Boy @ the Window Donald Earl Collins, 2013-11 As a preteen Black male growing up in Mount Vernon, New York, there were a series of moments, incidents and wounds that caused me to retreat inward in despair and escape into a world of imagination. For five years I protected my family secrets from authority figures, affluent Whites and middle class Blacks while attending an unforgiving gifted-track magnet school program that itself was embroiled in suburban drama. It was my imagination that shielded me from the slights of others, that enabled my survival and academic success. It took everything I had to get myself into college and out to Pittsburgh, but more was in store before I could finally begin to break from my past. *Boy @ The Window* is a coming-of-age story about the universal search for understanding on how any one of us becomes the person they are despite-or because of-the odds. It's a memoir intertwined with my own search for redemption, trust, love, success-for a life worth living. *Boy @ The Window* is about one of the most important lessons of all: what it takes to overcome inhumanity in order to become whole and human again.

A Few Good Elves Diane Morrison, 2021-09-07 Shaundar Sunfall is a young Star-Pilot who lies about his age to join the Avalonian Navy when his people's ancient enemies, the orcs, declare war. He learns that war is no great adventure.

The One-Minute Workout Martin Gibala, Christopher Shulgan, 2017-02-07 Finally, the solution to the #1 reason we don't exercise: time. Everyone has one minute. A decade ago, Martin Gibala was a young researcher in the field of exercise physiology—with little time to exercise. That critical point in his career launched a passion for high-intensity interval training (HIIT), allowing him to stay in shape with just a few minutes of hard effort. It also prompted Gibala to conduct experiments that helped launch the exploding science of ultralow-volume exercise. Now that he's the worldwide guru of the science of time-efficient workouts, Gibala's first book answers the ultimate question: How low can you go? Gibala's fascinating quest for the answer makes exercise experts of us all. His work demonstrates that very short, intense bursts of exercise may be the most potent form of workout available. Gibala busts myths ("it's only for really fit people"), explains astonishing science ("intensity trumps duration"), lays out time-saving life hacks ("exercise snacking"), and describes the fascinating health-promoting value of HIIT (for preventing and reversing disease). Gibala's latest study found that sedentary people derived the fitness benefits of 150 minutes of traditional endurance training with an interval protocol that involved 80 percent less time and just three minutes of hard exercise per week. Including the eight best basic interval workouts as well as four microworkouts customized for individual needs and preferences (you may not quite want to go all out every time), *The One-Minute Workout* solves

the number-one reason we don't exercise: lack of time. Because everyone has one minute.
