Fast-Forwarding with Audiovisual Translation Jorge Díaz Cintas, Kristijan Nikolić, 2017-12-14 This edited collection offers a rounded vision of some of the ways in which audiovisual translation (AVT) can be approached from an academic, professional and educational point of view. The studies provide a stimulating and thought-provoking account of some of the most representative themes that are currently being researched in the field of AVT, while also highlighting new directions of potential research from a cognitive perspective. A conscious effort has been made to cover not only cultural and linguistic approaches to traditional domains of AVT (such as dubbing and subtitling), but also to look into lesser known areas of research that are attracting substantial interest from various stakeholders and gradually becoming part of the remit of AVT (including subtitling for the deaf and audio description for the blind). In this respect, the chapters of this book tackle the field of AVT from a plural, comprehensive and up-to-date perspective; speak of a rich and complex academic subject in the making; broaden our existing knowledge on AVT; reflect the many crossroads and junctions it currently faces and outline some of the issues that will become topical in the near future in this fascinating, flourishing discipline.

Overview of Translation Tools - Benefits of Translation Memory Management Software for an International Company Marina Carrillo, 2007-07-07 Diploma Thesis from the year 2007 in the subject Computer Science - Software, grade: 2,3, University of Applied Sciences Ansbach, 60 entries in the bibliography, language: English, abstract: "TRANSLATION is very much like copying paintings." These are the words of Boris Pasternak (1890-1960), a Russian Poet, Novelist and Translator. The key to translation is not only understanding and being fluent in more than one language and having an understanding of language and culture, but also being able to convey the meaning of the text in one language into the other. However, just the knowledge of different languages is not enough to succeed in the competing world scene of translation. Through the immense development of the Internet,

information technology, and ongoing globalization, “translation complexity takes a quantum leap” and forces today’s translators to use computer technology, advanced software applications, and computer-aided translation tools to meet enhanced translation requirements in a timely manner. In order to be successful translator in today’s fast turn around times, the knowledge of and skills in different translation facilitating programs are essential. Translation is a difficult process, which requires computer and software skills in addition to proficiency. The translation business is quickly becoming one of the fastest growing markets in the world, and as a result, translators must develop efficiencies in their processes to meet the increasing demand and to be able to offer competitively priced services. The purpose of this thesis is to analyze the major translation tools available in the marketplace and to illustrate how they benefit the translator in multiple ways. This thesis will combine the essential knowledge of these different software tools and provide the important criteria required to choose the appropriate foreign language translation software.

How to Be a Successful Freelance Translator Robert Gebhardt, 2014-04-15
Freelance translation is fast growing to be one of the best opportunities for people who wish to work from home. A combination of an economic downturn resulting in a difficulty in finding new jobs, near-universal access to the Internet, and the ever-increasing globalization of businesses and organizations, leads to a perfect storm of opportunity for those who speak more than one language. According to Commons Sense Advisory, a consulting firm, the translation, interpreting and localization industry has revenues of \$37 billion per year, and it continues to grow. Translators can now earn a great living in ways that were unimaginable just 10-15 years ago. You can get paid to translate documents for the clients you choose, during the hours you choose, and wearing the clothes that you choose. Unfortunately, many

translators will miss this opportunity because freelance translation means an entire new process that no course or school teaches. Do you know where to find clients? How do you discern the useful clients from the wastes of time? How can you make sure they pick you as a translator? How will you get paid, and get paid in time? How can you avoid working for a pittance? You've learned your language, and this book concentrates on everything else. It walks you through the process of becoming a successful freelance translator, from preparation, to being chosen, to the translation process, to getting paid, and even to expansion - if you want to see how far you can take your translation business. Cross-Cultural Neuropsychological Assessment Victor Nell, 1999-11-01 This is a book for all neuropsychologists who are called upon to assess culturally different clients--with very few exceptions today, this means every neuropsychologist. In Minneapolis as in Oslo, migrant and refugee minorities raise assessment and test validity problems that cannot be ignored. To deal realistically with the problem of doing neuropsychological assessments without norms, Nell describes the principles of a behavioral neuropsychology, and then sets out interview, test, and interpretation methods that will allow clinicians to produce valid and prognostically accurate assessments. For working neuropsychologists, this is an intensely practical, how-to-do-it book. But unlike other hands-on guides, it lays an impressive historical and theoretical foundation for the practice of cross-cultural neuropsychology. It

thus speaks to serious practitioners who need to be certain that their assessment findings are not only correct, but also sufficiently well-grounded to stand up to professional scrutiny and to forensic testing in a court of law.
