The Designer's Field Guide to Collaboration Caryn Brause,2016-11-18 The Designer's Field Guide to Collaboration provides practitioners and students with the tools necessary to collaborate effectively with a wide variety of partners in an increasingly socially complex and technology-driven design environment. Beautifully illustrated with color images, the book draws on the expertise of top professionals in the allied fields of architecture, landscape architecture, engineering and construction management, and brings to bear research from diverse disciplines such as software development, organizational behavior, and outdoor leadership training. Chapters examine emerging and best practices for effective team building, structuring workflows, enhancing communication, managing conflict, and developing collective vision––all to ensure the highest standards of design excellence. Case studies detail and reflect on the collaborative processes used to create award-winning projects by Studio Gang, Perkins+Will, Tod Williams Billie Tsien Architects | Partners, Gensler, CDR Studio, Mahlum Architects, In.Site:Architecture, and Thornton Tomasetti's Core

Studio. The book also provides pragmatic ideas and formal exercises for brainstorming productively, evaluating ideas, communicating effectively, and offering feedback. By emphasizing the productive influence and creative possibilities of collaboration within the changing landscape of architectural production, the book proposes how these practices can be taught in architecture school and expanded in practice. In a changing world that presents increasingly complex challenges, optimizing these collaborative skills will prove not only necessary, but crucial to the process of creating advanced architecture.

Making Sense of Field Research Sheila Pontis,2018-07-17 Learn how to use field research to bring essential people-centred insights to your information design projects. Information design is recognized as the practice of making complex data and information understandable for a particular audience, but what's often overlooked is the importance of understanding the audience themselves during the information design process. Rather than rely on intuition or assumptions, information designers need evidence gathered from real people about how they think, feel, and behave in order to inform the design of effective solutions. To do this, they need field research. If you're unsure about field research and how it might fit into a project, this book is for you. This text presents practical, easy-to-follow instructions for planning, designing, and conducting a field study, as well as guidance for making sense of field data and translating findings into action. The selection of established methods and techniques, drawn from social sciences, anthropology, and participatory design, is geared specifically toward information design problems. Over 80 illustrations and five real-world case studies bring key principles and methods of field research to life. Whether you are designing a family of icons or a large-scale signage system, an instruction manual or an interactive data visualization, this book will guide you through the necessary steps to ensure you are meeting people's needs.

Scenographic Design Drawing Sue Field,2020-12-14 This enlightening study explores the set design drawings for theatre and live performance, highlighting their unique qualities within the greater arena of drawing practice and theory. The latest volume in the Drawing In series, Scenographic Design Drawing encourages an interdisciplinary dialogue in the field of drawing with the inclusion of illustrations throughout. Scenographic design drawings visualize the images in the designer's 'mind's eye' early in the design process. They are the initial design tool in the creative engagement with theatre, opera, dance, and non-text-based performance. It is, in particular, this body of drawings that is unique as both a performative and a theatrical representation of multiple worlds within the 'stage space'. Sue Field illuminates this illustration process and identifies how these drawings have functioned and developed over time. Scenographic Design Drawing serves to satisfy an emerging global curiosity and a thirst for new knowledge and understanding in relation to the drawings executed by the historical and contemporary scenographer. This work addresses a critical research gap and shows how the scenographic design drawing continues to be a principal site of innovation, subjectivity, originality and authorship in theatre and live performance.

Digital Design Theory Helen Armstrong,2016-06-28 Digital Design Theory bridges the gap between the discourse of print design and interactive experience by examining the impact of computation on the field of design. As graphic design moves from the creation of closed, static objects to the development of open,

interactive frameworks, designers seek to understand their own rapidly shifting profession. Helen Armstrong's carefully curated introduction to groundbreaking primary texts, from the 1960s to the present, provides the background necessary for an understanding of digital design vocabulary and thought. Accessible essays from designers and programmers are by influential figures such as Ladislav Sutnar, Bruno Munari, Wim Crouwel, Sol LeWitt, Muriel Cooper, Zuzana Licko, Rudy VanderLans, John Maeda, Paola Antonelli, Luna Maurer, and Keetra Dean Dixon. Their topics range from graphic design's fascination with programmatic design, to early strivings for an authentic digital aesthetic, to the move from object-based design and to experience-based design. Accompanying commentary assesses the relevance of each excerpt to the working and intellectual life of designers.

How to Choose, Brief and Work with Graphic Designers Amanda J. Field,2013-11-26 A company's visual identity - as it appears in everything from business stationery and brochures, to product packaging and websites - is central to a company's impact on the market. It's the first impression a prospective customer gets: but for many businesses, design is seen as a 'necessary evil', best avoided, but if that's not possible, then best done cheaply. This down-to-earth, succinct handbook will show you why you should choose your designer as carefully as you would choose a new, senior member of staff; why good design need not cost any more than bad design; what the difference is between a 'brief' and a 'briefing'; how to stop design budgets spiralling out of control; how to conduct tenders; how to get the best from your designers; how to handle approvals; and how to judge design concepts. It is packed with practical advice and guidance that is just as applicable to a new-business start-up as it is to a multinational organisation.

