Entertainment Computing - ICEC 2004 Matthias Rauterberg,2004-08-23 The advancement of information and communication technologies (ICT) has enabled broad use of ICT and facilitated the use of ICT in the private and personal domain. ICT-related industries are directing their business targets to home applications. Among these applications, entertainment will differentiate ICT applications in the private and personal market from the of?ce. Comprehensive research and development on ICT - plications for entertainment will be different for the promotion of ICT use in the home and other places for leisure. So far engineering research and development on enterta- ment has never been really established in the academic communities. On the other hand entertainment-related industries such as the video and computer game industries have been growing rapidly in the last 10 years, and today the entertainment computing bu- ness outperforms the turnover of the movie industry. Ivanna A. Emmanuel Reed,2018-09-28 The price she paid for fortune and fame was far more than what her soul was willing to gamble. But once you roll the dice in the industry of sin, it's far too late to get out the game. Ivanna Julia Winters dreamed of nothing more than to become the world's next top model, but when she refused to sell her soul to the devil, her whole world came crashing down. Determined to redeem herself from her dark past, she writes an inspiring novel as a way to convey a powerful message to the world before it's too late. As her life continued to spiral out of control, the struggle to find paradise beyond the clouds of her insanity became nearly impossible to achieve. But when she found her secret admirer, his love became the silver lining that brightened up her whole world.

The Sheer Curtain Maria Elena Garza,2016-06-17 This short novel is dedicated to my wonderful family: my children, Cathy, Fernando, Phillip; my grandchildren Jozette, Alaena, Phoenix; and my husband, Max. The novel is especially written for an audience of young readers or adults who choose to have a child's imagination. It was such fun for me to develop the characters and scenes of this mystery. It all starts with a woman's silhouette that appears on the third-floor window of this old Victorian mansion. No one in the town of Sneila has ever seen her except when she stands behind the sheer curtain. The children of the town look forward to Halloween every year. The children together walk down the dirt road to the mansion that sits at the edge of town behind enormously tall trees and a black iron fence. Every Halloween, the children know that, in front of the mansion outside the gate, there will be a mysterious white cauldron filled with magic candies for each child. The candies are in baggies with each child's name written on the front of the baggie. How does she know every child's name? Where does this candy come from? The children agree that the candy is very different, like it's out of this world. These are only two of the mysteries that exist in the town of Sneila. Much mystery lives in the town of Sneila. The number of people in this town never changes. When one person dies, another is born. People who die are not buried. The number 8 appears throughout the town. Sometimes you have to add two digits to find the 8. The infinity symbol appears throughout the novel. Magic turtles surface and communicate with the two main characters, Samantha and Victoria. Flickering lights, hidden doors, basement, baskets, spaceships, magic turtles, mysterious bubbles, candles, and fairies create a magical kingdom. Wrinkles and gray hair are witnesses to times past. The surprise ending is sure to give you goose bumps! Other books from the author include the following: Sleepy Tears Laughing Tears Sleepy Tears Miss You Tears Gods Love is Real (poetry book) Friends and Angels (poetry book) The Secret Meeting of the Sworceracs

Applied Physics, System Science and Computers III Klimis Ntalianis,George Vachtsevanos,Pierre Borne,Anca Croitoru,2019-06-27 This book reports on advanced theories and methods in three related fields of research: applied physics, system science and computers. The first part covers applied physics topics, such as lasers and accelerators; fluid dynamics, optics and spectroscopy, among others. It also addresses astrophysics, security, and medical and biological physics. The second part focuses on advances in computers, such as those in the area of social networks, games, internet of things, deep learning models and more. The third part is especially related to systems science, covering swarm intelligence, smart cities, complexity and more. Advances in and application of computer communication, artificial intelligence, data analysis, simulation and modeling are also addressed. The book offers a collection of contributions presented at the 3rd International Conference on Applied Physics, System Science and Computers (APSAC), held in Dubrovnik, Croatia on September 26-28, 2018. Besides presenting new methods, it is also intended to promote collaborations between different communities working on related topics at the interface between physics, computer science and engineering.

