Trillions Robin Wigglesworth, 2021-10-12 From the Financial Times's global finance correspondent, the incredible true story of the iconoclastic geeks who defied conventional wisdom and endured Wall Street's scorn to launch the index fund revolution, democratizing investing and saving hundreds of billions of dollars in fees that would have otherwise lined fat cats' pockets. Fifty years ago, the Manhattan Project of money management was quietly assembled in the financial industry's backwaters, unified by the heretical idea that even many of the world's finest investors couldn't beat the market in the long run. The motley crew of nerds—including economist wunderkind Gene Fama, humiliated industry executive Jack Bogle, bull-headed and computer-obsessive John McQuown, and avuncular former WWII submariner Nate Most—succeeded beyond their wildest dreams. Passive investing now accounts for more than \$20 trillion, equal to the entire gross domestic product of the US, and is today a force reshaping markets, finance and even capitalism itself in myriad subtle but pivotal ways. Yet even some fans of index funds and ETFs are growing perturbed that their swelling heft is destabilizing markets, wrecking the investment industry and leading to an unwelcome concentration of power in fewer and fewer hands. In *Trillions*, Financial Times journalist Robin Wigglesworth unveils the vivid secret history of an invention Wall Street wishes was never created, bringing to life the characters behind its birth, growth, and evolution into a world-conquering phenomenon. This engrossing narrative is essential reading for anyone who wants to understand modern finance—and one of the most pressing financial uncertainties of our time.

History in Financial Times Amin Samman, 2019-05-14 Critical theorists of economy tend to understand the history of market society as a succession of distinct stages. This vision of history rests on a chronological conception of time whereby each present slips into the past so that a future might take its place. This book argues that the linear mode of thinking misses something crucial about the dynamics of contemporary capitalism. Rather than each present leaving a set past behind it, the past continually circulates through and shapes the present, such that historical change emerges through a shifting panorama of historical associations, names, and dates. The result is a strange feedback loop between now and then, real and imaginary. Demonstrating how this idea can give us a better purchase on financial capitalism in the post-crisis era, *History in Financial Times* traces the diverse modes of history production at work in the spheres of financial journalism, policymaking, and popular culture. Paying particular attention to narrative and to notions of crisis, recurrence, and revelation, Amin Samman gives us a novel take on the relation between historical thinking and critique.

History in Financial Times Amin Samman, 2019 Pushing beyond linear accounts of economic history, this book reveals how the past continually circulates through and shapes the present in unexpected ways.
