LIFE The Day Kennedy Died The Editors of LIFE,2013-10-15 Fifty years ago on November 22, 1963, in Dallas's Dealey Plaza, John Fitzgerald Kennedy, the 35th President of the United States, was assassinated while traveling in a motorcade with his wife, Jacqueline. LIFE magazine, the

weekly pictorial chronicle of events in America and throughout the world, was quickly on the scene. The Kennedys had been our story: Jack and Jackie made the cover in his sailboat before they were married and he was a fresh-faced senator from Massachusetts, and the White House doors had remained open to LIFE throughout his presidency: Cecil Stoughton's photographs of Caroline and John-John in the Oval Office, Jackie's tour of the renovation, tense behind-the-scenes moments during 13 days of the Cuban Missile Crisis-all of this appeared in LIFE. We needed to be in Dallas. The famous Zapruder film first appeared in LIFE, after being acquired by LIFE's Richard B. Stolley. Stolley also interviewed at the time Dallas police, Kennedy administration officials, members of the Oswald family, workers at Jack Ruby's bar. Jackie's first conversation after the murder was with Theodore H. White for LIFE, and in it she told the American people, for the first time, about the Camelot her late husband had imagined. All of that is revisited in this commemorative book, including:

- All 486 frames of the Zapruder film in print for the first time
- An essay by Richard B. Stolley on how he exclusively obtained the iconic film for LIFE
- An essay by Abraham Zapruder's granddaughter, Alexandra, who writes for the first time about how the film affected her family over the generations
- Personal stories about where they were when they heard the news from Barbra Streisand, Maya Angelou, Jimmy Carter, Tony Bennett, Willie Mays, Sergei Khrushchev, James Earl Jones, John Boehner, Tom Brokaw, Mikhail Baryshnikov, Alec Baldwin, Bill O'Reilly, Dan Rather and many more
- Rarely seen photos from the TIME/LIFE archive of Allan Grant's photo essay of the Oswald family on the night of the assassination
- A foreword featuring a conversation with historian David McCullough
- A full reprint of LIFE's 1963 issue covering the tragic events in Dallas
- LIFE's Theodore H. White's famous Camelot interview with Jackie (which she gave shortly after the assassination), as well as the story behind the interview and the words that never ran
- A new essay

on 50 years of conspiracy theories by J.I. Baker, author of The Empty Glass The Kennedys: A LIFE story for more than 50 years, and still today.

Software Product Line Engineering Klaus Pohl,Günter Böckle, Frank J. van der Linden,2005-08-03 Software product line engineering has proven to be the methodology for developing a diversity of software products and software intensive systems at lower costs, in shorter time, and with higher quality. In this book, Pohl and his co-authors present a framework for software product line engineering which they have developed based on their academic as well as industrial experience gained in projects over the last eight years. They do not only detail the technical aspect of the development, but also an integrated view of the business, organisation and process aspects are given. In addition, they explicitly point out the key differences of software product line engineering compared to traditional single software system development, as the need for two distinct development processes for domain and application engineering respectively, or the need to define and manage variability.

Guide to Biometrics Ruud M. Bolle, Jonathan H. Connell, Sharath Pankanti, Nalini K. Ratha, Andrew W. Senior, 2013-06-29 Starting with fingerprints more than a hundred years ago, there has been ongoing research in biometrics. Within the last forty years face and speaker recognition have emerged as research topics. However, as recently as a decade ago, biometrics itself did not exist as an independent field. Each of the biometric-related topics grew out of different disciplines. For example, the study of fingerprints came from forensics and pattern recognition, speaker recognition evolved from signal processing, the beginnings of face recognition were in computer vision, and privacy concerns arose from the public policy arena. One of the challenges of any new field is to state what the core ideas are that define the field in order to provide a research agenda for the field and identify key research problems. Biometrics has been grappling with this challenge since the late 1990s. With the maturation of biometrics, the separate biometrics areas are coalescing into the new discipline of biometrics. The establishment of biometrics as a recognized field of inquiry allows the research community to identify problems that are common to biometrics in general. It is this identification of common problems that will define biometrics as a field and allow for broad advancement.
