Five Lectures on Reincarnation Swami Abhedananda, 2014-11-11 [...]by the law of natural selection involuntarily choose, or be unconsciously drawn to, as it were, its suitable parents and will be born of them. As, for instance, if I have a strong desire to become an artist, and if after a life-long struggle I do not succeed in being the greatest, after the death of the body I will be born of such parents and with such environments as will help me to become the best artist. The whole process is expressed in Eastern philosophy by the doctrine of the Reincarnation of the individual soul. Although this doctrine is commonly

rejected in the West, it is unreservedly accepted by the vast majority of mankind of the present day, as it was in past centuries. The scientific explanation of this theory we find nowhere except in the writings of the Hindus; still we know that from very ancient times it was believed by the philosophers, sages and prophets of different countries. The ancient civilization of Egypt was built upon a crude form of the doctrine of Reincarnation. Herodotus says: The Egyptians propounded the theory[...].

Vedanta Philosophy Abhedananda Swami,2013-06 Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Five Lectures on Reincarnation Swami Abhedananda,2020-03 Every voluntary or involuntary action of the body, sense or mind must correspond to the dormant impressions stored up in the subtle body. Although growth, the process of nourishment and all the changes of the gross physical body take place according to the necessarily acting causes, yet the whole series of actions, and consequently every individual act, the condition of the body which accomplishes it, nay, the whole process in and through which the body exists, are nothing but the outward expressions of the latent impressions stored up in the subtle body. Upon these rests the perfect suitableness of the animal or human body to the animal or human nature of one's impressions. The organs of the senses must therefore completely

correspond to the principal desires which are the strongest and most ready to manifest. They are the visible expressions of these desires. If there be no hunger or desire to eat, teeth, throat and bowels will be of no use. If there be no desire for grasping and moving, hands and leags will be useless. Similarly it can be shown that the desire for seeing, hearing, etc., has produced the eye, ear, etc. If I have no desire to use my hand, and if I do not use it at all, within a few months it will wither away and die. In India there are some religious fanatics who hold up their arms and do not use them at all; after a few months their arms wither and become stiff and dead. A person who lies on his back for six months loses the power of walking. There are many such instances which prove the injurious effects of the disuse of our limbs and organs.

Five Lectures on Reincarnation Swami Abhedananda, 2015-06-29 Vedanta Philosophy: Famous lectures in Yoga from the last survivor of the direct disciples of Ramakrishna. The doctrine of Reincarnation says that each individual soul is potentially perfect and is

gradually unfolding its powers and making them actual through the process of Evolution. - Swami Abhedananda Swami Abhedananda compiled for you this fabulous book of his five lectures on reincarnation. In each lecture he examines the beliefs of religions and cultures while explaining the scientific basis of reincarnation. This is a very deep book and powerful to those who seek a deeper understanding of reincarnation. In these discourses the Swami Abhedananda considers the questions of evolution and the resurrection in their bearing upon the ancient teaching of rebirth, the truth, logic and justice of which are rapidly permeating the best thought of the Western world. For the preservation of this doctrine mankind is indebted to the literary storehouses of India, the racial and geographical source of much of the vital knowledge of Occidental peoples. Reincarnation is shown in the present volume to be a universal solvent of life's mysteries. It answers those questions of children that have staggered the wisest minds who seek to reconcile the law of evolution and the existence of an intelligent and just Creator, with the proposition that man has but a single lifetime in which to develop spiritual self-consciousness. It is commended to every thinker. - Mind, February, 1900 It is a work which will appeal to the novice for its simplicity and definite quality, and to the student for its wealth of knowledge and suggestion. -Vedanta Monthly Bulletin, September, 1907 The book should prove a valuable acquisition. -The Evening Sun, N. Y., December 21, 1907 This is the work of a man of fine education and fine intellect....(Reincarnation) as expounded by Swami Abhedananda is very plausible, quite scientific, and far from uncomfoting. The exposition contained in this little book is well worth reading for all students of metaphysics. There is not the slightest danger of its converting or perverting any one to a new and strange religion. Reincarnation is not

religion, it is science. Science was never known to hurt anybody but scientists. -Brooklyn Eagle, December 13, 1907 Contents I.--Reincarnation II.--Heredity and Reincarnation III.--Evolution and Reincarnation IV.--Which is Scientific, Resurrection or Reincarnation? V.--Theory of Transmigration
