Republic of Latvia International Monetary Fund. European Dept.,2022-08-23 The economy fared relatively well during the pandemic, but the war in Ukraine is another major shock. The key vulnerabilities are Latvia's significant reliance on imported gas from Russia until recently, the impact of high international energy prices on inflation and economic activity, and refugee inflows. Thus far, almost 33,000 refugees have entered Latvia. Parliamentary elections later this year may put pressure on the government budget.

Corporate Governance in Latvia OECD,2017-03-20 This review was prepared as part of the process of Latvia's accession to OECD membership.

Republic of Latvia International Monetary Fund. European Dept.,2013-01-28 Latvia has rebounded from the crisis, after successfully undertaking a difficult adjustment program. The recovery has been well balanced between external and domestic demand. The labor market is improving but unemployment is still high. Past consolidation efforts have brought down the fiscal deficit. The banking system is recovering. Nonresident deposits in the banking system have been expanding rapidly. Economic growth is expected to weaken slightly in 2013, before picking up later. Euro adoption in 2014 appears within reach, subject to some technical uncertainties.

The Carbon Fix Stephanie Paladino, Shirley J Fiske,2016-11-18 Given the growing urgency to develop global responses to a changing climate, The Carbon Fix examines the social and equity dimensions of putting the world's forests—and, necessarily, the rural people who manage and depend on them—at the center of climate policy efforts such as REDD+, intended to slow global warming. The book assesses the implications of international policy approaches that focus on forests as carbon and especially, forest carbon offsets, for rights, justice, and climate governance. Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance, placing it into conceptual, critical, and historical context. The book then challenges perceptions of forest carbon initiatives through in-depth, field-based case studies assessing projects, policies, and procedures at various scales, from informed consent to international carbon auditing. While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals, the authors present compelling evidence for the complexities of the carbon offset enterprise, fraught with competing interests and interpretations at multiple scales, and having unanticipated and often deleterious effects on the resources and rights of the world's poorest peoples—especially indigenous and rural peoples. The Carbon Fix provides nuanced insights into political, economic, and ethical issues associated with climate change policy. Its case approach and fresh perspective are critical to environmental professionals, development planners, and project managers; and to students in upper level undergraduate and graduate courses in environmental anthropology and geography, environmental and policy studies, international development, and indigenous studies.

Annual Report on Exchange Arrangements and Exchange Restrictions 2011 International Monetary Fund. Monetary and Capital Markets Department,2011-10-25 Published since 1950, this authoritative, annual reference is based upon a unique IMF database that tracks exchange and trade arrangements for all 186 IMF member countries, along with Hong Kong SAR, Aruba, and the Netherlands Antilles. The Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER) draws together information available to the IMF from a number of sources, including during official IMF staff visits to member countries. There is a separate chapter for each of the 189 countries included, and these are presented in a clear, easy-to-read tabular format. A summary table allows for simple cross-

country comparisons of key features of their exchange and trade regimes. The report's introduction summarizes recent global trends and developments. It discusses such topical issues as exchange rate arrangements, current or capital transactions, or prudential regulations. The individual country chapters outline exchange measures in place, the structure and setting of exchange rates, arrangements for payments and receipts, procedures for resident and nonresident accounts, mechanisms for import and export payments and receipts, controls on capital transactions, and provisions specific to the financial sector. The report now provides more detailed information on the operations of foreign exchange markets and exchange rate mechanisms and better describes the regulatory framework for current and capital account transactions.

Trends in State Courts 2020 Charles Campbell, John Holtzclaw, 2020-07-14 Trends in State Courts is an annual, peer-reviewed publication that highlights innovative practices in critical areas that are of interest to courts, and often serves as a guide for developing new initiatives and programs and supporting policy decisions. This year's Trends looks at leading during a pandemic, virtual remote interpreting, online dispute resolution, case management systems, new data systems for drug treatment courts, legal icons as a plain language tool, family justice initiative, the impact of labeling youth sexual offenders, parental alienation, divorces among senior citizens, state court collaboration across systems, what happens when a judge's personal opinion collides with the law, building trust, and racial justice.

