Network and Operating Systems Support for Digital Audio and Video Thomas D.C. Little,Riccardo Gusella,1995-11-30 The prevailing orthodoxy according to which all macroeconomic theory should be reducible to microeconomics is criticized. Such a dogma excludes from economics the creation of new knowledge, which - as distinguished from the mere transmission of knowledge in education and training - is a social process not reducible to microeconomics. A mathematical extension of the Lucas theory to allow for the effects of creation of knowledge upon economic development is shown to improve essentially the prediction of business cycle data, when compared with the conventional real business cycle models of Kydland and Prescott, Hansen and Rogerson, and Danthine and Donaldson.

Filling the Void Marcus Gilroy-Ware,2017-04-18 Filling The Void is a book about how the cultures and psychology of social media use fit within a broader landscape of life under capitalism. It argues that social media use is often a psychological response to the need for pleasure and comfort that results from the stresses of life under postmodern capitalism, rather than being a driver of new behaviours as newer technologies are often said to be. Both the explosive growth of social media and the corresponding reconfiguration of the web from an information-based platform into an entertainment-based one are far more easily explained in terms of the subjective psychological experience of their users as capitalist subjects seeking 'depressive hedonia,' the book argues. Filling the Void also interrogates the role of social media networks, designed for private commercial gain, as part of a de-facto public sphere. Both the decreasing subjective importance of factual media and the ways in which the content of the timeline are quietly manipulated--often using labour in the developing world and secret algorithms--have potentially serious implications for the capacity of social media users to query or challenge the seeming reality offered by the established hegemonic order.

Rethinking Social Media and Extremism Shirley Leitch,Paul Pickering,2022-06-28 Terrorism, global pandemics, climate change, wars and all the major threats of our age have been targets of online extremism. The same social media occupying the heartland of our social world leaves us vulnerable to cybercrime, electoral fraud and the 'fake news' fuelling the rise of far-right violence and hate speech. In the face of widespread calls for action, governments struggle to reform legal and regulatory frameworks designed for an analogue age. And what of our rights as citizens? As politicians and lawyers run to catch up to the future as it disappears over the horizon, who guarantees our right to free speech, to free and fair elections, to play video games, to surf the Net, to believe 'fake news'? Rethinking Social Media and Extremism offers a broad range of perspectives on violent extremism online and how to stop it. As one major crisis follows another and a global pandemic accelerates our turn to digital technologies, attending to the issues raised in this book becomes ever more urgent.

Everybody Fights Kim Holderness,Penn Holderness,2021-03-30 A USA Today and Wall Street Journal bestseller! Learn how to fight better and end your arguments with your partner feeling closer, more loved, and better understood. We take our cars in for oil changes. We mow our lawns and pull weeds. Why don't we do maintenance on our marriages? This relationship is the most important one we will ever have, so why not get better at it? For the last several years, Penn and Kim Holderness of The Holderness Family have done the hard maintenance and the research to learn how to fight better. With the help of their marriage coach Dr. Christopher Edmonston, they break down their biggest (and in some cases, funniest) fights. How did a question about chicken wings turn into a bra fight (no, not a bar fight or a bra fight)? How did a roll of toilet paper lead to tears, resentment, and a stint in the guest bedroom? With their trademark sense of humor and complete vulnerability, Penn and Kim share their 10 most common Fight Fails and how to combat them. Throughout the book, they offer scripts for how to start, continue, and successfully close hard conversations. Couples will emerge equipped to engage and understand, not do battle—and maybe laugh a little more along the way. In Everybody Fights, couples will learn how to: Use magic words for healthy conflict resolution Address unspoken and unrealistic expectations Banish the three Ds of unhealthy communication—distraction, denial, and delay Carry individual baggage while helping your partner deal with theirs Penn and Kim want you to know you're not alone. Everybody fights. Marriage is messy. Marriage is work. But marriage is worth it. Fight for it!

Four Battlegrounds: Power in the Age of Artificial Intelligence Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must-Read Books An invaluable primer to arguably the most important driver of change for our future. —P. W. Singer, author of Burn-In An award-winning defense expert tells the story of today's great power rivalry—the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives—and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. Four Battlegrounds argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power—control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best researchers and most advanced technology companies? The fourth "battlefield" is maybe the most critical: the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy, society, and especially their military. Scharre's account surges with futuristic technology. He explores the ways AI systems are already discovering new strategies via millions of war-game simulations, developing combat tactics better than any human, tracking billions of people using biometrics, and subtly controlling information with secret algorithms. He visits China's "National Team" of leading AI companies to show the chilling synergy between China's government, private sector, and

surveillance state. He interviews Pentagon leadership and tours U.S. Defense Department offices in Silicon Valley, revealing deep tensions between the military and tech giants who control data, chips, and talent. Yet he concludes that those tensions, inherent to our democratic system, create resilience and resistance to autocracy in the face of overwhelmingly powerful technology. Engaging and direct, Four Battlegrounds offers a vivid picture of how AI is transforming warfare, global security, and the future of human freedom—and what it will take for democracies to remain at the forefront of the world order.
