Strategies for Urban Network Learning Leon van den Dool, 2020-05-06 This book presents international experiences in urban network learning. It is vital for cities to learn as it is necessary to constantly adapt and improve public performance and address complex challenges in a constantly changing environment. It is therefore highly relevant to gain more insight into how cities can learn. Cities address problems and challenges in networks of co-operation between existing and new actors, such as state actors, market players and civil society. This book presents various learning environments and methods for urban network learning, and aims to learn from experiences across the globe. How does learning take place in these urban networks? What factors and situations help or hinder these learning practices? Can we move from intuition to a strategy to improve urban network learning?

The Fix Declan Hill,2010-04-13 The Fix is the most explosive story of sports corruption in a generation. Intriguing, riveting, and compelling, it tells the story of an investigative journalist who sets out to examine the world of match-fixing in professional soccer. From the Introduction Understand how gambling fixers work to corrupt a soccer game and you will understand how they move into a basketball league, a cricket tournament, or a tennis match (all places, by the way, that criminal fixers have moved into). My views on soccer have changed. I still love the Saturday-morning game between amateurs: the camaraderie and the fresh smell of grass. But the professional game leaves me cold. I hope you will understand why after reading the book. I think you may never look at sport in the same way again.
