Fast-Forwarding with Audiovisual Translation

Jorge Díaz Cintas,Kristijan Nikolić,2017-12-14 This edited collection offers a rounded vision of some of the ways in which audiovisual translation (AVT) can be approached from an academic, professional and educational point of view. The studies provide a stimulating and thought-provoking account of some of the most representative themes that are currently being researched in the field of AVT, while also highlighting new directions of potential research from a cognitive perspective. A conscious effort has been made to cover not only cultural and linguistic approaches to traditional domains of AVT (such as dubbing and subtitling), but also to look into lesser known areas of research that are attracting substantial interest from various stakeholders and gradually becoming part of the remit of AVT (including subtitling for the deaf and audio description for the blind). In this respect, the chapters of this book tackle the field of AVT from a plural, comprehensive and up-to-date perspective; speak of a rich and complex academic subject in the making; broaden our existing knowledge on AVT; reflect the many crossroads and junctions it currently faces and outline some of the issues that will become topical in the near future in this fascinating, flourishing discipline.

Quality In Professional Translation Joanna Drugan,2013-02-28 How do translation companies, multilingual international organizations and individual translators measure and improve the quality of their translations? This book reports on the range of approaches to quality assurance across the translation industry, from Norway to China, from the individual freelance working in a home office to the largest translation supplier in the world. Best practice is outlined for a range of translation scenarios, enabling readers to learn from others' experience - and

mistakes. The author also draws on over a decade's experience to outline the potential to improve quality by exploiting modern technological support tools such as translation memory software. New and experienced translators will gain understanding of what employers expect (and reward); translation companies can learn how their peers and rivals manage this sensitive area of their work; clients will find out what levels of quality they can expect; and academics are provided with an illuminating insight into how quality is assessed and guaranteed in the profession today.

Professional Issues for Translators and

Interpreters Deanna L. Hammond,1994-09-06 This volume brings both beginning and experienced translators and interpreters up to date on a broad range of issues. The seven sections take up success and survival strategies for a language professional, including the challenges posed by the changing global economy, the impact of new technologies, adjustments required by a different legal environment and traditional ethical practices. Such challenges and changes point to a need for continuing education and networking and for newcomers specialized postsecondary training. The issues are as broad as the translator and interpreter's role in the modern world, as detailed as advice on setting up a workstation or choosing a degree program. The contributors, all practicing translators and interpreters, discuss also the value of the Association and its Committees to the profession and its individual members.

Research and Professional Practice in Specialised Translation Federica Scarpa,2020-09-18 Specialised translation has received very little attention from academic researchers, but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university-level translation programmes. This book aims to provide three things. Firstly, it offers a description of what makes the approach to specialised translation distinctive from wider-ranging approaches to Translation Studies adopted by translation scholars and applied linguists. Secondly, unlike the traditional approach to specialised translation, this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised (translated) texts. Finally, the author outlines a professionally-oriented hands-on approach to the teaching of specialised translation resulting from many years of teaching it to MA students. The book will be of interest to Translation Studies students and scholars, as well as professional translators who are interested in the theory on which their activity is based.

These are the words of Boris Pasternak (1890-1960), a Russian Poet, Novelist and Translator. The

key to translation is not only understanding and being fluent in more than one language and having an understanding of language and culture, but also being able to convey the meaning of the text in one language into the other. However, just the knowledge of different languages is not enough to succeed in the competing world scene of translation. Through the immense development of the Internet, information technology, and ongoing globalization, "translation complexity takes a quantum leap" and forces today's translators to use computer technology, advanced software applications, and computer-aided translation tools to meet enhanced translation requirements in a timely manner. In order to be successful translator in today's fast turn around times, the knowledge of and skills in different translation facilitating programs are essential. Translation is a difficult process, which requires computer and software skills in addition to proficiency. The translation business is quickly becoming one of the fastest growing markets in the world, and as a result, translators must develop efficiencies in their processes to meet the increasing demand and to be able to offer competitively priced services. The purpose of this thesis is to analyze the major translation tools available in the marketplace and to illustrate how they benefit the translator in multiple ways. This thesis will combine the essential knowledge of these different software tools and provide the important criteria required to choose the appropriate foreign language translation software.
