For the first time in English, the secrets of the gold medal winning Hungarians and Serbians are revealed. With 190 full body pictures in over 200-pages, the mechanics above and below the water are clearly shown. The Science of Shooting book provides step by step answers for players and coaches demanding the secret knowledge of the European throwing method.

Shooting the Dead Gerrie Ferris Finger, 2016-06-04 Former photojournalist Billie Nikkel is raking in money since she began shooting adulterers and insurance scammers. She's hired a colleague, Ning Song, and built onto her studio. A commission finds Billie and Ning on a boat, photographing alleged adulterer, Harlon Getz. A speedboat tries to capsize Billie's boat. Will Elliott, a Georgia Bureau of Investigation agent, is on a rescue boat. Billie explains she was shooting lake scenes, but she believes he suspects her of smuggling. Despite her smart mouth, straight-arrow Will is attracted to her. A few days later, she goes to see graphic artist, Dennis Birmingham. There she meets Sevastian Sevi DuFour, Dennis's college roommate. She gets that loose-jointed feeling that happens when she meets gorgeous men. She leaves to meet with a new client, Pamela Lansdowne. Pamela's father is former senator Orel Lansdowne. The family owns a town north of Atlanta. Pamela asks Billie to photograph her husband, Sevastian DuFour, at a charity event in a ritzy hotel. Pamela believes he's having an affair with her half-sister, Naomi. Is it coincidence that just an hour earlier she'd met Sevi? Something doesn't add up as Billie, lured by money and curiosity, gets too close and too deep into a wealthy family's guile and corruption.

Three-Finger Zen Xiao-Xing Chen, 2011-08-30 With its technical limitations, modern basketball has developed radically to a physical game. A revolution of basketball fundamental skills is needed, and now it is feasible with a break-through technique—Three-Finger Zen, Universal Ball-Handling Mechanism. In 2010, after five-year dedicated research and praxis, Xiaoxing Chen discovered Three-Finger-Zen (3fz), a nature mechanism of human hand and arm for handling the basketball. It benefits every participant of the sport, and has technical capabilities to revolutionize basketball for a perfect game. Chen built his theories and praxes of how basketball should work in 3fz with its unique features: • Integrates all basketball offense skills as one simple mechanism. • Enables unchallengeable shooting with exceptional accuracy. • Improves players' athletic abilities and prevent passive injuries. • Enhances physical and mental development of children. • Sparks logic and artistic intelligence in youths and adults. • Promotes physical and mental health of the general public. Distinctive from conventional basketball skills, 3fz applies the last three fingers—middle finger, ring finger and pinky—to handle and control the ball. In this method, the ring finger plays a command-and-control role in the ball-handling processes of dribbling, passing, and shooting. The technique is easy to learn when you understand the 3fz mechanism and follow the training instructions. In this book, Chen reveals the steps to 3fz basketball revolution and teaches you how to be the best basketball player you can be.

The Modern Pistol and How to Shoot It Walter Winans, 2011-01-01 There is now no use learning revolver shooting. That form of pistol is obsolete except in the few instances where it survives for target shooting, or is carried for self-defence; just as flintlock muskets even now survive in out-of-the-way parts of the world. If a man tries to defend himself with a revolver against another armed with an automatic pistol he is at a great disadvantage. The automatic is more accurate than a revolver, as the “blow-back” does not vary as much as does the escape of gas past the cylinder in a revolver. The bullet in the revolver has to jump into the cylinder, whereas in the automatic it is already fitted up against the rifling, before being fired. The single-shot pistol is the most accurate of any, there being no escape of gas. The automatic has not only a much longer range than the revolver (although the popular idea that it can be shot accurately at a thousand yards or more is nonsense) but it cocks itself instead of having to be cocked by the thumb, or trigger finger. Cocking by trigger-pull is such a strain on, not only the trigger finger, but the whole hand, that, after a few shots, good shooting cannot be made. I won all my rapid-firing revolver competitions using the single action and cocking with the thumb, as this rested my trigger finger. With the automatic, cocking is unnecessary and, with its lighter recoil, good scores in rapid-firing are very much easier to make. The penetration of the nickel-coated automatic bullet propelled by its big charge of nitro powder is very great. A man brought me a “pistol-proof” cuirass to test; I put a bullet at twelve yards clean through it and then through two “bullet proof” ones, placed one behind the other. (I used a regulation U. S. .45 Automatic pistol.) This was before the war. The inventor was disappointed. He had experimented only with revolvers shooting soft leaden bullets and these his cuirass had stopped. Unfortunately, in its present comparatively imperfect development, the automatic is the most dangerous firearm of all pistols for a novice to handle. The long barrel of a rifle can be struck aside if a beginner swings it round and points it at the instructor or a nearby spectator, but the short barrel of a pistol is easily pointed at and with difficulty brushed aside by the unfortunate person standing near a “brandishing” and “flourishing” man who is learning to shoot. In spite of all warnings even those who ought to know better do this swinging about. In fact, it is the recognized way of handling a pistol; according to reporters, they always say So and So “was brandishing a pistol” if he happens to be armed.

