Active Inference Thomas Parr,Giovanni Pezzulo,Karl J. Friston,2022-03-29 The first comprehensive treatment of active inference, an integrative perspective on brain, cognition, and behavior used across multiple disciplines. Active inference is a way of understanding sentient behavior—a theory that characterizes perception, planning, and action in terms of probabilistic inference. Developed by theoretical neuroscientist Karl Friston over years of groundbreaking research, active inference provides an integrated perspective on brain, cognition, and behavior that is increasingly used across multiple disciplines including neuroscience, psychology, and philosophy. Active inference puts the action into perception. This book offers the first comprehensive treatment of active inference, covering theory, applications, and cognitive domains. Active inference is a “first principles” approach to understanding behavior and the brain, framed in terms of a single imperative to minimize free energy. The book emphasizes the implications of the free energy principle for understanding how the brain works. It first introduces active inference both conceptually and formally, contextualizing it within current theories of cognition. It then provides specific examples of computational models that use active inference to explain such cognitive phenomena as perception, attention, memory, and planning.

Future-Ready Retail Ibrahim Ibrahim,2022-06-03 Traditional shops are facing challenging and unprecedented times. Future-Ready Retail explains how changing consumer needs, the impact of digital and the issues around health, wellness and distancing have transformed retail and provides compelling solutions to help reimagine the high street and out-of-town malls. Conventional high streets, shopping arcades and retail malls throughout the world no longer attract the crowds needed to sustain them as successful commercial spaces. Suffering from the effects of online shopping, changing consumer attitudes and expectations, and the legacy impact of social distancing, there's a sense of urgency and the need to address the decline in physical retail. Future-Ready Retail provides in-depth analysis of how consumers, health, data and new technologies will continue irreversibly to shake up physical shops and permanently shape the future of traditional retail. Arguing that to be future-ready, retail needs to be driven by people and places, not solely real estate, the book explains how brands can develop strategies to create shops whose main purpose is to recruit, retain and delight customers. Featuring case studies from successful global brand, retail futurist and designer Ibrahim Ibrahim identifies key retail-cultural trends, shows why it's important to make retail space physically smarter and how to use touch points such as social, website and apps alongside the physical space, to achieve a seamless, enjoyable and profitable retail experience.

Metamorphosis Franz Kafka,2021-03-19 Franz Kafka, the author has very nicely narrated the story of Gregou Samsa who wakes up one day to discover that he has metamorphosed into a bug. The book concerns itself with the themes of alienation and existentialism. The author has written many important stories, including "The Judgement", and much of his novels "Amerika", "The Castle", "The Hunger Artist". Many of his stories were published during his lifetime but many were not. Over the course of the 1920s and 30s Kafka's works were published and translated instantly becoming landmarks of twentieth-century literature. Ironically, the story ends on an optimistic note, as the family puts itself back together. The style of the book epitomizes Kafka's writing. Kafka very interestingly, used to present an impossible situation, such as a man's transformation into an insect, and develop the story from there with perfect realism and intense attention to detail. The Metamorphosis is an autobiographical piece of writing, and we find that parts of the story reflect Kafka's own life.

Back to the Future Sahil Sood, Back to the future takes us back and forth to a wholly magical and technologically advanced world where individuals are capable of attaining the power of seeing the future through the re-flection of their minds. Millenniums and centuries ago there lived a group of people who mastered the art of predicting the future and started using it for the goodwill of the society. The era blossomed where people lived harmoniously in a techno culturally advanced society. Over the years, this practice grew enormously and a time came when it was being used as a powerful weapon for its own benefits. To avoid the devastation that this advancement could havoc and also to ensure that it does not go to the wrong hands, the great sage created a different world for these positive and super eminent people to continue the practice in a different land where it was impossible to reach humans. Therefore, such a land gets created that is not only rich in culture but technologically hundreds of centuries advanced than the existing world. The vow of the sage however brings the future generation king of Manasvin to the current world and there gets born the seed of transition between the two worlds. What will happen when the two worlds (One techno culturally advanced and other with self-centered interests) meet? How do people embark on the technology that is centuries ahead of their time? The book explains the need of advancement of innovation through the mindset of self-indulgent people whose egoism is larger than the real dimensions of the world.