Graphic Design Theory Helen Armstrong,2012-08-10 Graphic Design Theory is organized in three sections: Creating the Field traces the evolution of graphic design over the course of the early 1900s, including influential avant-garde ideas of futurism, constructivism, and the Bauhaus; Building on Success covers the mid- to late twentieth century and considers the International Style, modernism, and postmodernism; and Mapping the Future opens at the end of the last century and includes current discussions on legibility, social responsibility, and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text, providing a cultural and historical framework through which

the work can be evaluated. Authors include such influential designers as Herbert Bayer, L'szlo Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton, and Lorraine Wild. Additional features include a timeline, glossary, and bibliography for further reading. Design Research Through Practice Ilpo Koskinen,John Zimmerman,Thomas Binder,Johan Redstrom,Stephan Wensveen,2011-09-29 Design Research Through Practice: From the Lab, Field, and Showroom focuses on one type of contemporary design research known as constructive design

research. It looks at three approaches to constructive design research: Lab, Field, and Showroom. The book shows how theory, research practice, and the social environment create commonalities between these approaches. It illustrates how one can successfully integrate design and research based on work carried out in industrial design and interaction design. The book begins with an overview of the rise of constructive design research, as well as constructive research programs and methodologies. It then describes the logic of studying design in the laboratory, design ethnography and field work, and the origins of the Showroom and its foundation on art and design rather than on science or the social sciences. It also discusses the theoretical background of constructive design research, along with modeling and prototyping of design items. Finally, it considers recent work in Lab that focuses on action and the body instead of thinking and knowing. Many kinds of designers and people interested in design will find this book extremely helpful. Gathers design research experts from traditional lab science, social science, art, industrial design, UX and HCI to lend tested practices and how they can be used in a variety of design projects Provides a multidisciplinary story of the whole design process, with proven and teachable techniques that can solve both academic and practical problems Presents key examples illustrating how research is applied and vignettes summarizing the key how-to details of specific projects

Inside / Outside Malcolm Grear,2006-06-27 Renowned artist and design legend Malcolm Grear has permanently shaped the design world with his work, lecturing, writing and teaching. Grear approaches design by looking at the inner parts of an object, process, or idea in order to understand the whole. He believes that form and structure are the underpinnings of effective design, which stands contrary to the reductive approach taught in most modern design education. Deftly and sparingly capturing the essence of his subject matter, Grear offers unique insight into the

design process with images and forms drawn from nature, typography, art and design. These examples from both his teaching (inside) and professional practice (outside) begin with design problems and illuminate the processes by which the best solutions are found. Grear skillfully bridges the gap between design theory and real-world practice. Malcolm Grear has played a vital role as designer and educator in the field of visual communication for 48 years. Malcolm Grear Designers was founded in 1960 and has had more than 28 solo exhibitions in museums and galleries. He taught in Rhode Island School of Design from 1960 to 1998 where he received the Honorary Alumnus Award for ...professional achievements as an internationally acclaimed graphic designer (that) brought overwhelming recognition to Rhode Island School of Design's Department of Graphic Design and its graduates. Malcolm Grear has been awarded five honorary doctorate degrees and was selected by the National Association of Schools of Art and Design, comprising 190 institutions, to receive the Citation for Distinguished Service in the Visual Arts. Grear continues to design, lecture, and conduct design workshops throughout the country and will occasionally teach a graduate design course. Visit www.mgrear.com for more information. Inside / Outside is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA.

The Education of a Graphic Designer Steven Heller,2015-10-20 Revised and updated, this compelling collection of essays, interviews, and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top designers and educators talk theory, offer proposals, discuss a wide range of educational concerns—such as theory versus practice, art versus commerce, and classicism versus postmodernism—and consider topics such as emerging markets, shifts in conventions, global impact, and social innovation. Building on the foundation of the original book,

the new essays address how graphic design has changed into an information-presenting, data-visualization, and storytelling field rooted in art and technology. The forward-thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors, and their students make this an entertaining and illuminating idea book. The book features writing from: Lama Ajeenah, Roy R. Behrens, Andrew Blauvelt, Max Bruinsma, Chuck Byrne, Moira Cullen, Paula J. Curran, Louis Danziger, Liz Danzico, Meredith Davis, Sheila de Bretteville, Carla Diana, Johanna Drucker, Milton Glaser, Rob Giampietro, April Greiman, Sagi Haviv, Lorraine Justice, Jeffery Keedy, Julie Lasky, Warren Lehrer, Ellen Lupton, Victor Margolin, Andrea Marks, Katherine McCoy, Ellen McMahon, J.
