Paleolimnology J. Meriläinen,P. Huttunen,R.W. Battarbee,2012-12-06 The Third International Symposium on Paleolimnology was held at the beginning of September 1981 in Finland. After registration at the University of Jyväskylä and the opening session and welcome reception in the Town Hall, the participants moved to a hotel at Koli, a hill famed as a landmark and for its panoramic view. Here the lecture session, lasting four days, took place. Momentarily, the mosaic of the lakeland became visible between the clouds showing the hill slopes covered by mature spruce forest and scattered old birch trees, a reminder of the last slash-and-burn phase some 130 years ago. Altogether 120 paleolimnologists participated in the meetings and most also attended one of the two post-symposium excursions to the Arctic Circle and to South Finland. The lectures covered a wide range of paleolimnological subjects. The main topics, however, included current aspects in the dating of sediments and the history of eutrophication. The symposium was advised by the international organizing committee under the presidency of Professor Edward S. Deevey. Other members present at Koli were Dr. Maj-Britt Florin, Dr. Heikki Ignatius, Prof. Heinz Lamer, Prof. Gerbert Martinson and Dr. Magdalena Ralska-lasiewiczowa. They also gave direction to a discussion on future plans for international activity in paleolimnology. Later in the autumn, after the end of the symposium, the participants sent special thanks to the secretaries, Mrs. Eija Meriläinen, Mrs. Tuula Nylander and Mrs. Anita Toukomaa, for solving individual problems during the symposium with smooth and rapid efficiency.

Oral Wound Healing Hannu Larjava,2012-03-07 Oral Wound Healing: Cell Biology and Clinical Management brings experts from around the world together to provide an authoritative reference on the processes, principles and clinical management of wound healing in the oral mucosa. discussion on processes such as inflammation, reepithelialization and angiogenesis. Beyond this, the book goes on to examine topics pertinent to the effective clinical management of oral wound healing, bringing together chapters on large dento-facial defects, dental implants, periodontal regeneration, and pulp healing. An essential synthesis of current research and clinical applications, *Oral Wound Healing* will be an indispensable resource for dental specialists, oral and maxillofacial surgeons as well as researchers in oral medicine and biology.

Attention Deficit Disorder Misdiagnosis Barbara C. Fisher, 1997-12-29 Attention Deficit Disorder (ADD) is one of the least understood medical conditions. With no specific test available, misdiagnosis is common and the results can be devastating for both the parents and the child. Because no one can agree on a single definition for the disorder, confusion is rampant and treatment is only mildly successful at best. *Attention Deficit Disorder Misdiagnosis* addresses these problems in a systematic and logical fashion. It presents a battery of tests for properly diagnosing ADD, stresses its relationship to brain behavior and proposes practical treatment solutions. Written by an expert in the field who also happens to be the mother of an ADD child, it presents a unique perspective on this complex yet all too pervasive disorder. This is an essential text for doctors, parents and any individual working with an ADD child or adult. It will also help professionals in related disciplines approach ADD as a biochemical medical disorder and understand the reasons for its inherent complexity and frequent misdiagnosis.