Concrete Solutions 2011 Michael Grantham, Viktor Mechtcherine, Ulrich Schneck, 2011-09-08 The Concrete Solutions series of International Conferences on Concrete Repair began in 2003, with a conference held in St. Malo, France in association with INSA Rennes, followed by the second conference in 2006 (with INSA again, at St. Malo, France), and the third conference in 2009 (in Padova and Venice, in association with the University of Pado

Republic of Latvia International Monetary Fund, 2012-02-07 Latvia's economy continues to recover, but the worsening global outlook is likely to hurt growth. Implementation of the program has made the economy more robust to shocks, but risks remain that could derail the recovery and the goal of euro adoption. Spillovers from the euro area crisis could increase—reducing growth and increasing capital outflows—and complicate plans to tap international capital markets. The authorities' macroeconomic strategy has centered on substantial wage and price cuts and productivity growth to improve competitiveness and reduce external imbalances.

Republic of Latvia International Monetary Fund. Strategy, Policy, & Review Department, 2013-01-28 The IMF has approved an exceptional access Stand-By Arrangement for Latvia. The program is part of a coordinated international effort that has improved financial and economic stability. By early 2008, the fast growth has leveled off but severe vulnerabilities turned the slowdown into a crisis. Immediate steps to stabilize the financial sector and help stem reserve losses has focused on resolving the systemic Parex Bank, which is experiencing a deposit run. Measures to ensure long-term external viability has focused on fiscal and income policies.

Under the canopy Marianne Schmink, Marliz Arteaga Gómez-García, 2015-06-08 Despite the importance of forests for global processes and the tradition of forest management by local Amazonian peoples, there is not much available literature on gender and forests in the Amazon region. Yet gender roles and relationships are important components of key emerging forest-related issues, such

as climate change and the differential risks and opportunities faced by women and men in different contexts. This paper reviews recent literature (in English, Spanish and Portuguese) that addresses gender and forests in Amazonia, focusing on: property rights in Amazonian territories and communities; diverse and changing gender relations; forest management programs; and women's participation in social movements and organizations. The review finds significant historical, sociocultural and material barriers to gender equity and to women's full participation in sustainable management of Amazonian forests, and a relative lack of focus on gender in forest management programs, despite promising examples. The most important finding was that, over the past two decades, women from different Amazonian social groups have become increasingly organized, enhancing their rights, levels of participation and empowerment. More research is needed to understand the variability of gender relations and rights in different Amazonian contexts, and how they are changing. Research is also needed to understand and support efforts to improve gender equity in rights to resources and income and participation in key community and societal decisions on the future of Amazonian forests and their peoples.

Community Forestry in Nepal Richard Thwaites,Robert Fisher,Mohan Poudel,2017-12-11 Community forestry focuses on the link between forest resources and livelihoods and contributes to forest conservation and reforestation. It is widespread in Nepal, with a very high proportion of the rural population involved, and is widely recognized as one of the most successful examples of community forestry in Asia. Through a combination of literature reviews and original research, this volume explores key experiences and outcomes of community forestry in Nepal over the last four decades as a model for improving forest management and supporting local livelihoods. The book takes a critical approach, recognizing successes, especially in forest conservation and restoration, along with mixed outcomes in terms of poverty reduction and benefits to forest users. It recognizes the way that community forestry has continued to evolve to meet new challenges, including the global challenges of climate change, environmental degradation and conservation, as well as national demographic and social changes due to large-scale labour migration and the growing remittance economy. In addition to examining the changes and responses, the book explores ways that community forestry in Nepal might move forward. Lessons from Nepal have relevance to community forestry and community-based approaches to natural resource management around the world that are also experiencing global pressures and opportunities.

Japan International Monetary Fund, 2012-08-01 The macroeconomic environment of Japan has constantly been under pressure owing to rising public debt and fiscal deficits. Credit demand has been limited and has shown weak profitability. Growing risks have heightened concerns about a possible feedback to financial stability. This report summarizes the findings of the financial sector stability assessment of Japan. The Executive Board recommends a broad-based financial reform plan that could contribute to private sector growth. Suggested measures included allocating market-based credit to SMEs, improving the framework for capital markets, and consolidating and streamlining of regional banks.
