics and its Connections to the Arts and Sciences (MACAS2) Symposium in Odense, Denmark (May 29-31, 2007). The chapters are an eclectic collection of interdisciplinary research initiatives undertaken by mathematics educators with implications for practitioners concerned with teaching and learning processes. The papers cover a wide genre of research domains within mathematics education (cognition, modelling, problem solving, teacher education, ethnomathematics, mathematical/statistical literacy, curricular and technological initiatives and research related to science education). The major interdisciplinary themes of the papers in this book are: 1. How can modelling activities be used to foster interdisciplinary projects in the school and university setting? 2. How can the intricate connections between mathematics and physics be used to design and research interdisciplinary activities in schools and the university? 3. How can research within the ethnomathematics domain of mathematics education be linked to critical mathematics education and interdisciplinary projects involving mathematics, art and culture? 4. How can the push for mathematical and statistical literacy be connected to other subjects in the school curricula and emphasized via interdisciplinary activities? 5. What are concrete examples of classroom experiments with empirical data that demonstrate new and unusual connections/relations between mathematics, arts and the sciences with implications for pedagogy? 6. What is the role of technology and new ICT interfaces in linking communities of learners in interdisciplinary activities involving problem solving? The book is an important contribution to the literature on educational initiatives in interdisciplinary education increasing vital for emerging professions of the 21st century.