Instinct Combat Shooting Chuck Klein, 2016-08-05 While much has been written about instinct shooting with long guns, very little had been published on doing so with a handgun until this publication. Written by a pioneering author of the concept, *Instinct Combat Shooting: Defensive Handgunning for Police*, now in its fourth edition, is not about winning target shooting competitions, but purports surviving real-life firefights by examining testimonies of shootout survivors and carefully analyzing firefights that prove shooting instinctively is not only crucially fast, but also equally accurate. The book defines instinctive combat shooting as: The act of operating a handgun by focusing on the target, as opposed to the sights, and instinctively coordinating the hand and mind to cause the handgun to discharge at a time and point that ensures interception of the projectile with the target. The concepts behind instinct combat shooting discussed in this book are now being integrated into some of the most progressive police academies in the United States and around the world. New chapters provide valuable material dispelling myths on indexing, laser sights, and other trick-shooting methods. Intended to help officers survive close-quarter combat conditions, *Instinct Combat Shooting* is an essential tool for police looking to improve their close-range shooting skills and enhance their firefight survival.

The Middle Finger Project Ash Ambirge, 2020-02-11 Fresh, funny, and fearless, *The Middle Finger Project* is a point-by-point primer on how to get unstuck, slay imposter syndrome, trust in your own worth and ability, and become a strong, capable, wonderful, weird, brilliant, ballsy, unfuckwithable YOU. Don't worry, this isn't a book about God, nor is it a book about Ryan Gosling (second in command). But it is a book about

authority and becoming your own. --Ash Ambirge After a string of dead-end jobs and a death in the family, Ash Ambirge was down to her last \$26 and sleeping in a Kmart parking lot when she faced the truth: No one was coming to her rescue. It was up to her to appoint herself. That night led to what eventually became a six-figure freelance career as a sought-after marketing and copywriting consultant, all while sipping coffee from her front porch in Costa Rica. She then launched The Middle Finger Project, a blog and online course hub, which has provided tens of thousands of young women who disobey with the tools and mindset to give everyone else's expectations the finger and get on your own path to happiness, wealth, independence, and adventure. In her first book, Ash draws on her unconventional personal story to offer a fun, bracing, and occasionally potty-mouthed manifesto for the transformative power of radical self-reliance. Employing the signature wit and wordsmithing she's used to build an avid following, she offers paradigm-shifting advice along the lines of: • The best feeling in the world is knowing who you are and what you're capable of doing. • Life circumstances are not life sentences. If a Scranton girl who grew up in a trailer park can make it, so can you. • What you believe about yourself will either murder your chances or save your life. So why not believe something good? • You don't need a high-ranking job title to be authorized to contribute. You just need to contribute. • Be your own authority. Authority only works as long as you trust that someone smarter than you is making the rules. • The way you become a force is by being the most radically real version of yourself that you can be. • You only have 12 fucks a day to give, so use them wisely.

Gunfitting Don Currie, 2021-12-01 Expert shooting coach, teacher, and competitor Don Currie delivers a solid book on gunfitting based on a lifetime of experience gained from working with Orvis and Purdey. Don knows that shooting with a properly fitted shotgun is critical to a shooter's success, and he delivers on the art and science of fitting proper shotguns. The science requires the gunfitter to understand the structure of the shooter's body and what stock specifications are needed to accommodate the shooter's physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter's stance, mount, and level of experience along with taking into consideration the shooter's discipline and style and how the shooter will develop and evolve.
