Super PACs Louise I. Gerdes, 2014-05-20 The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others.

Intercity Passenger Rail Transportation David Ewing, William Gallagher, American

Association of State Highway and Transportation Officials. Standing Committee on Rail Transportation,2002 This report addresses the public benefits and investment needs of intercity passenger rail transportation. AASHTO has published an investment needs report for highways and transit, and intends to publish a report on freight rail investment needs. Cost estimates for intercity passenger rail investment presented in this report were developed independently from those contained in the freight rail report. In combination, these reports provide a complete picture of the benefits of the various surface transportation modes to the U.S. and the value to be realized by both the traveling public and shippers through strategic investments.

Speedliter's Handbook Syl Arena,2010-12-19 Getting your Canon Speedlite to produce the light you need can be a real challenge. For those new to flash photography—or for anyone who has previously given up out of frustration—Speedliter’s Handbook is a revelation. Photographer Syl Arena takes you on a journey that begins with an exploration of light and color, moves through a comprehensive discussion of the Canon Speedlite family and all of the accessories and equipment available to the Speedliter, then settles down to crafting great light in one photo shoot after another. Whether you want to create a classical portrait, shoot an event, or simply add a little fill light to a product shot, Speedliter’s Handbook shows you how. A fantastic in-depth resource illustrated with over 500 images, Speedliter’s Handbook covers: how to see the various characteristics and properties of light itself, as well as the differences between how your camera sees versus how you see all the buttons and dials of the entire Canon Speedlite family the basics of on-camera flash...and the necessity of getting your flash off the camera how to beautifully balance flash with the

existing ambient light all the equipment necessary for great Speedlite shots how to get amazing shots with just one Speedlite how and when to use E-TTL versus manual flash the use of color gels to balance color, as well as create dramatic effects how to tame the sun—or any really bright light—with hi-speed sync and much, much more Whether you're shooting portraits, events, or sports, Speedlites Handbook is an essential resource that teaches you how to craft the light you need for any type of shot you want.

Vision Models for Target Detection and Recognition Eli Peli, 1995 This book is an international collection of contributions from academia, industry and the armed forces. It addresses current and emerging Spatial Vision Models and their application to the understanding, prediction and evaluation of the tasks of target detection and recognition. The discussion in many of the chapters is framed in terms of military targets and military vision aids. However, the techniques analyses and problems are by no means limited to this area of application. The detection and recognition of an armored vehicle from a reconnaissance image are performed by the same visual system used to detect and recognize a tumor in an X-ray. The analysis of the interaction of the human visual system with night vision devices is not different from the analysis needed in the case of an operator examining structures using a remote (endoscopic) camera, etc. The book is organized into three general sections. The first covers basic modeling of central (foveal) vision and its theoretical background. The second is centered on the evaluation of model performance in applications, while the third is dedicated to aspects of peripheral vision modeling and the

expansion of peripheral modeling to include visual search.

Republic, Lost Lawrence Lessig, 2015-10-20 Revised and updated for the 2016 election with 75% new material. In an era when special interests funnel huge amounts of money into our government-driven by shifts in campaign-finance rules and brought to new levels by the Supreme Court in *Citizens United v. Federal Election Commission*-trust in our government has reached an all-time low. More than ever before, Americans believe that money buys results in Congress, and that business interests wield control over our legislature. With heartfelt urgency and a keen desire for righting wrongs, Harvard law professor Lawrence Lessig takes a clear-eyed look at how we arrived at this crisis: how fundamentally good people, with good intentions, have allowed our democracy to be co-opted by outside interests, and how this exploitation has become entrenched in the system. Rejecting simple labels and reductive logic-and instead using examples that resonate as powerfully on the Right as on the Left-Lessig seeks out the root causes of our situation. He plumbs the issues of campaign financing and corporate lobbying, revealing the human faces and follies that have allowed corruption to take such a foothold in our system. He puts the issues in terms that nonwonks can understand, using real-world analogies and real human stories. And ultimately he calls for widespread mobilization and a new Constitutional Convention, presenting achievable solutions for regaining control of our corrupted-but redeemable-representational system. In this way, Lessig plots a roadmap for returning our republic to its intended greatness. While America may be divided, Lessig vividly champions the idea that we can succeed if we accept that corruption is our common enemy and that we must find a way to fight against it. In *REPUBLIC, LOST*, he not only makes this need

palpable and clear-he gives us the practical and intellectual tools to do something about it.

No Fear Tony Perkins,2015-09-08 This book heralds a new generation of Christians who are more than bold...they are fearless! *No Fear* draws you inside the stories of young, ordinary believers who, despite incredible opposition, courageously stand up for God's truth. Tony Perkins pairs each story with a biblical example and gives practical ideas for building a "no fear" perspective every day. Today, followers of Jesus Christ face more opposition to their beliefs than any generation in American history. Yet even in such a hostile cultural and political environment, it is an exciting time to stand firm in the faith. You have been chosen to live in this important hour, and reading these stories will inspire you to the same kind of courage. So what are you waiting for? "Tony Perkins has discovered a new generation of young people who love following God more than the crowd...You will discover there is still hope for America and the world after reading their stories in *No Fear*!" —Todd Starnes, Fox News Channel "No Fear...is a must-read book that will inspire a courageous heart in tomorrow's movers and shakers. —Dana Loesch, nationally syndicated radio host, author, host BlazeTV "As the world continues to spiral into an anti-Christian age, it's important to empower our young people with the strength and conviction to hold fast to the teachings of Christ, and *No Fear* does just that." —Dr. Jack Graham, Senior Pastor, Prestonwood Baptist Church Includes discussion questions after each chapter.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and

organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