There's No Such Thing As Free Speech Stanley Fish,1994-12-15 In an era when much of what passes for debate is merely moral posturing--traditional family values versus the cultural elite, free speech versus censorship--or reflexive name-calling--the terms liberal and politically correct, are used with as much dismissive scorn by the right as reactionary and fascist are by the left--Stanley Fish would seem an unlikely lightning rod for controversy. A renowned scholar of Milton, head of the English Department of Duke University, Fish has emerged as a brilliantly original critic of the culture at large, praised and pilloried as a vigorous debunker of the pieties of both the left and right. His mission is not to win the cultural wars that preoccupy the nation's attention, but rather to redefine the terms of battle. In *There's No Such Thing as Free Speech*, Fish takes aim at the ideological gridlock paralyzing academic and political exchange in the nineties. In his witty, accessible dissections of the swirling controversies over multiculturalism, affirmative action, canon revision, hate speech, and legal reform, he neatly eviscerates both the conservatives' claim to possession of timeless, transcendent values (the timeless transcendence of which they themselves have conveniently identified), and the intellectual left's icons of equality, tolerance, and non-discrimination. He argues that while conservative ideologues and liberal stalwarts might disagree vehemently on what is essential to a culture, or to a curriculum, both mistakenly believe that what is essential can be identified apart from the accidental circumstances (of time and history) to which the essential is ritually opposed. In the book's first section, which includes the five essays written for Fish's celebrated debates with Dinesh D'Souza (the author and former Reagan White House policy analyst), Fish turns his attention to the neoconservative backlash. In his introduction, Fish writes, Terms that come to us wearing the label 'apolitical'--'common values', 'fairness', 'merit', 'color blind', 'free speech', 'reason'--are in fact the ideologically charged constructions of a decidedly political agenda. I make the point not in order to level an accusation, but to remove the sting of accusation from the world 'politics' and redefine it as a synonym for what everyone inevitably does. Fish maintains that the debate over political correctness is an artificial one, because it is simply not possible for any party or individual to occupy a position above or beyond politics. Regarding the controversy over the revision of the college curriculum, Fish argues that the point is not to try to insist that inclusion of ethnic and gender studies is not a political decision, but to point out that any alternative curriculum--say a diet of exclusively Western or European texts--would be no less politically invested. In Part Two, Fish follows the implications of his arguments to a surprising rejection of the optimistic claims of the intellectual left that awareness of the historical roots of our beliefs and biases can allow us, as individuals or as a society, to escape or transcend them. Specifically, he turns to the movement for reform of legal studies, and insists that a dream of a legal culture in which no one's values are slighted or declared peripheral can no more be realized than the dream of a concept of fairness that answers to everyone's notions of equality and justice, or a yardstick of merit that is true to everyone's notions of worth and substance. Similarly, he argues that attempts to politicize the study of literature are ultimately misguided, because recharacterizations of literary works have absolutely no impact on the mainstream of political life. He concludes his critique of the academy with *The Unbearable Ugliness of Volvos*, an extraordinary look at some of the more puzzling, if not out-and-out masochistic, characteristics of a life in academia. Penetrating, fearless, and brilliantly argued, *There's No Such Thing as Free Speech* captures the essential Fish. It is must reading for anyone who cares about the outcome of America's cultural wars.

Technobiophilia Sue Thomas,2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In Technobiophilia: Nature and Cyberspace, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. Technobiophilia: Nature and Cyberspace offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction.

Achieving Speech and Language Targets Catherine Delamain,Jill Spring,2017-07-05 Achieving Speech & Language Targets is a practical resource book for Special Needs Coordinators (SENCOs), teachers, teaching assistants and speech & language therapists who are working with children who have significant language delay and who are in their first year at school. Checklists provide professionals with a shared reference from which both broad special needs areas and specific speech and language targets can be identified. The authors emphasise the crucial role of play in language development and the book offers more than 200 games and activities to help children achieve their targets for each stage using a simple, structured layout. The book offers: advice on how to draw up effective Individual Education Plans (IEPs); checklists which enable the user to identify a child's problems in the areas of: understanding language; using spoken language; and, developing speech sounds; a wide range of games, songs and rhymes to help children achieve specific targets; teaching ideas & targets, key vocabulary lists, and activity areas for each stage; a resources section containing photocopiable activity sheets; games & rhymes; a booklist; techniques used by speech & language therapists to encourage understanding and use of language; and, a dictionary of terms that refer to speech & language. This is an essential tool for busy teaching staff. Many of the activities can take place in the context of the everyday curriculum and include a range of play opportunities designed to make learning interesting and dynamic. Almost all activities can be carried out using equipment that is readily available in early years' classrooms.

de Gournay Claud Cecil Gurney,2020-10-06 Renowned for its elegant hand-painted wallpapers and textiles, de Gournay creates some of the most beautiful interiors in the world. Celebrated for its hand-painted chinoiserie wallpapers, sumptuous patterns of colorful flora and varied birdlife, the company produces additional collections that explore historical themes, such as nineteenth- century French pastoral scenes or exotic Brazilian landscapes bursting with wildlife. De Gournay also crafts more abstracted designs that fit well with modern interiors. Collaborating with renowned tastemakers from across creative industries, de Gournay works with leading interior designers as well as noted trendsetters such as Kate Moss. This volume showcases de Gournay designs in situ, in beautiful interiors created by top designers in homes from San Francisco and New York to London, Paris, and beyond. The book explores de Gournay interiors in both city and country settings, how to take inspiration from English stately homes, and how custom wallpaper designs are created. Full of inspiring interiors and design ideas, de Gournay is an in-depth look at the stunning creations of one of the most prestigious and influential design houses of today.

Ugly Fish Kara LaReau,2006-06-01 Ugly Fish is ugly and big and mean, and he won't share his driftwood tunnel or his special briny flakes with anyone. And that means the wimpy little fish who keep showing up in his tank have got to go. But then one day someone bigger and uglier and maybe even meaner arrives . . . and suddenly Ugly Fish isn't feeling quite so confident anymore. From Kara LaReau, author of the Rocko and Spanky series, here is an irreverent and terrifically funny book about a bully who at last gets his comeuppance.
