A Road Map for Shymkent–Tashkent–Khujand Economic Corridor Development Asian Development Bank, 2021-01-01 Economic corridor development (ECD) is pursued by developing member countries of the Asian Development Bank to spur economic growth. In Central Asia, ECD is being piloted as potential is immense but remains largely untapped. It proposes specific action plans for six intertwined thematic areas. An institutional framework to operationalize the STKEC development is also presented, along with possible investment projects in bordering cities and oblasts of the three countries.

Crisis Management Challenges in Kaliningrad Eugene Krasnov, Anna Karpenko, 2016-04-22 Crisis Management Challenges in Kaliningrad captures the evolving nature of the types of crises faced by a society as it transforms and evolves. Once the westernmost bastion of the Soviet Union and now the westernmost part of the Russian Federation, the Kaliningrad Oblast remains cut off from direct land communication with mainland Russia and provides a condensed, real-life laboratory in which to observe changing political, technological and economic priorities in Post-Soviet society. Expert contributors from the region chart the tensions, problems and opportunities created by the collapse of the Soviet Union in December 1991 and examine the change in status and situation of the Kaliningrad Oblast. By looking at a selection of economic, environmental and social crises a historical link between the Soviet and Post-Soviet eras is formed and rigorously examined.

Industrial Clusters, Upgrading and Innovation in East Asia Akifumi Kuchiki, Masatsugu Tsuji, 2011-01-01 This lucid and informative book analyzes the problems of clusters in transition through studies of agglomerations at different stages of development in various East Asian countries. The contributors reconsider industrial cluster policy within a more dynamic and long-term framework, and explore how regional transformations can bring new insights to the theory of agglomeration and innovation. By identifying the factors and policies to promote upgrading, the authors establish the theoretical and policy basis for transforming industrial clusters from production-oriented to innovation-oriented agglomerations. They also study the important structural changes in the region, such as FTAs and the role of the WTO, and the consequent effects on clusters. Researchers and students of Asian economics, industrial clusters and innovation will find this incisive book invaluable. It will also prove to be a compelling read for policymakers in developing countries or international development organizations.

Special Economic Zones in India Arpita Mukherjee, Parthapratiim Pal, Saubhik Deb, Subhobrota Ray, Tanu M Goyal, 2016-07-14 This book examines India's ten years of experience developing Special Economic Zones (SEZs) and the performance of SEZs in the context of India's growing international engagement, its endeavours to attract domestic and foreign investment in manufacturing and services and its aim to increase and diversify exports of goods and services. SEZs are industrial enclaves/clusters within a country that receive certain incentives and business facilitation benefits that are not generally available to the rest of the country. To facilitate private and foreign investment in SEZs, India introduced the SEZ policy in 2000, which was followed by the SEZ Act in 2005. After ten years under the Act, India now has one of the largest number of approved SEZs in the world and its SEZ policy remains heatedly debated, with a number of studies arguing both for and against it. Given this background, the book also identifies the challenges faced by SEZs in India and offers policy recommendations on how to make the SEZs an engine for India's economic growth and development that can more effectively link the country's manufacturing and services sectors to global value chains.

Social and Economic Impact of SEZs in India Aradhna Aggarwal, 2012-01-25 This book provides a comprehensive review of the evolution and performance of SEZs from a historical and comparative perspective by tracing the experiences of SEZs in 23 developing countries, including Korea, Taiwan, and China. Using a framework that integrates the basic tenets of the industrial cluster approach with existing theories, it proposes a set of evaluation criteria for SEZs. Analysing quantitative data provided by the Ministry of Commerce and qualitative evidence based on field surveys conducted during 2004–9, the book assesses the economic contribution in the pre- and post-SEZ Act periods in India. Exploring the impact of SEZs on employment, trade, foreign exchange earnings, government revenue, and technology transfers, it also examines evidence of social effects vis-à-vis land acquisition, human development, regional inequities, and environmental protection. Discussing the impact of internal dynamics and external forces on future prospects of SEZs, it offers constructive suggestions to make policy investor-friendly and successful.

The Kaliningrad Challenge Hanne-Margret Birckenbach, 2003 The Kaliningradskaya Oblast, Russia's Baltic enclave which soon will turn into an island amid the enlarged EU and NATO, constitutes a twofold challenge to European politics: Due to its economic, social, historical, geographical, strategic, and cultural peculiarities the detached region may become a source of instability. However, due to the same peculiarities the region also bears the potential to serve as a pilot-region for an EU-Russian partnership. To meet the latter perspective all actors concerned need to engage in a dialogue-based, coordinated, and problem-solving approach. This study provides recommendations to a wide range of actors on how to approach the Kaliningrad challenge in a proactive manner. It presents a policy paper drafted by a group of Kaliningrad experts from eight countries and is complemented by fourteen issue-oriented chapters which provide in-depth reasoning on the suggestions made by the group. Hanne-Margret Birckenbach is professor of political sciences at the University of Giessen, Germany. Christian Wellmann is deputy director of SHIP--The Schleswig-Holstein Institute for Peace Research, Germany.

