An island in Prehistory. Neolithic and Bronze Ages finds from Kalymnos

Dodecanese Mario Benzi, 2020-11-20 The earliest prehistoric excavations on the island took place in 1887, when W.R. Paton discovered Mycenaean chamber tombs in the side of the torrent bed, which runs into the harbour of Pothia to the east of the hill of Perakastro, where the Late Bronze Age settlement stood. Most of the vessels found from Paton were presented to the British Museum while others are preserved in other European Museums. The first systematic excavations, however, took place only in the early twenties of the past century when the Italian archaeologist A. Maiuri director of the archaeological exploration of the then Italian islands of the Dodecanese, excavated the three prehistoric caves of Ayia Varvara (1920), Choiromandres (1921), and Vathy-Dhaskalio (1922), which are the object of the present study.

From Carnac to Callanish Aubrey Burl, Dr Aubrey Burl, 1993-01-01 This book discusses the lines of standing stones that until now have been the neglected wonders of prehistoric Europe, rows that were foci of rituals in Britain, Ireland and Brittany for over two thousand years. Places such as Carnac in Brittany and Callanish in the Hebrides are visited by many visitors each year, but before now there has been no book that seriously explains the history, significance and background to these impressive sites. Aubrey Burl shows that the settings vary from pairs of isolated stones in the far south-west of Ireland to networks of long lines in Scotland, Dartmoor and Brittany, and describes the types in a sequence of architectural chapters that stress the increasing social and commercial connections between regions hundred of miles apart. He uses information from a wide variety of sources - excavation reports, megalithic art, astronomical analyses and legends - to provide explanations of why the rows were erected, when, and what they may have been used for.

The Ancient Alien Question, 10th Anniversary Edition Philip

Coppens, 2021-03-01 " . . . an important and outstanding contribution." –Erich von Däniken, bestselling author of *Chariots of the Gods* "The Ancient Alien Question provides a captivating adventure around the world and sheds an interesting perspective on the Ancient Astronaut Theory." –Giorgio A. Tsoukalos, producer of *Ancient Aliens: The Series* "Philip Coppens covers all the bases on this controversial topic. His research is thorough and he addresses each topic with a balanced overview that cuts through the jungle of confusion with a very sharp machete of reason." –David Hatcher Childress, author of *Technology of the Gods* The Ancient Alien Question reveals an array of astonishing truths, including: A radically different understanding of the pyramids and how they were constructed The extraordinary stories behind monuments such as the Nazca lines and Puma Punku How extraterrestrials came to our planet and the evidence that supports this Analyzing the historical and archaeological evidence, Philip Coppens demonstrates that there is substantial proof that our ancestors were far more technologically advanced than currently accepted, and that certain cultures interacted with nonhuman intelligences. Our ancestors were clearly not alone. Fifty years after Erich von Däniken posed these questions in *Chariots of the Gods*, Coppens provides clear, concise answers to the great historical enigmas in an accessible, readable format. Your view of human history will never be the same again!

Records in Stone Clive Ruggles, 2003-02-13 Professor Alexander Thom, who

died in 1985, was a distinguished engineer. Independently of his 'mainstream' academic career, he developed a deep and active interest in the prehistoric megalithic sites of Britain and Brittany. Thom's interpretations of the field data have aroused strong interest and some intense controversy.

Ancient Aliens Philip Coppens, 2014-12-15 Ancient civilizations generated many innovations that are difficult to explain, such as the remarkable mathematical accuracy of the pyramids of Giza, the man-made fertile soil of the Amazon known as terra preta, and massive stone monuments too heavy to move in Peru and Lebanon, among other places. Given that modern science cannot explain these mysterious phenomena, one theory holds that ancient aliens were responsible for them. This volume examines the credibility of various paranormal hypotheses, giving readers the opportunity to explore the greatest puzzles of antiquity.

The Dartmoor Reaves Andrew Fleming, 2008-04-01 First published in 1988, *The Dartmoor Reaves* is a classic story of archaeological fieldwork and discovery, and a winner of the Archaeological Book Award. This major new edition adds both color illustrations and two substantial new chapters to the original groundbreaking text, which revolutionized our understanding of Britain's prehistoric landscapes. Dartmoor has long been known for the richness of its prehistoric heritage; stone circles, hut circles, massive burial cairns, and stone rows all pepper the landscape. In the 1970s a new dimension was added, with the recognition that the long-ignored reaves (ruined walls) are also prehistoric; Dartmoor now posed all sorts of questions about the nature of Bronze Age society. Andrew Fleming describes the critical moment when his own fieldwork picked up the pattern of the reaves, and he realized their true identity. His new chapters place Dartmoor's large-scale, planned, prehistoric landscapes in the context of other 'co-axial' field systems that have since been found elsewhere, and also discuss their meaning, in the light of the latest research on the Bronze Age.

Prehistoric Britain from the Air Timothy Darvill,1996-07-04 This book provides a bird's eye look at the monumental achievements of Britain's earliest inhabitants. Arranged thematically, it illustrates and describes a wide selection of archaeological sites and landscapes dating from between 500,000 years ago and the Roman conquest. The Old Stones of Ireland Andy Burnham,2019-01-01 This ebook covers both the Republic of Ireland and Northern Ireland. It could easily have been filled with sites from the Republic's southwest alone, the counties of Cork and Kerry being famed for their wedge tombs and their stone circles (often in absolutely beautiful locations) that include Drombeg, Derreenataggart, Ardgroom, Shroneberrane, Uragh and many others. Otherwise, visitors tend to head for the cluster of sites around Newgrange (Co. Meath) to the east. That there were once even more prehistoric monuments in this rich farmland was revealed in the sweltering summer of 2018, when the parched earth showed up previously undetected sites as cropmarks. Also included in this ebook are many lesser-known but wonderful sites from the north and east of Ireland, such as the vast megalithic complexes of Beaghmore, Carrowmore and

Carrowkeel. Each of these will take a whole day to explore fully, so allow plenty of time. The Old Stones of Ireland is part of a series covering the megalithic and other prehistoric sites of Britain and Ireland. The series is published together as The Old Stones: A Field Guide to the Megalithic Sites of Britain and Ireland, available as a book and an ebook.
