The BBC German Service during the Second World War Vike Martina Plock,2021-09-16 This book, part media history and part group biography, tells the story of the BBC's attempts to reach out to listeners in Nazi Germany at a time when Anglo-German relations were particularly strained. Who were the individuals behind the microphone, whose names could only be mentioned in whispered conversations on the continent? Who wrote the satirical sketches that offered comic relief to housewives struggling to obtain enough food to feed their families? And who made decisions about programme delivery and staffing? Drawing extensively on previously unexamined archival material, *The BBC German Service during the Second World War: Broadcasting to the Enemy* sheds light on the complex, often difficult working arrangements at the wartime BBC where people from different nationalities and socio-political backgrounds collaborated and argued about the delivery of an effective propaganda programme that would assist the Allies in defeating the Nazis.

Handbook of Climate Change Across the Food Supply Chain Walter Leal Filho,Ilija Djekic,Sergiy Smetana,Marina Kovaleva,2022-04-22 This book presents climate change as a global phenomenon which affects the entire food chain. Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change. Most of them associate primary production with emission of greenhouse gasses identified as one of the causes resulting in warming the atmosphere and global climate effects. A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline. This approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change. On the other side, temperature changes and variations of precipitation patterns, together with extreme weather events and water reduction, are recognized as predictors for producing less food, decreased food quality, new food safety risks, biodiversity losses, and depletion of resources associated with food production in modified circumstances. Last but not least, these effects introduce new threats known as food security where some assumptions stress that almost one billion of people are hungry not receiving enough food as a result of climate changes. As a result, the UN highlights the need for combating climate change and promotes sustainable (food) consumption and production. Based on the perceived need to promote and disseminate information on climate change related to food system, the “Handbook of Climate change across the food supply chain” is being produced. The publication compiles information, experiences, practical initiatives, and projects around the subject matter and makes it available to a wide audience. It is expected that the “Handbook of Climate change across the food supply chain” makes many benefits of climate service clearer and, inter alia, leads to an increase in the demand for such important services.

This is the BBC Simon J. Potter,2022-04-14 In the hundredth year of the British Broadcasting Corporation, historian Simon J. Potter looks back over the hundred year history, asking if the BBC is really the 'voice of Britain', and what comes next for British public broadcasting. 2022 marks the centenary year of the British Broadcasting Corporation. As Britain's most famous and influential broadcaster, the BBC faces a range of significant challenges to the way it operates, and perhaps to its existence, from the government but also from a rapidly changing media environment. Historian Simon J. Potter explores the hundred year history of this corporation, drawing out the roots of these challenges and understanding how similar threats - hostile politicians and prime ministers, the advent of television - were met and overcome in the past. Potter poses the question 'Is the BBC the voice of Britain?', exploring its role in changing wider culture and society, promoting particular versions of British national identity, both at home and overseas. The BBC has long claimed to speak for the British people, to the British people, and with a British accent, and Potter explores how far these claims have been justified with this exciting new study which covers the establishment of the BBC Empire Service and the World Service, and focuses on people, programmes, and politics to understand the Corporation's engagement with changing ideas about culture and society in Britain, including issues of class, gender, and race.

The BBC David Hendy,2022-03-29 The first in-depth history of the iconic radio and TV network that has shaped our past and present. Doctor Who; tennis from Wimbledon; the Beatles and the Stones; the coronation of Queen Elizabeth and the funeral of Diana, Princess of Wales: for one hundred years, the British Broadcasting Corporation has been the preeminent broadcaster in the UK and around the world, a constant source of information, comfort, and entertainment through both war and peace, feast and famine. The BBC has broadcast to over two hundred countries and in more than forty languages. Its history is a broad cultural panorama of the twentieth century itself, often, although not always, delivered in a mellifluous Oxford accent. With special access to the BBC's archives, historian David Hendy presents a dazzling portrait of a unique institution whose cultural influence is greater than any other media organization. Mixing politics, espionage, the arts, social change, and everyday life, *The BBC* is a vivid social history of the organization that has provided both background commentary and screen-grabbing headlines—woven so deeply into the culture and politics of the past century that almost none of us has been left untouched by it.

Fifty Things that Made the Modern Economy Tim Harford,2017-07-06 Based on the series produced for the BBC World Service Who thought up paper money? How did the contraceptive pill change the face of the legal profession? Why was the horse collar as important for human progress as the steam engine? How did the humble spreadsheet turn the world of finance upside-down? The world economy defies comprehension. A continuously-changing system of immense complexity, it offers over ten billion distinct products and services, doubles in size every fifteen years, and links almost every one of the planet's seven billion people. It delivers astonishing luxury to hundreds of millions. It also leaves hundreds of millions behind, puts tremendous strains on the ecosystem, and has an alarming habit of stalling. Nobody is in charge of it. Indeed, no individual understands more than a fraction of what's going on. How can we make sense of this bewildering system on which our lives depend? From the tally-stick to Bitcoin, the canal lock to the jumbo jet, each invention in Tim Harford's fascinating new book has its own curious, surprising and memorable story, a vignette against a grand backdrop. Step by step, readers will start to understand where we are, how we got here, and where we might be going next. Hidden connections will be laid bare: how the barcode undermined family corner shops; why the gramophone widened inequality; how barbed wire shaped America. We'll meet the characters who developed some of these inventions, profited from them, or were ruined by them. We'll trace the economic principles that help to explain their transformative effects. And we'll ask what lessons we can learn to make wise use of future inventions, in a world where the pace of innovation will only accelerate.
