A Beta's Regret Beth Jackson,2023-12-04 Jake is Midnight Forest Pack's Beta, incredibly popular and handsome, always surrounded by friends, and is successful in business and as his role in pack as Beta. Yet part of his life feels incomplete. Seeing all of his friends settled down with their mates and now having children, Jake can't help

but wonder where he went wrong or think if he will forever be alone. Avoidance seems to be the best tactic, and Jake pushes himself harder into work, where an unexpected encounter at a business meeting gets his heart racing and turns his life upside down. Rose, this seemingly perfect, beautiful fated mate of his, has somewhat of an unusual reaction to meeting her mate. Are you meant to be doing your best to avoid your new mate? Or be keeping secrets from him? Not to mention Rose comes from the other side of the world and plans to head home as soon as she can, with promises of keeping in touch, and working things out with time and space. Jake is just happy to finally have his mate, and willing to do all he can to have her by his side. Would Jake be willing to leave all he knows for fate? Or could it be the moon goddess made a mistake, and Jake is better off alone? Or is there a better match out there for him?

Investment and Risk in Africa Paul Collier, Catherine Pattillo, 2016-07-27 This book brings together academics in the fields of economics, political science, and law, with business practitioners in the fields of risk assessment and portfolio management. Their contributions are sequenced to tell a story. Africa is perceived as being a highly risky continent. As a result, investment is discouraged. These risks are partly exaggerated. However, to the extent that they reflect genuine problems, they are capable of being mitigated by insurance and reduced by political restraints such as central banks, investment charters, and international agreements.

The 1903 Lowell Lectures Ahti-Veikko Pietarinen, 2021-05-10 In three comprehensive volumes, *Logic of the Future* presents a full panorama of Charles S. Peirce's important late writings. Among the most influential American thinkers, Peirce took his existential graphs to be his greatest contribution to human thought. The manuscripts from 1895-1913, most of which are published here for the first time, testify the richness and open-endedness of his theory of logic and its applications. They also invite us to reconsider our ordinary conceptions of reasoning as well as the conventional stories told about the evolution of modern logic. This second volume collects Peirce's writings on existential graphs related to his Lowell Lectures of 1903, the annus mirabilis of his that became decisive in the development of the mature theory of the graphical method of logic.

Molecular and Cellular Biology of Prostate Cancer D.S. Coffey, James P. Karr, R.G. Smith, D.J. Tindall, 2012-12-06 These proceedings of the 5th Prouts Neck Meeting on Prostate Cancer, held in October, 1989, highlight the many advances in the understanding of prostatic growth and function at the cellular and molecular levels which have been registered since the first Prouts Neck Meeting in 1985, a meeting which also focused on the then current concepts and basic approaches to understanding prostate cancer. Intervening Prouts Neck Meetings in 1986, 1987 and 1988 were devoted to treatment, image cytometry and clinical markers. As before, the Prouts Neck tradition of bringing together an international, multidisciplinary group of experts for 3 days to exchange ideas and new data, in the relaxed atmosphere of an old inn on the scenic Maine coast, proved to be an ideal combination for a highly successful conference. Accordingly, the Organ System Program of the National Cancer Institute plans to use the Prouts Neck model for future conferences on other solid tumors (bladder in 1990 and kidney in 1991) and will return to the prostate in 1992. A new dimension was added to the current program through the inclusion of a poster session to recognize the research of pre- and postdoctoral investigators. The posters were judged by Drs. Collette Freeman, Frank French, Shutsung Liao, Robert Matusik and Henry Sun. The three winners, in alphabetical order, were John Fabian, Robert Getzenberg and Ming Fong-Lin.

Be Financially Free Morten Strange, 2016-05-15 Wouldn't it be great to be free from financial worries? To be able to live the life you choose instead of working your life away? You can achieve this if you understand how the economy works, how consumerism seduces you into debt, and how to use the tools at your disposal correctly. Financial independence is too important to let others manage it for you. Morten Strange, financial analyst, 'citizen economist' and naturalist, draws from his 50 years of experience through the 1973 oil crisis and various stock market crashes and economic recessions to show you how to manage your money so you can be financially free. He explains, in simple terms, the mechanics of financial products and types of investments such as savings, bonds, shares and property, and offers practical guidelines you can apply immediately. What sets this book apart is its focus on the current economy and the ominous direction that it is taking. While most analysts focus on short-term solutions, *Be Financially Free* takes a global view. In this time of impending ecological limits and the end of economic growth, what will you need to do to achieve - and protect - your financial independence in the long term? Illustrated with charts, diagrams and case studies, this revelatory book will empower you to embark on the path to financial freedom.

New Aspects in Hypertension Adrenoceptors M. Middeke, H. Holzgreve, 2012-12-06 This book reports on the current state of knowledge about adrenoceptors and their involvement in the pathogenesis and treatment of high blood pressure. This is a relatively recent and extremely exciting addition to the field of hypertension research. The development of new analytical procedures, such as radio ligand-binding methods, has made it possible to identify and quantify the adrenoceptors in different tissues and in circulating blood cells. As a consequence, much new and valuable information has been obtained. An understanding of the role of the fJ-adrenoceptor-adenylatecyclase-cAMP system in hypertension is one such product of this new approach. Both review articles and new experimental and clinical data are included in this volume. New aspects of the distribution, identification and regulation, and the chronopharmacology of adrenoceptors, as well as beta blockade, will be highlighted. The clinical contributions concern the normal regulation of the fJ adrenoceptor-adenylatecyclase-cAMP system, and how it is altered in hypertensives as a possible mechanism in the pathogenesis and maintenance of essential hypertension. With this

knowledge it is becoming easier to explain the molecular and cellular action behind the familiar role of the sympathico-adrenergic system in the development of hypertension and the mechanism of beta blockade. The vast majority of the data available in this field is confined to peripheral mechanisms, owing to the limited possibilities for investigating the central nervous system under clinical conditions.
