Life is short, so explore a multitude of fascinating historical, biographical, scientific, political, and financial topics in only an hour each. Pericles was a statesman, general, and speaker during the Golden Age of Athens. His impact on the city-state would be so great that Thucydides, an honored historian, would refer to him as the city's First Citizen. In what would be titled the Age of Pericles, he would turn the Delian League from an alliance to an Athenian Empire and foster the arts and sciences within his country more than any leader had before him. He is responsible for starting the great projects of Athens, like the Acropolis and Parthenon, which can still be seen in their glory today.

The Ecclesiazusae Aristophanes, 2012-11-01 Aristophanes' Ecclesiazusae, written in the early 4th Century BC, marks a crossroads in his career. Post-dating the Peloponnesian War, it reflects a late change in his writing and a much changed society. This edition includes the complete text.

First Citizens Meena Radhakrishna, 2016 This volume brings into the public domain some of the critical issues confronting a large, particularly vulnerable section of Indian society. The papers in this volume, put together, successfully straddle the historical along with the contemporary. They engage with nebulous issues of shifting identities as painstakingly as hard realities of adivasi lives in colonial or neo liberal times. The volume analyses the political reasons for the existence of various labels by which members of this vast constituency are known: tribals, scheduled tribes, indigenous people, adivasis, and so on. Rich scholarly papers document their past and contemporary migrations and

absorption into informal economies; the multilayered aggression of development policies impinging on the lives of those inhabiting mineral rich habitats; the violent interface between politicized forest dwellers and the Indian state; and the theory and practice behind state legislation, both enabling and disabling, affecting forest based communities. The volume engages with the communities struggle to organize a wide based social movement, including the environment movement, to challenge ecologically destructive and non-inclusive economic policies. The papers in this volume deeply empathise with the communities pain at their loss and dispossession, as well as with their triumphs as they fight their way to claiming an identity as Indian citizens.

H.G. Wells Keith Ferrell, 2014-03-24 He was born in the year dynamite was invented (1866) and died a year after the first explosion of the atomic bomb (1946). Herbert George (H. G.) Wells was a man whose life dominated the century and whose ideas both predicted and shaped the future. One of the most influential men of his time, a leading science-fiction writer, novelist, philosopher, reformer and fighter for civilization, Wells exercised his imagination and expounded his revolutionary ideas in over one hundred books in the course of his long life. As a young man Wells struggled against repeated failure as a draper's assistant, science student and teacher before finding his vocation as a writer. He wrote the pioneering—and immediately popular—novel *The Time Machine*. In this and other classic science fiction such as *The Invisible Man* and *The War of the Worlds*, Wells combined serious and often remarkably accurate speculation about the future with high adventure. But Wells was not content just to write fiction. He was also an advocate for change in social customs and a man deeply concerned with the future of humanity. A firm believer that the twentieth century would be the turning point for civilization, Wells anticipated many of the changes in his writings on space travel, politics, marriage and the technologies of war. This is a dramatic account of Wells's life and his fight for causes and concerns that are still relevant today.

First Citizen Joseph Lambert, Jr.,Rick Shale,2022-11-03 In 1919, the doors of Youngstown's Butler Institute of American Art were opened for the first time. Dubbed the lighthouse of culture, both the beautiful marble museum and the artwork inside were the gift of 19th-century industrialist Joseph G. Butler, Jr., in what was the crowning achievement of a long life. Butler earned his successes with hard work, a competitive spirit and business savvy. He earned a fortune in the iron and steel industry crowded by such figures as Andrew Carnegie, Henry Frick and Charles Schwab. Butler also took on politicians, promoted American interests, preserved American history and spearheaded projects to improve his community. To friends and admirers, he was affectionately referred to as Uncle Joe. This biography chronicles Butler's early life through his career in the iron and steel industry, detailing his contributions to the art world, his philanthropic endeavors and his accomplishments as an author and historian.

**The New Oxford Shakespeare: Critical Reference Edition** William Shakespeare,2017-03-30 The New Oxford Shakespeare is a landmark print and online project, which for the first time provides fully edited and annotated texts of all extant versions of all Shakespeare's works, including collaborations, revisions, and adaptations. Based on a fresh examination of the surviving original documents, it draws upon the latest interdisciplinary scholarship, supplemented by new research undertaken by a diverse international team. Although closely connected and systematically cross-referenced, each part can be

used independently of the others. The New Oxford Shakespeare: The Complete Works: Critical Reference Edition collects the same versions of the same works found in the Modern Critical Edition, keyed to the same line-numbering. But the Critical Reference Edition emphasizes book history and the documentary origins of each text. It preserves the spelling, punctuation, capitalization, abbreviations, typographical contrasts, ambiguities, and inconsistencies of the early documents. Introductions focus on early modern manuscript and print culture, setting each text within the material circumstances of its production, transmission, and early reception. The works are arranged in the chronological order of the surviving texts: the first volume covers documents manufactured in Shakespeare's lifetime, and the second covers documents made between 1622 and 1728. The illustrated general introduction presents an overview of the texts available to editors and describes how they define Shakespeare. An essay on error surveys kinds of error characteristic of these early text technologies. It is followed by a general introduction to the music of Shakespeare's plays. Introductions to individual works and an extensive foot-of-the-page textual apparatus record and discuss editorial corrections of scribal and printing errors in the early documents; marginal notes record press variants and key variants in different documents. Original music notation is provided for the songs (where available). Because the plays were written and copied within the framework of theatrical requirements, casting charts identify the length and type of each role, discuss potential doubling possibilities, and note essential props. The New Oxford Shakespeare consists of four interconnected publications: the Modern Critical Edition (with modern spelling), the Critical Reference Edition (with original spelling), a companion volume on Authorship, and an online version integrating all of this material on OUP's high-powered scholarly editions platform. Together, they provide the perfect resource for the future of Shakespeare studies.

**Coriolanus** William Shakespeare, 2014-03-06 When an old adversary threatens Rome, the city calls once more on her hero and defender: Coriolanus. But famine threatens the city, the citizens' hunger swells to an appetite for change, and on returning from the field Coriolanus must confront the march of realpolitik and the voice of an angry people. This is one of Shakespeare's last tragedies, best known for its political and military themes. Shakespeare's searing play of political manipulation and revenge is here abridged and this version was first produced at the Donmar Warehouse, London, directed by Josie Rourke and with Tom Hiddleston in the title role. The script has been edited and abridged by Rob Hastie and Josie Rourke.
