European Clocks in the J. Paul Getty Museum Gillian Wilson,David Harris Cohen,Jean Nérée Ronfort,Jean-Dominique Augarde,Peter Friess,2013-08-15 Among the finest examples of European craftsmanship are the clocks produced for the luxury trade in the eighteenth century. The J. Paul Getty Museum is fortunate to have in its decorative arts collection twenty clocks dating from around 1680 to 1798: eighteen produced in France and two in Germany. They demonstrate the extraordinary workmanship that went into both the design and execution of the cases and the intricate movements by which the clocks operated. In this handsome volume, each clock is pictured and discussed in detail, and each movement diagrammed and described. In addition, biographies of the clockmakers and enamelers are included, as are indexes of the names of the makers, previous owners, and locations.

This Is the Story of a Happy Marriage Ann Patchett,2013-11-07 This Is the Story of a Happy Marriage is an irresistible blend of literature and memoir revealing the big experiences and little moments that shaped Ann Patchett as a daughter, wife, friend and writer. Here, Ann Patchett shares entertaining and moving stories about her tumultuous childhood, her painful early divorce, the excitement of selling her first book, driving a Winnebago from Montana to Yellowstone Park, her joyous discovery of opera, scaling a six-foot wall in order to join the Los Angeles Police Department, the gradual loss of her beloved grandmother, starting her own bookshop in Nashville, her love for her very special dog and, of course, her eventual happy marriage. This Is the Story of a Happy Marriage is a memoir both wide ranging and deeply personal, overflowing with close observation and emotional wisdom, told with wit, honesty and irresistible warmth.

Wiley-Blackwell Student Dictionary of Human Evolution Bernard Wood,2015-02-23 Not so long ago, all a student studying human evolution needed was a familiarity with the relatively sparse fossil record and what limited information there was about the context of the sites, a basic knowledge of gross anatomy and archeology, and an understanding of simple analytical methods. Times have changed. The fossil record has grown exponentially, imaging techniques have advanced dramatically, quantitative methods have burgeoned, and molecular biology has revolutionized our understanding of genetics, evolutionary history, and development. Added to this are advances in the archeological, biological, and earth sciences that help interpret the context of the fossil evidence and reconstruct behavior. But presently there is nowhere students of human evolution can easily find out about topics as disparate as ameloblast, Coopers Cave, daily secretion rate, the effect hypothesis, homeobox genes, insolation, phylogenetically independent contrasts, quantitative trait locus, semicircular canals, and tephrostratigraphy. The Wiley Blackwell Student Dictionary of Human Evolution contains upwards of 2500 entries, all drafted with an eye on the student user. It is an indispensable source for those studying human evolution.

Time Telling through the Ages Harry Chase Brearley,2022-06-03 Harry Chase Brearly in this book gives a detailed description of the history of timekeeping from the stone age through the invention of modern clocks and watches. He described so many important parts of technologies of time-telling devices such as water clocks with the explanation of essential parts that makes up the mechanism of clocks. This book also covers the idea and philosophy of time.

The Woman Who Changed Her Brain Barbara Arrowsmith-Young,2013-09-17 Previously published in hardcover: New York: Free Press, 2012.

Space-Time for Absolute Beginners Tony Goldsmith,2018-04-02 In the Twentieth Century Albert Einstein and others made some astonishing discoveries. They showed us how our universe could start with a Big Bang which seems to allow something to appear from nothing, that Space can be curved and why there may have been a time when there was no Time. If you have always been absolutely baffled by anything related to Space-time then this book is for you. My writing mission is to engage with a new audience that has no previous knowledge of science, and I go to great lengths (without any equations) to make sure that everybody can fully understand my explanations.Unfortunately, Space-time has a reputation for being difficult. The first thing I will do is show that this claim is false. In this book nothing is too hard to understand and I will also encourage you to participate in the scientific process. Don't worry, you are not going to need your own laboratory; everything can be done in the comfort of your own home with Thought Experiments.