Corporate Strategy in Post-Communist Russia Mikhail Glazunov, 2016-05-12 Russian businesses in the post-Soviet period have been noted for their unusual, sometimes allegedly corrupt, business practices, and for their role in the enrichment of oligarchs. This book, which includes a wide range of case study examples, and which draws on the author's first-hand experience of running a Russian company, argues that a key to understanding contemporary Russian business is the importance of arbitrage, that is the ability to take advantage of price and cost differentials in different markets. The book argues that the conditions for such arbitrage advantages are often

created by businesses which have special links to particular institutions; that arbitrage benefits are not available to all businesses in a sector, thereby providing unfair competitive advantages to some businesses; and that businesses' overall activities are often distorted by this system. The book includes an analysis of a wide range of different types of arbitrage activities in action.

Baku-Tbilisi-Kars Railroad: Future Opportunities and Prospects Mahir Humbatov, Evaldas Klimas, 2016-11-11 After centuries of neglect, the land transport corridors connecting Asia and Europe are on the brink of a rebirth. From practically nothing, a revived network of these land corridors is likely to lead to a considerable share of the freight revenues being generated by the increased trade between Asia and Europe. That is why there is fierce competition among the major players for control in shaping the Asia-Europe railway transport corridors. However, there are also new and exciting possibilities for cooperation among the various players. We will extensively examine and evaluate the transport corridors linking Asia and Europe. The Baku-Tbilisi-Kars railway project will be assessed from the perspectives of the three countries involved: Azerbaijan, Georgia and Turkey. It has been shown that the railroad will economically strengthen the region and better integrate the three host countries into international transport corridors. The Baku-Tbilisi-Kars railroad will certainly play a key role in helping to revive the Silk Road connection, thereby creating common interests and facilitating the transformation of the region. The BTK transport corridor will not only stimulate the economies of the countries involved but help wean them their off oil-dependence and restore their rightful place as major commercial hubs along the once-legendary Silk Road. The attraction of direct foreign investment and establishment of partnerships between the public and private sectors are key issues that will be explored in-depth in this book. By 2025, the region is expected to become a prosperous financial sector and transit area; a comprehensive strategy to that end which incorporates the principles of sustainable growth is being formulated by the countries involved.

Special Economic Zones in Africa Thomas Farole, 2011-01-01 This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-Saharan Africa, its lessons will be applicable to developing countries around the world.

World Investment Report 2019 United Nations Conference on Trade and Development, 2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

Special Economic Zones in India Amitendu Palit, Subhomoy Bhattacharjee, 2008-07-01 Special Economic Zones (SEZs) are turning out to be one of the stiffest challenges for India's economic policy reforms. Since the announcement of SEZ rules on 10 February 2006, these zones have aroused unprecedented controversy. The emotionally charged debate on SEZs has often produced inflexible positions on either side. The unusually strong public reaction has also forced policymakers to revisit several aspects of the policy in recent months. Why are SEZs so controversial? Will they really exacerbate income inequality, endanger food security and worsen regional imbalance? Or will they help Indian industry in taking its final leap onto the global arena? Only time will provide the answers. As the first book on India's SEZs, this volume examines different popular perceptions - both good and bad - surrounding these zones. Apart from the international evidence and the Indian story, the book looks closely at critical issues like financial viability, land requirements, extant rules and the political economy of SEZs. Admitting that the last word on the subject is far from being spoken, the book contends that the SEZ saga will be a test of strength for the country's social and political consensus on its economic policies and future reforms. Introduced by eminent economist Bibek Debroy, this book is a must read.

Kaliningrad: the European Amber Region Pertti Joenniemi, Jan Prawitz, 2018-12-20 First published in 1998, this book reflects a concern for Kaliningrad. Too little is known about the region, developments in recent years have not been sufficiently covered and it is rarely integrated, in terms of analysis, with the way post-Cold War Europe

is viewed more generally.

The Oxford Handbook of Industrial Hubs and Economic Development Arkebe Oqubay,Justin Yifu Lin,2020-07-23 Industrialization supported by industrial hubs has been widely associated with structural transformation and catch-up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production and technological capability, and innovation. The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy reasearchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization, economic structural transformation, and technological catch-up. It explores the implications of emerging issues and trends such as environmental protection and sustainability, technological advancement, shifts in the global economy, and urbanization.
