Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. File Management Made Simple, Windows Edition Joseph Moran,2015-11-24 Managing data is an essential skill that every PC user should have. Surprisingly though, a large number of users--even highly experienced users--exhibit poor file management skills, resulting in frustration and lost data. This brief but invaluable book, File Management Made Simple can resolve this by providing you with the skills and best practices needed for creating, managing and protecting your data. Do any of the following scenarios sound familiar to you? You've downloaded an attachment from your e-mail, but aren't sure where you downloaded it to. You spent an entire evening working on a document only to discover the next morning that you didn't save it to your flash drive like you thought you had? Maybe you had a guest visiting and wanted to share with them the pictures you took of your kids recital, yet when you went to get them you were unable to recall where you stored them on your PC. Or you scanned your receipts for your expense reports on day and came back the next day and scanned some for another report only to find that the new ones numbered Scan 1, Scan 2,... still exist. Unfortunately, for a vast number of PC users, scenarios like these are all too common. These situations are not only extremely frustrating for the user, but also tend to discourage them from ever wanting to touch a PC again! Why is that? What is the common factor? It's simple really. Each of these issues can be attributed to poor file management skills. In my experience, the people with the worst file management skills are simply the ones that lack an understanding of how to navigate the Windows operating system. However this situation can be easily rectified. And once you can successfully navigate your computer's drive and folder structure, you'll be hard pressed to misplace anything. Although this process can seem daunting to the uninitiated, this isn't black magic. In fact, it's actually quite simple. Keeping your files and folders organized on the computer is no more difficult than keeping them organized in real life. There is a place for everything and everything has its place. We will show you how to navigate Windows correctly and efficiently. Where specific types of files should be stored. We'll also show you how best to name and manage your files; such as using descriptive folders to identify files, implementing the best naming conventions for files and directories, and how to group various types of data together; ensuring that the data you need is always readily available. Finally we'll introduce you to some of the best options for transporting and protecting your data. We will show you the skills you need to easily manage your data, using clear and simple English, without the confusing technical jargon. All this and more can be accomplished with File Management Made Simple by your side.

Improving Productivity with IBM ISPF Productivity Tool V7.1 for z/OS Michael Rotter, Eugenie Alexander, Rodney Almodovar, Balachandran Chandrasekaran, Pearlson Christopher, Steve Coalbran, Mark Leung, Jean Mothersele, Chaitra Narayanaswamy, Kevin Neubert, Richard Pace, Walter Zakorchemny, IBM Redbooks, 2013-04-24 This IBM® Redbooks® publication introduces the IBM Interactive System Productivity Facility (ISPF) Productivity Tool (IPT) Version 7, Release 1 for IBM z/OS®. IPT operates as a seamlessly integrated front end to ISPF. Note the following points: IPT functionality is available from any panel, without a need to modify any ISPF Primary Options Menu. All IPT functions are totally integrated. IPT can perform almost any activity within ISPF, or internally invoke the function that can perform the task. IPT combines separately provided ISPF utility functions and new ISPF Productivity Tool features into the Object List (OLIST) and Member Selection List (MSL). The resulting members, datasets, and Object Lists become powerful platforms where you can perform many tasks without navigating to other utilities. IPT relates objects to applications in a similar manner to the way that a PC performs Object Linking and Embedding (OLE). By extending the dataset objects that are used by ISPF to other object classes, IPT lets you specify the object to be processed and the action that is performed (such as EDIT or BROWSE). The facility that is appropriate to the object class for the action that you have requested is invoked automatically. IPT provides extensive search capabilities that are both rapid and intuitive. You can easily search for volumes, datasets, members, and text within members. ISPF Productivity Tool also furnishes automatic drill-down system navigation to examine volumes, datasets, and members. IPT provides a menu-driven facility to display and recover all of the deleted members of a partitioned dataset (PDS) library. IPT extends the ISPF action bar with options that provide access to new functionality so that you do not have to learn new commands or syntax. In addition to the ISPF Point-and-Shoot capabilities, IPT provides new concepts, such as hotbars (user-defined fields that execute commands), field-sensitive areas in MSLs and OLISTs, automatic recognition of a dataset name on any ISPF panel as a parameter to BROWSE, EDIT, or VIEW, or parameters within any Time Sharing Option (TSO) command. IPT provides integrated and enhanced IBM Software Configuration and Library Manager (SCLM) support within the standard member and dataset lists. SCLM is a source library management component of ISPF that provides change control, multiple source versions, auditing, a built-in make facility, and automatic check-in/sign-out using standard libraries (PDS and partitioned dataset extended (PDSE)). IPT includes built-in interfaces to various IBM and ISV products. IPT includes a new batch utility that provides a seamlessly integrated front end to the IBM IEBCOPY utility. In addition to supporting all IEBCOPY standard functionality, it includes additional major enhancements. This book is intended as a supplement to existing product manuals. It opens with an overview of the main IPT concepts and facilities, and follows with

detailed chapters which are each dedicated to a major IPT function. Practical scenarios, accompanied by window captures and coding examples, demonstrate how both experienced ISPF users and those new to the IBM z/OS environment can benefit from the IPT enhanced functionality in each case.
