Short-Term Memory Difficulties in Children Joanne Rudland,2017-07-05 Children who have low self-confidence; a negative attitude towards school; score below average on assessments of language comprehension; and have an erratic pattern of errors with no specific linguistic weaknesses on assessments of comprehension, may be suffering from short-term memory difficulties. Written by a practising speech language therapist, this book provides a structured yet flexible approach to addressing the needs of children with short-term memory difficulties. Short-term memory therapy can be of great benefit with very positive results. Memory therapy can have a direct and positive impact on a child's receptive language skills, self-confidence and ability to learn. This practical resource provides a complete programme of ideas for developing a child's short-term memory skills. The programme can be administered in its entirety, or as an accompaniment to clinician's existing packages of care and is best suited to individual intervention. The book provides a structured programme for individual therapy, although activities may be adapted for group therapy. Containing photocopiable activity sheets and supporting material, ideal for use with 7 to 11 year-olds, the book also includes child-friendly recording forms and progress charts. Although written primarily for speech language therapists, this book will prove useful in teaching and practising memory strategies for learning support assistants, teachers, educational psychologists and anyone working with school-aged children. Anyone working with school-aged children would find the contents of the book useful.

The Whale Child Keith Egawa, Chenoa Egawa, 2020-10-13 An inspiring middle-grade chapter book that introduces young readers to the environmental challenges facing the planet through the eyes of Coast Salish characters and authors. You have family on land as you do in the sea. . . being a caretaker of the earth begins with taking care of the water that all life depends on. Shiny is a whale child. One day his mother teaches him about the harm facing the world's oceans because of human carelessness. Shiny agrees to be turned into a boy by the ocean's water spirit so he can visit the land and alert people to these dangers. He meets Alex, a young Coast Salish girl who learns from Shiny that the living spirit of water exists in everything--glaciers, rivers, oceans, rain, plants, and all living creatures. Together the two travel the earth, confronting the realities of a planet threatened by an uncertain future. Inspired by Shiny's hope, humor, and wisdom, Alex makes the promise to become a teacher for future generations. She realizes that the timeless Indigenous value of environmental stewardship is needed now more than ever and that we must all stand up on behalf of Mother Earth. Written and illustrated by Indigenous authors Keith Egawa and Chenoa Egawa, *The Whale Child* introduces children ages 7 to 12 to existing environmental issues with a message of hope, education, sharing, and action. Ideal for middle-grade readers who are beginning to read chapter books on their own, this book also includes resources for students and teachers to facilitate learning about Pacific Northwest Indigenous cultures and the environment.

Occult Botany Paul Sédar, 2021-06-01 • Includes a dictionary of nearly 300 magical

plants with descriptions of each plant’s scientific name, common names, elemental qualities, ruling planets, and zodiacal signatures, with commentary on medico-magical properties and uses • Explores methods of phytotherapy and plant magic, including the Paracelsian “transplantation of diseases,” ritual pacts with trees, the secret ingredients of witches’ ointments, and the composition of magical philters • Explains the occult secrets of phytogenesis, plant physiology, and plant physiognomy (classification of plants according to the doctrine of signatures) Merging the scientific discipline of botany with ancient, medieval, and Renaissance traditions of occult herbalism, this seminal guide was first published in French in 1902 as a textbook for students of Papus’s École hermétique and sparked a revival in the study of magical herbalism in early twentieth-century France. Author Paul Sédir, pseudonym of Yvon Le Loup (1871-1926), explains the occult secrets of phytogenesis (the esoteric origin and evolutionary development of the plant kingdom), plant physiology (the occult anatomy of plants), and plant physiognomy (classification of plants according to the doctrine of signatures). Unveiling the mysteries behind planetary and zodiacal attributions, he provides readers with the keys to make their own informed determinations of the astral properties of plants. Moving from theory into practice, Sédir explores various methods of phytotherapy and plant magic, including the Paracelsian “transplantation of diseases,” the secret ingredients of witches’ ointments, and the composition of magical philters. In the third section of the book, Sédir offers a dictionary of magical plants that covers nearly 300 plant species with descriptions of their astral signatures, occult properties, and medico-magical uses. Compiled from an array of rare sources and esoterica, this classic text includes a wealth of additional materials and supplemental charts and diagrams drawn from Sédir’s occult colleagues, all of whom adopted and expanded upon Sédir’s pioneering system of plant correspondences.
